hill.

Rard to Catch Up. Two Sileslans, seated in a music hall, began to argue about the music of Wagner. The argument as it pro-

gressed grew heated. The upshot was that the younger challenged the older Filesian to a duel. But the older Silesian declined to

"No, no," he said. "I refuse to meet you. The risks are not equal. You, twenty feet away, I caught sight of the you see, are a bachelor, whereas I am light, gauzy folds of a woman's dress, a married man with three children. a white hand pat my dog's back and a I'll tell you what to do. Go get marlarge as mine. Then, when our risks "Pardon me, but I fear my dog has are alike, come and challenge me listressed, perhaps frightened, you," I again."

The younger man complied. He mar-"Not at all. I love dogs, and this is ried. Three years passed and one day a noble fellow," she answered gracious- three years later he went, accompanied ly and again stroked old Bootes in a by a nursemaid, to his opponent's "Here I am," he said fiercely. "My

five now." Exercise For Business Men. The average city business man without physical impediments to fight against can probably get along successfully on such an exercise schedule as

First.-Five minutes each day of purely muscular exercise, such as can be taken perfectly well in one's room without any special apparatus.

Second.-Short intervals during the day of fresh air, brisk walking, deep breathing. This can all be secured in A man can easily spend as much as and digestion.

for being out of doors, for playing estly. games, etc. This is essential. This is

for both body and mind. A man who thinks he can get along without at least one vacation time a week simply proves his ignorance.-World's Work

The Bite of a Girl.

The bite of a girl may be as produce - York farmer in National Stockman. It tive of polsonous germs as improperly is true that it costs considerable to prepared foods, according to the state make silage, but careful tests show ments of Professor W. D. Miller of quite conclusively that silage from the University of Berlin. In a lecture | corn is a more desirable feed for cows the professor said that a bite of a than the corn crop preserved and fed in pretty girl would often bring a quicker any other way, and this after allowing and more horrible death than the bite the cost of harvesting and storing the of a serpent. Professor Miller, who has crop. There is nothing like silage to made a specal study of the bacteria of keep the dairy cow's appetite on edge the mouth, said that only a short time throughout the long winter period. It ago he experimented on a beautiful girl also keeps her system in good condiin Germany and found that an arrow tion, which is a very important matter, dipped in saliva from her mouth would and gives her a relish for her food. send its victim in death throes more terrible than one dipped in the venom of the most deadly snake .- What to Eat.

HINTS FOR FARMERS

NO. 28.

### Care of Honey.

The average housekeeper puts honey in the cellar for safe keeping, about the worst place possible. Honey readlly attracts moisture. In the cellar extracted honey will become thin and in time may sour. With comb honey the case is still worse, for the appearance as well as the quality is changed. Instead of heeping honey in a place moist and cool keep It dry and warm, even hat. It will not hurt to be in a temperature of even 100 degrees. Where salt will keep dry is a good place for honey. Few places are better than the kitchen cupboard. Up in a hot garret next to the roof is a good place, and if it has had enough bot days there through the summer it will stand the freezing winter, for under ordinary circumstances freezing cracks the combs and hastens granulation or candying .- Bulletin, Ontario Department of Agriculture.

Harvesting Apples.

A low down, handy wagon should be used in orchard work to better enable getting about among the trees, says a Massachusetts farmer in American Cultimator. If the fruit will grade largely fancy, it is better to have them picked by the day; if fair to ordinary, then by the barrel. Care should be taken that the fruit is not dropped or bruised in picking. As soon as the fruit is placed in barrels it should be removed to some convenient shed or storage house, every effort being made at this time to get the fruit from the trees. Any attempt to do both picking and sorting the regular order of the day's business. at the same time would so divide the manager's time that neither would be half an hour walking out of doors a success. After picking, if a sale of every day. This is for heart, lungs the fruit has been made, one can turn his attention to sorting and packing. Third.-The reservation of at least | Care should be taken to grade the fruit one day a week for rest and recreation, uniformly and to mark packages hon-

### The Silo and the Dairy.

Milk is more cheaply made by good grass than in any other way, and next to grass comes sllage, because it furnishes the cheapest and most desirable substitute for grass, writes a New

The sketches and the dog had opened the way for further conversation, and was soon wholly and delightfully absorbed with this unexpected compan-

Just as well for me to spring up and go or disturbed. I regarded her not only with admiration, but with profoundest respect. I forgot the dog, which trotthere a week. I quite forgot, too, I chatted away as volubly as if I had been asked to ventilate my opinion of things in general. "It is getting late, and I must be going or aunt will come

