

SCRAPS.
Immensity of Creation.—Some astronomers have computed that there are no fewer than seventy five millions of suns in the universe. The fixed stars are as suns, having like our sun, numerous planets revolving round them. The solar system or that to which we belong, has about thirty planets, primary and secondary, belonging to it. The circular field of space which it occupies is in diameter about three thousand six hundred millions of miles, and that which it controls much greater. The sun, which is the nearest neighbor to us, is called Sirius, distant from our sun about twenty-two billions of miles. Now, if all the fixed stars are as distant from each other as Sirius is from our sun, or if our solar system be the average magnitude of all the systems of the seventy-five millions of suns, whose imagination can grasp the immensity of creation? Who can survey a planet, containing seventy-five millions of circular fields, each ten billions of miles in diameter?—Such, however, is one of the plantations of Him, who has measured the waters in the hollow of his hand—meted out heaven with a span—comprehended the dust of the earth in a measure and weighed the mountains in scales, and the hills in a balance.

Patent Piano—New Improvement.—We were shown a few days ago, a model of a piano, having a glass plate instead of a sounding board, and glass tubes over the strings. This is an improvement invented by Mr. D. B. Groves, Piano Manufacturer, Market street. The advantages to be derived from this improvement, is in the superior quality of glass over wood in giving or reverberating sound. The peculiar softness of the sound made from glass is familiar to all who have ever heard the exquisite tones of musical glasses. As a reflector of sound, it is believed, it may be advantageously introduced into pianos, and so far as it has been tried, it has been found to increase, as well as to give a rich mellowness to their tone.

Mr. Groves certainly deserves much credit for the unwearied endeavors he has made, to improve his pianos, and merit patronage. And if his sales are any criterion of the public judgment, he has no reason to complain that he is not duly appreciated as a manufacturer.

Indifference to Public Opinion.—“Prince Talleyrand,” says the Temps, “one day asked his Secretary for a pamphlet, which he wished to read after dinner, and the work was accordingly brought. In the evening the Prince was found asleep in his easy chair, and the pamphlet was lying open at his feet just as it had fallen from his hand. It was a violent libel against himself, which had been unable to fix his attention on the scurrility which filled its pages.”

Statistics of Education in France.—The number of pupils that attend the elementary schools of France, are—boys, 1,383,064; girls, 943,616—Total, 2,326,680. The ordinary expense of the communal schools in 1837, reached the enormous amount of 9,017,427 francs and 86 cents. The General Councils have voted for 1838, 4,000,608 francs and 99 cents.

The editor of the Baltimore Transcript announces that a wagon load of cradles was carried by his office, destined to the South.

**MOFFAT'S
 VEGETABLE
 LIFE PILLS**
 AND
PHOENIX BITTERS.
 THESE medicines have long been known and appreciated, for their extraordinary and immediate powers of restoring perfect health, to persons suffering under nearly every kind of disease to which the human frame is liable. In many hundreds of certificated instances, they have even rescued sufferers from the verge of an untimely grave, after all the desperate nostrums of the day had utterly failed; and to many thousands they have permanently cured that uniform enjoyment of health, without which life itself is but a partial blessing. So great indeed, has their efficacy invariably and infallibly proved, that it has appeared scarcely less than miraculous to those who were unacquainted with the beautifully philosophical principles upon which they are compounded, and upon which they consequently act. It works their manifest and sensible action in purifying the springs and channels of life, and ending the life with renewed tone and vigor, that they were indebted for their name, which was bestowed upon them at the spontaneous request of a series of individuals whose lives they had divinely saved.

The proprietor rejoices in the opportunity afforded by the universal diffusion of the daily press, for placing his VEGETABLE LIFE PILLS within the knowledge and reach of every individual in the community. Unlike the host of pernicious quackeries, which boast of vegetable ingredients, the Life Pills are purely and solely vegetable, and contain neither Mercury, Antimony, Arsenic, nor any other mineral, in any form whatever. They are entirely composed of extracts from rare and powerful plants, the virtues of which, though long known to several Indian tribes, and recorded in some eminent pharmaceutical chemists, are altogether unknown to the ignorant pretenders to medical science; and were never before administered in so happily efficacious a combination.

