THE INDIAN'S PANACEA.

FOR the cure of Rheumatism, Scrofula, or Kings Evil, Gout, Sciaticia or Hip Gout, Ineipient Cancers, Salt Rheum, Syphilitic and Mercurial diseases particularly Ulcers and painful affection of the bones, Ulcerated Throat and Nostrils; Ulcers of every description, Fever Sores, and Internal Abscesses; Fistulas, Scal Head, Scurvey, Biles, Chronic Sore Eyes, Erysipelas, Blotches, and every variety of Cutaneous Affection; Chronic Catarch, Headache, from particular causes; Pain in the Stomach and Dyspepsia, procooling from vitation; Affections of the Liver, Chronic Inflamation of the Liver, Chronic Inflamation of the Kidneps, and general Debility, caused by a torpid action of the vessels of the skin. It is singularly efficacious in renovating those constitutions which have been broken down by injudicious treatments or juvenile irregularities. In general terms, it is recommended in all those diseases which arise from impurities in the blood, or

vitiation of the humors, of whatever name or kind. Some of the above complaints may require some trifling assistant applications, which the circumstances of the case will dictate; but for a general remedy or Purificator, to remove the cause, the ering was formed in the cavity between the cars Indian's Pinacea will generally be found suffi- discharging prodigiously and from the renewed

TO THE PUBLIC.

How true it is, that modern Physicians, in their ambition to excel in their profession, explore the vast fields of science by the aid of Chemistry, and seek out new remedial agents, to arrive at perfection in their practice by means of art alone, and entirely overlook and neglect, as beneath their notice, the rich and bounteous stores of medicine, which the Almighty has caused to spring out of the earth in every clime. And how much more true it is that the American Physician looks to foreign countries for many of his most common and necessary articles, perpetually changing as they are, at the dictate of fashion and folly, he is surrounded in his own country with an endless profusion of medical plants, sufficient to answer any indication in disease, and yet he is ignorant of their virtues, and they are suffered to "waste their healing on the desert air."

The effects of vegetable medicines upon the sys tem are temporary-those of minerals lasting .-The former exert their effects and pass off-the latter, mercury in particular, act chemically upon the solids, decomposing the bones, and underminthe constitution by a slow and sure destruction.

The greater congeniality, efficiency and safety of vegetable remedies compared with mineral, may be estimated by contrasting the ancient pracice with the modern; or, to bring it more immed ately under our own observation, the Indian practies with that of the white man. Who, in America, has not known or heard of repeated instances wherein some decrepid, impretending female Indian, by means of her simple remedies alone, has effected the most rapid and astonishing cures, atter the whole Materia Medica of the common practice, directed in the most skilful manner, has failthe flesh of civilized man is herr to, is chiefly ow- | cinc. ing to the more gental andisafe remedies which he amploys? This astonishing difference in success, is a fair exemplification of the infinite cuperiority of the simple and safe means of cure which God has created for the benefit of his children. over those which the pride and the art of man have

From a long residence among a portion of the aborigital inhabitants of his country, and intimate acquaintance with the methods of cure some of their most succe sful practitioners, the proprietor of "The Indian's Panacea," acquired a knowledge of some of their most powerful and favorite remedies. From these he selected such as were most efficacious and appropriate, and after various experiments to their principles and strength, he has combined them in the form here presented, out relief from any. In this State, I had given Balm, 72 bottles, and sold 26, which have given as the most perfect and beneficial for the purpose up myself as incureable, and made up my mind for which it is recommended.

lie with the consciousness that he is placing within its reach a remedy capable of relieving many of his afflicted fellow beings, who are suffering under the various chronic and obstinate complaints to which it is applicable. To such, it will prove of incalculable value, as the means and in many cases, the only means of relieving their sufferings, and restoring them once more to health and happiness. This is not offered as a common remedy that may per-chance be equally good with many others now in use, but as one wheih is capable of saving life in many extreme cases, when all the usual remedies fail. This it has done repeatedly; and this is the reputation it has obtained wherever it has been introduced.

