TO THE PUBLIC.

How true it is, that modern Physicians, in their bition to excel in their profession, explore the ast fields of science by the aid of Chemistry, and seek out new remedial agents, to arrive at perfection in their practice by means of art alone, and entirely overlook and neglect, as beneath their notice, the rich and bounteous stores of medicine, Board of Directors of the Wilmington and the earth in every clime. And how much more other medicines put together. th Rail Road Company, a fifth Instalment, true it is that the American Physician looks to Dollars on the Share, will be required of foreign countries for many of his most common tockholders on or before the first day of and necessary articles, perpetually changing as they are, at the dictate of fashion and folly, he is surrounded in his ow profusion of medical their healing on the desert air."

tice with that of the white man. Who, in Ameri- remedy for Abscesses, Soars, &c. ca, has not known or heard of repeated instances wherein some decrepid, unpretending female Indian, by means of her simple remedies alone, has effected the most rapid and astonishing cures, after the whole Materia Medica of the common practice, directed in the most skilful manner, has failed? And who has not been surprised at beholding the comparative case and facility with which the Indians frees himself from any disease, and at the almost total absence of chronic diseases among them? . Who has ever heard of an Indian with a constitution broken and ruined by ill-treatment? And can a doubt exist, that this happy exemption of the savage from most of the ills which the flesh of civilized man is heir to, is chiefly owing to the more genial andisafe remedies which he amploys? This astonishing difference in sucess, is a fair exemplification of the infinite cupejority of the simple and safe means of cure which God has created for the benefit of his children, over those which the pride and the art of man have

From a long residence among a portion of the aborigital inhabitants of his country, and intimute of "The Indian's Panacea," acquired a knowremedies. From these he selected such as were the nameless evils he complains of, may all be most efficacious and appropriate, and after vari- removed by the use of a few bottles of The Indian's ous experiments to their principles and strength, Panacea. Many a useful servant has been reshe has combined them in the form here presented, as the most perfect and beneficial for the purpose for which it is recommended.

The proprietor offers this preparation to the pubic with the consciousness that he is placing within its reach a remedy capable of relieving many of his afflicted fellow beings, who are suffering under the various chronic and obstinate complaints to which it is applicable. To such, it will prove of incalculable value, as the means and in many cases, the only means of relieving their sufferings. and restoring them once more to health and happiness. This is not offered as a common remedy, that may per-chance be equally good with many others now in use, but as one which is capable of saving life in many extreme cases, when all the usual remedies fail. This it has done repeatedly; and this is the reputation it has obtained wherever

It is only a few years since this preparation was first presented to the public, but in that time some thousands of persons might be found, who would solemnly declare that they believed their lives were saved by it, and in many cases after they had tried most and perhaps all the common remedies in vain. Wherever it is known it is rapidly coming into use, and this affords the most substantial and convincing proof of the merits.

The value of this Panacea, is most conspicuous in those long standing and obstinate syphilitic and scrofulous affections which have defied all other remedies, and particularly in those cases where mercury has been so lavishly used as to cause distressing pains in the bones, nodes, mercurial ulcers, derangement of the digestive organs, &c .-These it completely removes, and in all cases i entirely cradicates the disease and the effects of mercury, renovates the constitution, and leaves the Quarter Sessions of Bladen | patient sound and well. In Rheumatism and ulpatient sound and well. In Kheumatism and ul-cerated sore throat, its happy effects are not less. In this State, five bottles of the Indian's Panacea apparent, giving almost immediate relief.

Taken in proper doses, the Indian's Panacea operates as an alterative and detergent; a diaphoretic, diuretic and laxative; an anti-spasmodic and anodyne; and in proper cases, as a stomachic and emmenagogue. Generally expressed, it increases all the secretions and excretions, gives tone to the stomach, and excites action in the glambs in a particular manner. From these principles Per Schr. Mary Caroline from Tyril Co., N. C. its operation may be understood.

This medicine has been found highly useful in many ambiguous diseases not here specified, and it has been used with wonderful success as a spring and fall purifier, by those who are subject to various complaints, and whose constitutions require invigorating. Such persons will do well to use two or three bottles in small doses, whenever a diet drink is considered necessary, this Panacea, taken in small doses, will answer all its purposes, in much less time, at less expense, and in a far more agreeable manner, than the common diet

The following certificates, out of hundreds similar which might be procured, are given as to the effects of the Indian's Panacea, in the various complaints therein mentioned; and also to exhibit in the most satisfactory manner, its superiority over the syrups in common use:-

COLUMBIA, Ala. 1833.

JOHN M'MULLEN.

Thave been afflicted with the Liver-complaint far many years, which has made life a burthen for some time; and notwithstanding the quantities of medicine I took, and the most untiring attention of our plantation doctor, it seemed as if I should die. I had a great deal of pain in my side; and in January last I took a ball cold from which time I had a bad cough and a piercing pain through the chest, which added to my previous debility, brought me down very fast; and every body said I would have the consumption, and the doctor gave me up after doing every thing that doctors can do. The Indian medicine, called The Panacea, was got by my request, four bottles of which completely restored me to better health than for years before. Indeed, if any medicine can cure the consumption, it is The Indian's Panacea.

MARY COLES.

must be lost upon us, if we are content to trust alone to the peculiar advantages we happen to possess. Position, climate, ont the bounteous resources, that nature ha scattered with so liberal a hand, even the diffused intelligence and elevated character of our people, will avail us nothing, if we fail sacredly to uphold those political institutions, that were wisely and deliberately formed, with reference to every circumstance that could preserve, or might endanger, the blessing we enjoy. The thoughtful framers of our Constitution lcgislated for our country as they found it. Looking upon it with the eyes of states. men and patriots, they saw all the sources of rapid and wonderful prosperity; but they saw also, that vacious habits, opinions, and institutions, peculiar to the various portions of so vast a region, were deeply fixed Distinct sovereigntes were in actual existence, whose cordial union was essential to the welfare and happiness of all. Between many of them there was, at least to some extent, a real diversity of interest, liable to be exaggerated through sinister designs; they differed in size, in population, in wealth, and in actual and prospective resources and power; they varied in the character of their industry and staple productions; and in some existed domestic institutions, which, unwisely disturbed, might endanger the were all these circumstances weighed, Wherever Love and Friendship now are greeting, and the foundations of the new Government laid upon principles of reciprocal concession, and equitable compromise. Then would Ambition lose each sounding name, The jealousies which the smaller States might entertain of the power of the rest, were allayed by a rule of representation, confessedly unequal at the time, and designed forever to remain so. A natural fear that the broad scope of general legislation might bear upon, and unwisely controul particular interests, was counteracted by limits, strictly drawn around the action of the federal authority; and to the people and the States was left unimpaired their sovereign power over the innumerable subjects embraced in the internal government of a just republic, excepting only such as necessarily appertain to the concerns of the whole confederacy, or its Fellow Citizens,-The practice of all my intercourse as a united community, with