The first operation is to loosen from the coats of the stomach and bowels, the various impurities and crudities constantly settling around them; and to remove the hardened feces which collect in the convolutions of the small intestine. Other medicines only partially cleanse these, and pass such collected masses behind, as to produce constiveness, with all its train of evils, or sudden diarrhoea, with its imminent dangers. This fact is well known to all regular anatomists, who examine the human bowels after death; and hence the prejudice of these well informed men against the quick medicines of the age. The second effect of the VEGETABLE LIFE PILLS is to cleanse the kidneys and bladder, and by this means, the liver and the lungs, the healthful action of which entirely depends upon the regularity of the urinary organs. The blood, which takes its red color from the agency of the liver and the lungs before it passes into the heart, being thus purified by them, and nourished by food coming from a clean stomach, courses freely through the veins of every part of the system, and triumphantly mounts the banner of health in the blooming cheek.

The following are among the distressing variety of human diseases, to which the Vegetable Life Pills are well known to be infallible:—**DYSPEPSIA**, by thoroughly cleansing the first and second stomachs, and creating a flow of pure healthy bile, instead of the stale and acrid bile, which is the result of indigestion; **Headache, Loss of Appetite, Heartburn and Headache, Restlessness, Irritability, Anxiety, Langor, and Melancholy**, will vanish as a natural consequence of its cure. **Costiveness**, by cleansing the whole length of the intestines with a solvent process, and without violence; all violent purges leave the bowels costive within two days. **Diarrhoea and Cholera**, by removing the sharp acid fluids which irritate the membrane, and by promoting the lubricative secretion of the mucous membrane, **Fevers of all kinds**, by restoring the blood to a regular circulation, through the process of perspiration in some cases, and through a solution of intestinal obstructions in others. The Life Pills have been known to cure Rheumatism permanently in three weeks, and the Gout in that time, by removing all inflammation from the muscles and ligaments of the joints. **Dropsies of all kinds**, by freeing and strengthening the kidneys and bladder, they operate most delightfully on these important organs, and hence have ever been found a certain remedy for the worst cases of Gravel. Also, **Worms**, by dislodging from the turnings of the bowels the slimy matter to which these creatures adhere, **Asthma** and **Croup**, by relieving the air vessels of the lungs from the mucus, which ever slight colds will occasion, which if not removed becomes hardened and produces those dreadful diseases **Scars, Ulcers and inveterate Sores**, by the perfect purity which these Life Pills give to the blood, and all the humors, **Scorbutic Eruptions and bad Complexions**, by their alterative effects upon the blood, which feeds the skin, the morbid state of which occasions all **Eruptive complaints, Saltiness, Cloudy, and other disagreeable Complexions**. The use of these Pills for a short time will effect an entire cure of **Salt Rheum, Erysipelas**, and a striking improvement in the **Clearness of the Skin. Common Colds and Influenza** will always be cured by one dose, or by two, even in the worst cases. **Furuncles**, or **boils**, for the most obstinate and obstinate malady, the Vegetable Life Pills deserve a distinct and emphatic recommendation. It is well known to hundreds in this city, that the proprietor of these invaluable Pills was himself afflicted with this complaint for upwards of thirty five years, and that he tried in vain every remedy prescribed within the whole compass of the Materia Medica. He however, at length tried these medicines, which he now offers to the public, and he was cured in a very short time, after his recovery had been pronounced not only impossible, but absolutely impossible by any human means.

DIRECTIONS FOR USE.—The Proprietor of the VEGETABLE LIFE PILLS does not follow the base and mercenary practice of the quacks of the day, in advising persons to take his pills in large quantities. No good medicine can possibly be so required. These Pills are to be taken at bedtime every night, for a week or fortnight, according to the obstinacy of the disease. The usual dose is from two to five, according to the constitution of the person. Very delicate persons should begin with but two, and increase as the nature of the case may require. Those more robust, or of very costive habit, may begin with three, and increase to four, or even five pills, and the effect will be a sufficiently rapid change to guide the patient in their further use. These Pills sometimes occasion sickness and vomiting, though very seldom, unless the stomach is very foul. This, however may be considered a favorable symptom, as the patient will find himself at once relieved, and by perspiration will soon recover. They usually operate within 10 or 12 hours, and never give pain, unless the bowels are very much encumbered. They may be taken by the most delicate females under any circumstances. It is, however, recommended that those in later periods of pregnancy should take but one at a time, and thus continue to keep the bowels open; and even two may be taken where the patient is very costive. One pill in a solution of two table spoonfuls of water, may be given to an infant in the following dose—a tea spoonful every two hours till it operates; for a child from one to five years of age half a pill—and from five to ten, one pill.

THE PHOENIX BITTERS are so called because they possess the power of restoring the expiring embers of health, to a glowing vigor throughout the constitution, as the Phoenix is said to be restored to life from the ashes of its own destruction. The Phoenix Bitters are of entirely vegetable, composed of roots found only in certain parts of the western country, which will infallibly cure **FEVERS AND AGUES** of all kinds; will never fail to eradicate entirely all the effects of Mercury infusely sooner than the most powerful preparations of Sarsaparilla, and will infallibly cure the determination of **BLOOD TO THE HEAD**; never fail in the **itchiness of the skin to young females**; and will be found a certain remedy in all cases of nervous debility.