It is only a few years since this preparation was first presented to the public, but in that time some thousands of persons might be found, who would solemnly declare that they believed their lives were saved by it, and in many cases after they had tried most and perhaps all the common remedies in vain. Wherever it is known it is apidly coming into use, and this affords the most substantial and convincing proof of the merits.

The value of this Panacea, is most conspicuous in those long standing and obstinate syphilitic and scrofulous affections which have defied all other remedies, and particularly in those cases where mercury has been so lavishly used as to cause distressing pains in the bones, nodes, mercurial ulcers, derangement of the digestive organs, &c .-These it completely removes, and in all cases it entirely cradicates the discuse and the effects of mercury, renovates the constitution, and leaves the reach of those suffering and likely to suffer, with patient sound and well. In Rheumatism and ulapparent, giving almost immediate relief.

Taken in proper doses, the Indian's Panacea operates ar an alterative and detergent; a diaphoretic, diuretic and laxative; an anti-spasmodcand anodyne; and in proper cases, as a stomachic and emmenagogue. Generally expressed, it increases all the secretions and excretions, gives tone to the stomach, and excites action in the glands its operation may be understood.

This medicine has been found highly useful in many ambiguous diseases not here specified, and has been used with wonderful success as a spring and fall purifier, by those who are subject to various complaints, and whose constitutions require invigorating. Such persons will do well to use two or three bottles in small doses, whenever a diet drink is considered necessary, this Panacea, taken in small coses, will answer all its purposes, in much less time, at less expense, and in a far

lar which might be procured, are given as to the cording to the directions on the bottle. Persons e lects of the Indian's Panacea, in the various complaints therein mentioned; and also to exhibit in the most satisfactory manner, its superiority over the syrups in common use:--

Boston, April 1834. Sir-When I was a young man I followed the Aishing trade, and from peculiar exposure at that time, I have had pains about me at intervals, which have since increased to a regular and severe Rheumatism: You know, I saw you in Charleston very bad off and told you I had heard of the surprising qualities of The Indians Panacea, when you told me where to get it. Well, I got six bottles which have cured me for seven or eight months, and from being free from pain so long, although exposed, I believe my case a cured one, and write this to say so.

AARON GILBERTS.

NEW YORK, Aug. 1835. I deem it a duty I owe to the afflicted to state now like a new man. About nine years ago, perceived I was threatened with the piles, which cisians in this city, of celebrity two, practising in reputation, Since a remedy has been discovered

the higher circles only both of whom tried weeks for a disease so general and so excruciating and weeks in vain, without permanent advantage.
Being astonished at the failure, as I had always been told that these were the men to apply to in sions made for man, in all his afflictie. such difficult cases, and I had accordingly been led to expect great things from their learning and experience-I say, astonished at the perfect failure, I gave myself up to the painful thought that there was no virtue in medicine for me, nor no skill in the profession equal to such chronic difficulties. In this predicament I got some eight or nine bettles of the Indian's Panacea, which I took as directed and am now happy to state that in about six weeks I am cured of an inveterate attack of blind piles, to which was probably added an crysipelatous swelling of the part. I trust that the cure is complete; but if it should not be so, I now know what will alleviate more suffering than all other medicines put together.

H. G. D.

NEW ORLEANS, May 1834. I have had a disase in my head which more recently becam a very painful and alarming in con-sequence of taking cold repeatedly. A large gathaccumulation at times, it seemed as if my head would burst, when the running would increase a the ears, and would also appear at the nose and eyes. I applied to the best physicians but found no permanent relief; I also tried Swaim's Panacea, but found it useless. By request of a friend, I tried The Indian's Pauacea which soon gave me relief; and after taking twelve bottles, 1 was made as well as ever. The opinion of one so much indebted to it, may be of little weight; but the reputation this Panacea has earned in this vicinity, will give it the preference over any other remedy for Abscesses, Soars, &c.

JOHN M'MULLEN. COLUMBIA, Ala. 1833.

