She was tempted and eloped; perhaps ere this she has discovered the cheat, and now knows him to be an arch and vile deceiver. What can a generous and enlighted community say of the character of a man who has thus alienated the affections of a poor, unsuspecting, sally girl, and seduc d her from the fond embraces of a father, her little brothers and sisters, and all that is near and dear to of the deepest remorse, in the recollection of the past. I forwarn the said Boykin from ny wise or manner, and every other person or persons whatsoever, under penalty of the law. If my said daughter will again return home without coercion or force, I will receive her and endeavor to forget the past.

' A Woman is always courageous an ready to play the heroine when armed with that favorite weapon of the gentler sex; a broomstick. It is delightful to see the dexterity with which she will ply it well as the science she exhibits in laying onist and not so easily foiled as one might imagine. A thief in New York the other night attempted to steal some of the paraphernalia composing a lady's wardrobe. He was discovered when on the retreat by a gentle mistress of the house. Nothing daunted, she fled for the broomstick and commenced an offensive assault upon the retiring foe. From the top of the stairs even into the street, she pursued him, broad side following up broad side, until she laid him prostrate at her feet with no other weapon but the broom stick. This she plied over his head and shoulders with such dexterity and power, that this 'lord of creation' asked for quarters, and surrendered into the custody of the watchmen. ATTEMPT TO MURDEE -A man by the name of Farnum, in the employ of George, was wounded by one of the Seminole Indians, on the 19th inst. under the following circumstances. - In the absence a rifle, who called himself a Chief, came to his house and abused his wife and family, and threatened to murder the whole of them. He claimed to own the land occupied by Mr. Sweester, and attempted to provoke a fight with a young man in Sweester's service, by the name of Johnson. Capt. About half past 12 o'clock last night, the bells of St. Michael's Church sounded the alarm, but before any number of citizens could assemble the fire had made fearful progress. It broke out in a small wooden tenement on the West side of Meeting, between Hasell and Market streets, occupied by Mr. SHEPARD as a Sadlers' Shop. soon spread on both sides of that building. but was arrested on the South by a brick building, occupied by Dr. WURDEMAN as a study, while on the North it extended to Hasell-street. Crossing Meeting street at the Grocery, corner of Guignard street, occupied by Capt. Fash, the flames spead Northwardly to Hasell street, which they also crossed at this spot, consuming two wooden tenements on the North side of Hasell street, next to the corner of Meeting street. Their further progress Westwardly at this point was arrested by the blowing up of a wooden house in Hasell street. Southwardly on the same side of Meeting street, they extended to the Beef Market, the roof at the East end of which was destroyed, and

the cupola considerably injured.

The confligration then took an Easter

> PHENOMENON.-By a gentleman recently from Prince William County, Virginia, we have been informed says the deorgetown Metropolitan, of a remarkable occurrence which took place on the Neabsco tract, about four miles from Dumfries, on Monday se'night, during that heavy thunder storm, which, it will be recollected overspread the whole heavens, and appearently visited every quarter of our country. The earth for several acres, which was previously firm and good, suddenly (from its present apprire ance) sunk to the depth of about four fret, and cracked open in innumerable places throughout the whole mass, as if it had been blown by gunpowder. The thunder and lightning which here was comparatively slight, there was awfully heavy and severe, accompained by an abundant shower of hail which however, was not so injurious to the grain as to the window glass. Numerous persons have visited the spot, but are totally unable to account for the remarkable phenomenon. Some suppose it to have been produced by

shock of an earthquake, aithough the people residing in the neighborhood expetienced, or rather observed no sensation during the storm to justify such a conclusion; yet it is possible such might have been the fact, as from the continual glare of lightning and the heavy peals of thunder, with a combination of apprehension for their personal salety, they might have had the shock of an earthquake which