Springing up as she gathered her sketches together, I offered to assist her to rise. She held her hands for me to take them, saying sweetly,

I took her by the tips of her fingers, drew her to her feet, then-good heavens, what possessed me, what prompted such unpardonable cowardrageous action. She drew her hands violently from my touch, and then I beheld the grandest sight my eyes ever looked upon-a woman, beautiful, but quivering in every fiber of her body with surprise and indignation. From her eyes flashed resentment-every expression indeed but forgiveness and fear. Voiceless and majestic, she flung rebuke upon me till I cowered

ence had I not felt paralyzed, riveted to the spot. Seeing that I looked about

Her neck did not bend, her arms made no move, nor did her foot leave its place. Her whole attitude, as her brilliant eyes surveyed me from head heart or the strongest brute. It seemed to me ages that she held me thus at bay, and then I saw tears gathering in her eyes-tears, woman's I fell on my knees and said in tones

guilt: "Forgive me! A thousand times

Without replying she turned and walked from me toward the cottage

and I thought an angel spoke to me,

I watched her till she entered and

Twins Born In Different Years. "I have often been present at the birth of twins," said an old nurse. "Only once was I present, though, when the twins were born in different years." "Twins born in different years? You are crazy," said the young bride.

"Not a bit of it," said the old nurse. 'The thing happened in Pittsburg in 1869. The first twin was born at 11:30 o'clock on the night of Dec. 31, 1899, and the second was born at 1 o'clock in the morning of Jan. 1, 1900. There are, ma'am, a number of other cases recorded of twins born in different with manure in winter when frozen. years."

The Cat Had Chickens. The old housekeeper met the master at the door on his arrival home. "If you please, sir," she said, "the cat has had chickens."

"Nonsense, Mary," laughed he. "You mean kittens. Cats don't have chickens.

"Was them chickens or kittens as you brought home last night?" asked the old woman.

twinkle. "Well, the cat's had 'em!"

falling on it. The coroner's jury damp, brought in the following curious verdict: "Death resulted from shock following bronchitis and whooping cough, caused through the shaking of the house by the firing of a gun at the at the New Jersey station with two government proof butts on the Pulmstead marshes."

#### Raising His Wages.

Y .- You know I told you a few days milk was 2.8 cents less, and the cost of after he employed me that he said one pound of butter .61 cents less than he'd raise my wages in a month or soil when the pulp ration was fed. The Z .- Yes. And didn't he? "No. I misunderstood him. He yield about 10 per cent as compared said he'd try to raise my first week's with the feed of slinge, although the wages by that time. I haven't had a | cost was greater. The results, howshilling yet."-London Tit-Bits.

Compromise. "I have a little granddaughter," said

a senator, "who is very fond of animals, especially dogs. Her mother has taught her to pronounce the word until it sounds like dahg. Her father sticks to whether it is desirable to crush to the good old fashioned dawg, so

Seeding Down to Grass.

The last of August and the first of September is the best time in the whole year for seeding down land to grass, says American Cultivator. Where the land is too wet to admit of planting a hoed crop it may be plowed up and reseeded directly upon the inverted soil. If the bottom is too soft for two horses to plow easily abreast, it may be often managed by-working two or three horses tandem, keeping them all the time on the sod. It will not be easy to cart manure on to such land after plowing, but a dressing of ground bone and wood ashes or other good fertilizer may easily be spread and harrowed in with the seed, and there will be no trouble in top dressing such land

#### A New Potato.

A report received by the department of commerce and labor from the British vice consul at Rouen, France, states that the cultivation in France of a new potato brought from Uruguay has been observed for some time with great interest. A variety of this potato, called the Solanum commersonfi violet, is said to possess excellence of taste as well as a nutritive value and is equal to the best potato known in France. This variety is distinguished by its resistance to frost, as also to disease, and its one great advantage is that it prospers most in a damp or swampy soil and, whether clayey, cal-

Beet Pulp For Dairy Cattle. The new feed, new at least in some sections, called dry beet pulp, was tried lots of cows during two periods of fifteen days each, but the pulp proved less profitable than corn silage. On the silage ration the cost of 100 pounds of pulp ration, however, increased the ever, do not prove but that pulp would make an economical feed on farms where there is no corn sllage.

Whele Onts For Horses.

A writer in an English paper says: "Some diversity of opinion prevails as oats in feeding horses or not. It is the child has compromised, and now frequently held that crushed oats are better and more digestible for horses

"Why, they were chickens, of course." "Just so, sir," replied Mary, with a A Comprehensive Verdict. A child in an English town was careous or siliceous, seems equally killed by a steam atomizing apparatus adapted for its culture, provided it is