I have been afflicted with the Liver-complaint for many years, which has made life a burthen for some time; and not withstanding the quantities of medicine I took, and the most untiring attention of our plantation doctor, it seemed as if I should I had a great deal of pain in my side; and in January last I took a bad cold from which time

I had a bad cough and a piercing pain through the chest, which added to my previous debility, brought me down very fast; and every body said I would have the consumption, and the doctor gave me up after doing every thing that doctors can do. The Indian medicine, called The Panacea, was got by my request, four bottles of which completely restored me to better health than for years before. Indeed, if any medicine can cure the consumption, it is The Indian's Panacea

MARY COLES.

ST. AUGUSTINE, (E. F.) July, 1836 D. G. Haviland & Co. Agents I am included to write, to inform you of the happy results I have experienced-from taking the Indian's Panacea. For the last ten years I have been groce. Yours, with respect, severely afficted with the Rheumatism in both legs, and sores covering a large proportion of the body; and during this time I have tried most every thing that I heard recommended, but withto drag out my life in excruciating pain, for I can demand here. Your, respectfully, DAVIS & PHILLIPS. The proprietor offers this preparation to the pub- safety say that I had not known a day, in that time, during which I had been free from pain, and most of the time I was in the gre est agony. was in this fix when in your City, at which time I bought a dozen bottles of your Panacea. which I took as directed in the paper, and am now happy to state to you, and to the community, that I dy for Tooth-ache) should be used before inflato this invaluable Medicine atone.

Yours, very respectfully, T. H. POWERS.

CHARLESTON, July 12, 1831. I was afficted for years with an ulcer in the leg, occasionally accompanied with erysipeletous inflamation and excessive pain in the leg and ancly joint. Several eminent Physicians exerted their skill upon it, but without permanent benefit. In this State, five bottles of the Indian's Panacea

made a perfect cure.

MARGRET A. WEST. And is now for sale, by Robert Simpson. Wilmington November, 18th, 1836. t-f.

MONTAGUE'S BALM.

AN INDIAN REMEDY FOR THE TOOTH ACHE HE established reputation and constantly increasing demandfor this effectual remedy of pain and preservative of the Teeth, has induced the subscriber to offer it to the American public. Arrangements have been made to supply Agents in all the principal Cities and Towns of the United States, so as to place it within the the most harrassing of all aches (Tooth-ache.) cerated sore throat, its happy effects are not less when applied according to directions given on the bottle, it has never failed to afford immediate and permanent relief. It also arrests the decay in defective teeth, and relieves that soreness ! which so frequently renders a strong tooth use-

The application and remedy are simple, innocent, and not unpleasant; and the large number of persons in various sections of the country, in a particular manner. From these principles who have already experienced such delightful and salutary benefits from the use of the Balm, are ready to bear (for the public good) their testimony to its unrivalled qualities. It is an Indian remedy, obtained singularly and unexpectedly, and may be regarded by the civilized world, as the most remarkable discovery of the Red Man of

It has bren ascertained that the best way to use Montague's Balm for the Teeth, is to wet a piece of cotton, and put it in the cavity of the tooth, particularly when the gums have become more agreeable manner, than the common diet at all inflamed from the pain. Nineteen cases out of twenty have been relieved in this way. The following certificates, out of hundreds simi- When there is no inflamation, it may be used acthat have defective teeth, should use a bottle with the tooth-brush. It will restore health to the gums, and cause them to unite more closely to the teeth, (by its peculiar astringent qualities.) Persons whose teeth are predisposed to become loose, will be surprised to find how soon they become firm in their places, by the proper use of

one bottle. The cause of decay in Teeth is the depositing small particles of masticated food (either animal of vegetable) in the indentations of the Teeth, or between them, which there remain until decay of this food takes place, the acidity of which decomposes the Tooth. The great difficulty of all that have written treatises on the Teeth, has been, to recommend a liquid, that would mix itself up with this fetid matter, so as to weaken it to such a degree, as to prevent its affecting the

