J. HENRY MILAM. ATTORNEY AT LAW. Warrenton, N. C. Practice in Warren and adjoining counties. Prompt and careful attention given to all business placed in my hands. Office in court house building.

W. H. DAY, S. G. DANIEL, RALEIGH, N. C. DAY & DANIEL. ATTORNEYS AT LAW. RALEIGH, WARRENTON AND LITTLETON. Practice wherever their services are required. Money loaned on easy terms. One of the firm will be in Warrenton every 1st and 3rd Monday, and at other times if necessary.

A new torpedo destroyer has just been invented that understands its business. It is a magneto-electric device, formed by placing a number of hollow cubes with elongated points, three inches apart. This device is dropped and held by a chain. It has long tentacles, highly magnetized that instantly grasp and lock around.

Horseless carriages are common in the streets of Paris, France.

GREEDY IRON TRUSTS.

MANUFACTURERS ALL ASK FOR HIGHER TARIFF RATES.

While Prices of Bolts, Nails, Shovels, Ralls, Etc., Have Been Advanced 50 to 200 Per Cent. at Home, But Not to Foreigners.

The manufacturers of bolts and nuts, following the example of the nailmakers and manufacturers of shovels and the combined producers in several other branches of the highly protected iron and steel industry, have formed a combination, the first effect of the movement being an increase of prices by fifty per cent.

"The formation of a trust by all the forty-three bolt manufacturers of the United States, with the exception of the Anderson Iron and Bolt Company, of this city, was effected yesterday. It will go into effect at once."

The organization does not appear to have been completed until a few days later. Press dispatches from Boston published by the newspapers generally (the New York Tribune and other high tariff organs included), announced "the successful consummation" of the combined manufacturers' plans and the increase of fifty per cent. in prices.

"The profit to the manufacturers is now from \$1.20 to \$1.50 per keg. The Bolt and Nut Pool will operate in the same manner, and it is understood that the Commissioner receives 1 cent a keg on the 8,100,000 kegs of nails manufactured annually, and a similar percentage on the bolts manufactured.

"The nailmakers, the boltmakers, the manufacturers of steel rails, and all the other combined manufacturers in the iron and steel industry who are compelling the people of this country to pay outrageous prices while they sell to foreigners at a great reduction and prove by their export trade that they need no tariff duties whatever to protect them against the competition of foreign goods here at home, are shouting for McKinley and eagerly looking forward to the time when the Republican party shall increase the tariff duties which they now use as instruments of extortion. They want higher rates, in order that they may be able to exact even higher prices from consumers in the United States. The Republican party in Congress voted a few weeks ago to increase their tariff duties by fifteen per cent. and promised to give more in 1907 or 1908. Consequently there is a great Republican campaign fund already in sight.—N. Y. Times.

Protection is the People's Worst Enemy. The rabid McKinleyites who appeal to National prejudice and sectional hatred, in an attempt to stir up a commercial war between this country and the British Empire, should have their eyes opened to the dangerous results, if their effects should be successful, by a recent publication of the Department of State. In a summary of the commercial relations of the United States with the rest of the world, it is shown that exports from this country valued at \$431,039,267, or 48.3 per cent. of the total exports, Canada took \$56,664,094 worth of our products, and the other British colonies and possessions took \$92,357,163 worth; a total of \$580,080,525, or sixty-five per cent. of all our exports.

Should the Republicans be successful in the coming elections, and proceed to carry out their trade-hating and high-tariff theories, by shutting British goods entirely out of our markets, it would be only natural that, in self-defense, the British Empire, with its population of nearly 300,000,000, should retaliate by excluding American products. If this was done, and our farmers and manufacturers were shut out of the markets in which they now sell sixty-five per cent. of their exports, what would they do with that great amount of their products? It is certain that we could not use them at home. It is also certain that there would not be a demand for more than a very small portion of them in the rest of the world. Then our mills now making goods for export would be idle. Our farmers would find themselves with immense surplus crops on their hands which they could not sell. Little mills and unskilled labor would be ruined. The country would be plunged into hopeless bankruptcy.

