TO THE PUBLIC.

How true it is, that modern Physicians, in their mbition to excel in their profession, explore the vast fields of science by the aid of Chemistry, and seek out new remedial agents, to arrive at perfection in their practice by means of art alone, and entirely overlook and neglect, as beneath their notice, the rich and bountcous stores of incdicine, thereby given that, pursuant to an order of which the Almighty has caused to spring out of the Board of Directors of the Wilmington and the earth in every clime. AARON GILBERTS.

NEW YORK, Aug. 1835.

I deem it a duty I owe to the afflicted to state my case, and to say I am entirely cured and feel now like a new man. About nine years ago, perceived I was threatened with the piles, which gave me alarm, knowing that many of my family were similarly afflicted, and I applied to our physician who succeeded in relieving the uneasiness medies about three years. Despairing of relief in this way I applied successively to two other phygeneral terms, it is recommended in all those dis- sicians in this city, of celebrity two, practising in eases which arise from impurities in the blood, or the higher circles only, both of whom tried weeks and weeks in vain, without permanent advantage. Being astonished at the failure, as I had always been told that these were the men to apply to in such difficult cases, and I had accordingly been led to expect great things from their learning and experience-I say, astonished at the perfect failure,] gave myself up to the painful thought that there was no virtue in medicine for me, nor no skill in the profession equal to such chronic difficulties. It this predicament I got some eight or nine bottles of the Indian's Panacea, which I took as directed and am now happy to state that in about six weeks I am cured of an inveterate attack of blind piles, to which was probably added an erysipelatous swelling of the part. I trust that the cure is complete; but if it should not be so, I now know what will alleviate more suffering than all other medicines put together.

the constitution by a slow and sure destruction. The greater congeniality, efficiency and safety of vegetable remedies compared with mineral may be estimated by contrastiing the ancient practice with the modern; or, to bring it more immediately under our own observation, the Indian practice with that of the white man. Who, in America, has not known or heard of repeated instances wherein some decrepid, unpretending female Indian, by means of her simple remedies alone, has effected the most rapid and astonishing cures, after the whole Materia Medica of the common practice, directed in the most skilful manner, has failed? And who has not been surprised at beholding the comparative ease and facility with which the Indians frees himself from any disease, and die. I had a great deal of pain in my side; and

mong them? Who has ever heard of an Indian with a constitution broken and ruined by ill-treatment? And can a doubt exist, that this happy the flesh of civilized man is heir to, is chiefly owing to the more genial andisafe remedies which he amploys? This astonishing difference in success, is a fair exemplification of the infinite euperiority of the simple and safe means of cure which deed, if any medicine can cure the consumption. God has created for the benefit of his children, over those which the pride and the art of man have invented.

From a long residence among a portion of the aborigital inhabitants of his country, and intimate acquaintance with the methods of cure some of their most successful practitioners, the proprietor of "The Indian's Panacea," acquired a knowledge of some of their most powerful and favorite remedies. From these he selected such as were most efficacious and appropriate, and after various experiments to their principles and strength, he has combined them in the form here presented, as the most perfect and beneficial for the purpose

The proprietor offers this preparation to the pubic with the consciousness that he is placing within its reach a remedy capable of relieving many of his afflicted fellow beings, who are suffering under the various chronic and obstinate complaints to which it is applicable. To such, it will prove of incalculable value, as the means and in many cases, the only means of relieving their sufferings, and restoring them once more to health and happiness. The value of this Panacea, is most conspicuous in those long standing and obstinate syphilitic and scrofulous affections which have defied all other remedies, and particularly in those cases where mercury has been so lavishly used as to cause distressing pains in the bones, nodes, mercurial ul-cers, derangement of the digestive organs, &c.-These it completely removes, and in all cases i entirely eradicates the disease and the effects of mercury, renovates the constitution, and leaves the patient sound and well. The proprietors of this article have received many proofs of its value on plantations. The negro who is subject to any diseases peculiar to him, or peculiar to his exposing employment, feels most readily in its healing influence, Rheumatism, debility swellings, loss of appetite. and the nameless evils he complains of, may all be removed by the use of a few bottles of The Indian's Panacea. Many a useful servant has been restored by its effects; and it is confidently recomded to the Planter as a safe and invaluable medicine.