This discovery (purely accidental) has not ondecay may be arrested; but its application to an aching tooth (when the nerve can be reached) my case, and to say I am entirely cured and feel affords almost instantaneous relief. And if its use is continued until the bottle is consumed, none need apprehend pain from the same tooth. It gave me marm, knowing that many of my family may be remarked, that the Teeth are as subject were similarly afflicted, and I applied to our phy- to ache, as any other bone of the system, and in sierun who succeeded in relieving the uneasiness the same way. But for Tooth-ache proper, a but could never cure, although administering re-medies about three years. Despairing of relief in come the wonder, as well as the admiration, of this way I applied successively to two other phy every one that has become acquainted with its

fully satisfied, that the earth is supply with remedy at, hand for every disease, where

cause may be traced. This is in perfect accordance with all that been done for deprayed and diseased map his Creator. It is so with our necessiti wherever we are, there are supplies is such for all our needed wants. And it is our fortune, if not our crime, that more attend in has not been paid to the discoveries of the mesures, that are upon, or just beneath the surface of the eart. It will ever be remembered, (and should with gratitude) that the most valuable presents against the most formidable and affires, have been discovered by accident es, have been discovered by accident

stance, the small-pox. What science in medicine could ever have discovered a preventiveagainst that scourge of nations, like the vaccine matter? That remedy (its value above all price) was left to be introduced by an humble milkmaid; and the day is at had, when muny other treasures of equal value are to be brought to light; and that, not by the power or might, but

possibly by the most unpretending in science. Persons taking medicine with a view to salavation, should, by all means, use at least a bottle of the Balm with the tooth-brush (applying it three or four times a day) as an astringent, in order to have the gums in a healthy state, for the protection of the Teeth. After mercural action, it should be used freely, to cause the gums to adheare at once to the teeth-to guard against looseness, and falling out. Indeed, it is the best wash for the mouth, during salivation, that can be used. If too strong at first, add a small portion of

It is with peculiar pleasure that the proprietor hears of the good already done, while he contemplates the relief yet to be afforded by this widely spreading remedy. He regrets, however, that he has not been able to supply the demand The preparations, though large, were not based on its sudden and unexpected popularity. The demand has surpassed all calculation; but arrangements are now making, which will enable

all applicants to get a supply as it is ordered. A few extracts of letters are published in place of the numerous certificates that might be, as they occupy less space, are less expensive, and inspire the public with equal confidence.

I plugged a tooth for a lady in Petersburg,

which, from its very sensitive condition, I was unable to shape the cavity so as to retain the plug; after two or three tria's, I recommended the use of Montague's Balm, which so deadened hesurface of the cavity, as to enable me to shape it perfectly, and plug the tooth permanently. S. M. SHEPHERD, Dentist.

Millon, North Carollna. Say to friend Montague, that 31 or 2 bottles Balm are now sold, and that it is becoming known N. B. SEABROOK.

The article seems to be thought efficaclous in healing soreness of the teeth, and arresting or preventing decay.

Richmond, November. Dear Sir: You will send us, immediately a box of your Balm. We have not had a bottle since we last wrote you, and have daily applica-EUSTACE & TEMPLE.

Newark, N. J., Dec. 16th, 1835. Dear Sir: As soon as you possibly can send me some of your Balm, do so. Send nie at least two JACOB VAN WAGENEN.

Liberty, Va., Feb. 1836. N. B. We have just received a box of your general satisfaction. It is likely to be in great

LITERARY UNION; LADY'S BOOK AND

Wilmington, Oct. 28, 1836.

THOMAS SMITH

LADIES AMERICAN MAGA.