It is earnestly to be hoped that the panic-producing, poverty-creating theories of the McKinleyites will not prevail either in the United States or in foreign countries. Should we, by our hostile tariff legislation, ever provoke other Nations to shut our products out of their markets, it would be the greatest calamity that could happen to the American people.

WHIDDEN GRAHAM.

A Chicago Tribune correspondent who says he "wants to fight" sends this:

Away off on the other shore We hear the British lion's roar For having got his tail in twain From Yankee Doodle Doodle's din. Go it, brother! Go it, For Laureate Anst! We are in favor of letting you two fight it out.

A PONGEE HANDKERCHIEF.

"ARGAINS, eh?" said Mrs. Pilkington. "Guess I'll look at 'em."

"The old Pilkington farm house at home was crammed full of 'bargains,' possible and impossible. The bureau drawers were overflowing with 'bargains,' which were of no use to anyone; the trunks were packed full of 'bargains.'"

And here, on the crowded curbstones of Grand street, the swinging pasteboard sign of "Great Bargains Within!" attracted her attention, hurried though she was with the manifold errands which yet remained incomplete.

"She had a lot of damaged table linen under her arm, and some cheap hosiery in her bag, and a dozen towels with misprinted borders in her pocket, and here she was crowding into the Grand street store to buy a blue spotted, pongee handkerchief for eighteen cents."

"It'll do for Sara Janetta to wear around her neck of a cool evening," said Mrs. Pilkington, "and eighteen cents is really very cheap for real pongee."

Mrs. Pilkington lived in a little brown roofed farm house on the Housatonic River, and her main errand up to town had been to buy a "store carpet" for her bedroom floor, and to exchange an old sewing machine for something of a newer order.

Her cousin, Mrs. Bruce Babbitt, who had spent the summer months at the farm, and made the most possible trouble for the least possible pay, had also engaged to hunt her up a "billy" from the nearest intelligence office, and have the same on hand when the "five-four train" left the Grand Central Depot that afternoon!

And sure enough, when the lady from the country arrived, red and panting, at the depot, with disheveled hair, bent bonnet and shawl dragged all over her, a young girl stood at the door with a can in her hand, the name of "Mrs. Bruce Babbitt" on it.

"You ain't the new sewing machine, are you?" said Mrs. Pilkington, rubbing her nose with a puzzled air. "Nor yet the eighteen yards of carpet from Stonebridge and Bounce's?"

THE MARKETS.

NEW YORK COTTON FUTURES. Cotton steady; middling uplands, 7 1/2; middling gulf, 8; futures, steady. Sales 152,700 bales.

LIVERPOOL COTTON MARKET. Cotton, spot: Middling 4 1/2 d. Futures: quiet. Sales 15,000, including 4,000 Am. tons, 14,100.

Found at Last! Greatest Discovery of the 19th Century. N. S. I.

A Compound that will kill the Worms on Growing Tobacco without Injury to and without Poisoning the Plant.

CHEAP. SIMPLE. EFFECTIVE. Tobacco Planters

DEAR SIR: Don't you dread the work and worry of worming tobacco worse than you do any labor or trouble before you? Did you ever wonder why something wasn't discovered for killing these worms without the tedious work of hunting for and then mashing each worm?

We have made that discovery. Listen: N. S. I. is a compound which kills the worms—all of them, little and big—remains on the plant for those not hatched, killing them when the first "nibble" and before they have time to injure the crop. Application is easy. No apparatus is necessary. You can have to sprinkle the powder over the plant with an ordinary sifter.

N. S. I. does not poison or injure the tobacco in any way and we present you with positive proof of that. We want to worm one acre for you this season. We want you to keep strict account of what you save in labor, extra pounds of tobacco, annoyance, etc., and report in fall the results.

COST INSIGNIFICANT. LOUISBURG, N. C., JAN. 20, 1903. This is to certify that I have thoroughly tested what is known as "N. S. I." on my crops of tobacco, and find that it effectually destroys all worms on the growing tobacco at a cost of almost nothing, and without any portion of injury to the plant. I believe that this mixture practically solves the problem of worming tobacco, which has long been a thorn in the flesh of tobacco growers.