PHOENIX BITTERS.
 THESE medicines have long been known and appreciated, for their extraordinary and immediate powers of restoring perfect health, to persons suffering under nearly every kind of disease to which the human frame is liable. In many hundreds of certificated instances, they have even rescued sufferers from the verge of an untimely grave, after all the desperate nostrums of the day had utterly failed; and to many thousands they have permanently cured that uniform enjoyment of health, without which life itself is but a partial blessing. So great indeed, has their efficacy invariably and infallibly proved, that it has appeared scarcely less than miraculous to those who were unacquainted with the beautifully philosophical principles upon which they are compounded, and upon which they consequently act. It works their manifest and sensible action in purifying the springs and channels of life, and ending the life with renewed tone and vigor, that they were indebted for their name, which was bestowed upon them at the spontaneous request of a series of individuals whose lives they had divinely saved.

DR. ROBERT F. PURNELL.
 HAS located himself in Wilmington, with a view of pursuing the practice of his profession, in its various branches, and hopes, by undivided attention, to merit a share of patronage. He may at all times be found at the store under the Railroad office, unless professionally engaged. The poor will receive attention gratis.

**ASSORTMENT OF
 Drugs and Medicines,
 Paints, Oils, Dyestuffs,
 &c. &c.**
 which may at all times be procured at his DRUG STORE, between the Court House and the Market. Country merchants and physicians, who are in the habit of sending their orders to the northern cities to be filled, will find it to their advantage to purchase here; for the subscriber feels confident that he can supply them on as good, if not better terms. The following is a catalogue in part.

**L. W. GLENN'S
 Saponaceous Compound.
 FOR SHAVING.**
 THE subscriber offers this SOAP, in perfect confidence, as being equal, if not superior, to any shaving Soap ever offered to the public. The smallest quantity on the brush, with warm or cold water, forms on the face a rich, permanent, and emollient lather, entirely free from any thing stimulant, and leaving the face soft and pleasant. It is neatly done up in white covered jars, answering all the purposes of a shaving box.

**ROMAN KALYDOR,
 FOR BEAUTIFYING THE COMPLEXION.**
 There is no enemy to personal beauty more annoying than Pimples, Freckles, and the various other affections of the skin, which so frequently attend upon early life. To find a remedy for them, has been a matter of considerable trouble, but has been happily accomplished by the production of this Kalydor, which will without fail, remove the most obstinate Pimples, Freckles, Tan, Sunburn, and other temporary cutaneous affections, and give that desideratum to those who, with Lord Chesterfield, think a good appearance a letter of recommendation on all occasions.

NICHOL'S FRECKLE WASH.
 This is a certain remedy not only for Freckles but for Tan, Sunburn, Pimples, Redness of the face, and other temporary cutaneous affections—even for Tetter, it has been found an excellent cure. The sale of this article has constantly increased, and will continue to increase as its merits are made known. Numerous instances of its great efficacy have come under the proprietor's notice, and he has no hesitation in recommending it to the public as an excellent article.

**L. W. GLENN'S
 AROMATIC ROSE TOOTH PASTE.**
 This preparation is made from the same receipt as the celebrated "Opiate pearle dentis," "Cherry Paste"—articles in great repute in Europe, for giving a pearly whiteness to the teeth, stopping the progress of decay, hardening the gums, and sweetening the breath—so innocent is it, that it may be used without the least caution.

INDIAN HAIR DYE.
 For coloring Red, Light, or Grey hair a beautiful Brown or jet Black in eight or ten hours, without staining the skin, or injuring the texture of the hair in the least. This important discovery is of exceeding value to those who have become prematurely grey, or those wishing to change the color of their hair. The Indian Dye is warranted, in one application, and with very little trouble, to color the hair a permanent Brown, or jet Black, as may be desired. Gentlemen's whiskers die with equal facility.

**L. W. GLENN'S
 INDIAN HAIR OIL.**
 This elegant article has the peculiar quality of gradually changing the color of the hair, from Red or Light, to a Brown or Black, and prevent the hair from turning grey. It also gives a fine gloss to the hair, softens and improves the general appearance, keeps it from coming out, and restores it when lost. Being very pleasantly perfumed, it will be found admirable for dressing the hair in general, for which purpose it is extensively used.