HE Proprietor of the Lady's Book, grateful for the unceasing patronage which he has received, announces to the Ladies who have so generously sustained their "own Book," that he has made new arrangements for their gratification. Convinced that he could not in any way more effectually promote the interests, or realize the wishes of his numerous subscribers, he has secured the valuable aid of

MRS. SARAH J. HALE.

of Boston, to whose superintendance the literary departments of the Lady's Book will herenfter be committed. For many years Mrs. Hale has conducted the American Ladies' Magazine-a periodical of uncommon merit, which will be merged in the Lady's Book. Her abilities are familiar to her country women, and on both sides of the Atlantic she enjoys a high reputation as one of the most graceful, vigorous, and accomplished of our

female writers. Under the judicious management of Mrs. Hale, the Lady's Book will not only maintain the excellent character it has already acquired, but it is confidently expected that it will be rendered more eminently worthy of the support of those to whose interests and amusement it has been, and will continue to be, especially devoted. The superior talents and fine taste of the Editor will give the work a new impulse: while her own contributions, and those received from her personal friends, and other correspondents, of whom a number have already promised, will render it almost entirely original Amongst others who are expected to furnish matter for the Book may be mentioned, Mrs. Sarah J. Hale, Editor, Mrs. L. H. Sigourney, Mrs. Ann S. Stephens, Mrs. Caroline Lee Hentz, Mrs. E. F. Ellett, Miss H. F. Gould, Miss Leslie, Miss C. E. Gouch, Miss L. H. Medina, R. S. Mackenzie, L. L. D., Joseph R. Chandler, Morton McMicheal, Robert T. Conrad, Alexander Dimity, A. M., H. E. Hale, E. Burke Fisher, N. C. Brooks, A. M., Wni. E. Burton, Willis Gaylord Clark, Joseph C. Neal, B. B. Thatcher, R. Penn Smith.

The Proprietor of the Lady's Book is determined to use every means to maintain the superiority which his publication has obtained. For years he has gone steadily on in the course of improve-ment, and he flatters himself that his facilities are such as to give his work eminent advantages over his competitors. His very ample subscription listenables him to be liberal in his expenditures upon it, and whatever can be accomplished by emerprize and cost he is resolved to effect Besides the persons above-mentioned as contributors, he has expectations of receiving original articles from several distinguished female writers in Europe: and as ar. inducement to writers of our own country, he is willing to pay for every article adop-ted by him as suitable to his publication, as high a rate of remuneration as will be given by the proprietors of any other periodical in the United

States. The mechanical portion of the Lady's Book will likewise be improved. The typography will be more elegant, and the paper of a better quality; During the year portraits, engraved on steel, of several eminent ladies will be given: and every second month a coloured plate, illustrating the prevailing fashion, will be furnished. Other embellishmenis, calculated to enhance the appearance and increase the value of the work, will be introduced: and generally, everything will be done that the untiring purpose of making the Lady's Book pre-eminently entitled to patronage can suggest. With the experience he has acquired during a long course of years devoted to the business, and the aid to be derived from the distin-guished lady who will henceforth be associated with him, the Publisher is confident that he will be able to render the amplest satisfaction to all who may become his patrons. He therefore, with a just reliance on his claims to support, respectfully solicits a continuance of that liberal encouragement which has so kindly been bestowed on his endeavours.

The terms of the Lrdy's Book are Three Dollars per annum, payable in advance; All orders must be addressed to

L. A. GODEY. 100 Walnut Street. As the publisher of the Ladys Book is connected with other popular periodicals, he suggests, for the convenience of remittance, the following

system of CLUBBING.

Lady's Book and Bulwer's Novels, for \$5-Bulwer's and Marryan's Novels, 17 is all, 55—Bulwer's or Marryan's Novels and Saturday News, for 35—Lady's Book, Saturday News, and Sketch Book, for \$5—Lady's Book, Gelebrated Trials, and Sketch Book, for \$5—Bulwer's or Marryatt's Novels, Celebrated Trials, and Sketch

Book, for \$5. SIR WALTER SCOTTS NOVELS.

A premium of all the Novels by this celebrated Also Lessons in Practical Writing and Stenography will be given to Young Ladies between the hours of 12 M. and 2 P. M. having qualified the Lady's Book, free of postage: or one half of the Novels for five subscribers, and the cash,