Application is extremely simple, requiring no apparatus save a meal sifter and the ordinary laborer to use it. One beauty about this new method is that it not only kills all the worms, large and small, at once, but the compound remains on the plant for those not hatched, killing them when the first "nibble" before they do any damage.

I think the application of "N. S. I." means an absolute guarantee that the tobacco will not be disfigured by the "pestiferous" horn and bud worms. I am certain that no farmer who gives "N. S. I." a fair trial will ever again worm his tobacco by hand. I don't see how I could make tobacco if I had to worm it in the old way. Respectfully submitted, J. K. SPENCER.

FRANKLIN COUNTY, N. C. We, the undersigned, subscribe to the fact that Mr. J. K. Spencer of this county, is a most worthy and reliable citizen, and a farmer who has succeeded in growing some large and exceptionally fine crops of tobacco. S. D. Bagley, President Female College. C. M. Cooke, Lawyer. H. C. Kearney, Sheriff. B. B. Massenbarg, C. S. C. M. S. Davis, Treasurer.

RAGLAND SEED FARMS, Tobacco Seed Growers, Hycoc, Halifax County, Va., December 7, 1905. "N. S. I." Company, Richmond, Va.; Gentlemen—We found the "N. S. I." first rate for young tobacco, and it will kill the worms all right. Yours Truly, RAGLAND SEED CO., W. C. Slate, President.

Hundreds of other testimonials from all parts of the Tobacco Belt will be shown you with pleasure. For Sale by the Leading Merchants of Warren County. N. S. I. COMPANY.

Arrington Warehouse. HEADQUARTERS For the Sale and Purchase of Leaf Tobacco. PRICES ARE BOOMING!

And we wish to call the attention of all Tobacco Raisers to our MARKET, and to some of the many advantages to be gained by selling Tobacco at the Arrington Warehouse. We have a good corps of liberal buyers with orders sufficient to take at its full value twice the amount of Tobacco ever sold on this market.

We have the largest and best lighted warehouse in North Carolina or Virginia for showing Tobacco to the best advantage, and above all we are prepared with AMPLE CAPITAL AND LARGE ORDERS To see that every pile of Tobacco put on our floor shall bring outside market prices.

We are determined to make a success of our House, and intend to sell more Tobacco than the market has ever before sold, if Honest Weights, First-class Service and Big Prices will do it. So get in "The Swim" and come along to the Arrington Warehouse.

P. S.—Don't forget that we always carry a full line of "Old Hickory" and Tennessee Wagons, Wrenn Buggies and first-class Harness.

Cyclone in Ohio.

A heavy storm passed over Canton, O., and vicinity Saturday. The Canton & Massillon Electric Railroad was blocked with a huge landslide. The Catholic church at West Brookfield was destroyed by lightning. Two hundred feet of side track and main track of the Cleveland & Lorain Railroad was washed out. A number of houses in Stanton were struck by lightning and to children of Stanton Hill were badly shocked. Trees innumerable were uprooted, cellars flooded and lawns, gardens and streets damaged.

DISEASES OF THE SKIN.

The intense itching and smarting incident to eczema, tetter, salt-rheum, and other diseases of the skin is instantly allayed by applying Chamberlain's Eye and Skin Ointment. Many very bad cases have been permanently cured by it. It is equally efficient for itching piles, a favorite remedy for sore nipples, chapped hands, chilblains, frost bites, and chronic sore eyes. For sale by druggists at 25 cents per box.

J. H. MILES. DEALER IN Staple and Fancy Groceries, Cakes and CRACKERS AND CONFECTIONERIES.

PITTMAN & KERR, Lawyers, WARRENTON, N. C. Will Attend to Business.

Your Face

Will be wreathed with a most engaging smile, after you invest in a White Sewing Machine. EQUIPPED WITH ITS NEW PINCH TENSION, TENSION INDICATOR AND AUTOMATIC TENSION RELEASER. The most complete and useful device ever added to any sewing machine.

The WHITE is Durably and Handsomely Built, Of Fine Finish and Perfect Adjustment, Sews All Sewable Articles, and will serve and please you up to the full limit of your expectations. ACTIVE DEALERS WANTED in unoccupied territory. Liberal terms. Address, WHITE SEWING MACHINE CO., CLEVELAND, O.