PERSIAN SCENT BAG.
 For laying in drawers, wardrobes, trunks, &c. communicating to every thing around them a delightful perfume, and effectually preventing the ravages of the moth. This combination of odoriferous flowers is neatly done up in satin bags of various colors, and forms an acceptable present to a female friend.

**HADLOCK'S
 Vegetable Powder and
 Syrup.**
 For Diseases of the Lungs, Liver Com-
 plaints, Dyspepsia, Coughs, Colds, &c.
 THE operation of this Medicine is par-
 ticularly mild and safe. It promotes a gentle
 and healthful perspiration, and checks morbid
 and pernicious sweating; relieves chronic affec-
 tions and congestions of the lungs; assuages
 cough; promotes a free and mild expectoration;
 removes pains from the chest; relieves asthmatic
 or difficult respiration; corrects obstinate costive-
 ness, and leaves the bowels in a regular and
 healthy state. Those painful symptoms which
 indicate diseased lungs, or a dry, tickling
 cough, when seasonably resorted to, and
 restores the patient to the bodily vigor which that
 wasting disorder, the consumption, if left to
 its natural operation, so surely destroys.

TO THE PUBLIC.
 We have had frequent opportunities of con-
 versing with our acquaintances at the south,
 who have used Hadlock's VEGETABLE ME-
 DICINE, many of whose names are attached to
 this certificate, and from our knowledge of their
 respectability, and the benefits which they ap-
 peared to have derived from its use, we have in-
 hesitation in expressing our belief that it is a
 valuable Medicine for the purpose for which it
 is offered to the public, and as such we cheerfully
 recommend it.

THOMAS P. HUNT,
 Late Pastor of the Presbyterian
 Church, Wilmington, N. C.
 H. A. ROWLAND, N. Y.
 Pastor of the Pearly Street Church, N. Y.
 The efficacy of this Medicine has been fully
 tested, that a list of certificates (which might be
 published) is deemed unnecessary. It may be
 obtained of the subscriber.

**JOHN R. ROWLAND & COMPANY'S
 WHOLESALE
 Drug and Medicine Store.**
 No. 240, Market Street, Philadelphia.
 John R. Rowland, M. D.
 James M. Henry, Jun.
 The senior partner of this firm, a Graduate
 of the University of Pennsylvania, is
 the original inventor and proprietor
 of the CELEBRATED
ROWAND'S TONIC MIXTURE,
 which is now so universally popular, as the only
 permanent cure for the
Fever and Ague.

THE eagerness with which Rowand's
TONIC MIXTURE has been sought for,
 from the first moment that it was sent forth,
 to the general use of the community, affords the
 most unequivocal assurance of its surpassing
 excellence and importance. It is now regarded
 by those who have had opportunities to decide
 upon its merits as an inestimable public bless-
 ing, and indispensable to the health, comfort,
 and even local prosperity of the inhabitants of
 many portions of our country. In proof of
 which, the proprietor can exhibit communications
 from various newly settled territories and colonies,
 signed by numbers of the citizens, entreating
 that they may be supplied better, and in
 quantities adapted to their necessities. With-
 out an exception, in any age or country, no me-
 dicine has spread with such rapidity, and gained
 such distinguished reputation, within the period
 of the seven years, that it has been used in the
 treatment of
 Fever and Ague, or Intermittent Fever,
 Nervous Weaknesses, General Debility,
 Remittent Fever, Dyspepsia, Bad Appetite,
 Heart Burn, Water Brash, Flatu-
 lency, Jaundice, Dysentery, Ague Cake,
 Constiveness, Bilious Fever, and all other
 complaints arising from disorder of the
 stomach and bowels.

It is therefore earnestly recommended to those
 afflicted with the distressing complaints for
 which it is designed, as the most valuable means
 of relief which they can obtain.
 J. R. R. & Co. have in their possession
 more than
20,000 Certificates,
 which prove the infallibility of this medicine,
 when properly used; including many members
 of Congress, and other distinguished persons in
 the metropolis of our country, who have ex-
 pressed their gratitude for the restoration of
 health by the use of the "TONIC MIXTURE."

ADVERTISEMENT.
 THE impossibility of carrying on the
 WATCHMAN as it ought to be conducted,
 while absent on collecting expeditions, and the
 impossibility of longer doing without the large
 amount due me for six years of labor, have
 determined me to sell the establishment at the end
 of the present year. The subscription list is
 at about 800, and on the increase, and the job
 printing and advertisements good for at least five hun-
 dred dollars a year. A gentleman of talents, and
 sound whig, shall have the paper on the most
 liberal terms. I would not willingly let it go
 into any other service. An early application is
 requested.
H. C. JONES, Editor & Proprietor.
