HISTORIC NORTH CAROLINA.

Theodosia Burr's Portrait and the Mystery of Her Death.

The North Carolina state historical exhibit, but recently installed in the History building at the Jamestown exposition, forms one of the most interesting and valuable collections of its kind at the Tercentennial and reflects great credit upon the state and those individuals who are responsible for its presence. The exhibit, which is partly under the auspices of the Wachovia Historic society, a Moravian organization of Winston-Salem, N. C., is under the direction of Miss Lindsay Patterson, chairman of the committee; Miss of the Wachovia Historic society.

The Moravian exhibit is a most interesting collection of the handicraft manufactured. Covering something and genius of the people of that denomination who settled in North Carolina in the early part of the eighteenth century and demonstrates their wonderful ingenuity. Among the relics of this exhibit is the first fire engine imported in this country; also one of the first printing presses, which was captured later by Cornwallis and used in the printing of his orders. Pottery, beadwork and pewter ware form an important part of the collection, which is exhibited for the first time outside of the city of Winston-Salem.

The state exhibit, which covers the entire early history of North Carolina from its beginning through the war of 1812, is replete with portraits of presidents, governors and statesmen who have been produced from within her borders; also famous documents, letters and silverware from many of the old families of the state.

Relics from the famous battles of Guiiford Court House and Morse Creek bridge also form part of the exhibit. The portraits are among the most interesting of the exhibit, consisting of Carolina building, to be attended by Governor Glenn's Proclamation. the noted John White collection of In-From the executive department of dian pictures presented by Colonel B.

The portrait of Theodosia Burr, and most romantic character in American history, has a history too remarkthe exhibition buildings at the Jamestown able to pass over without some mention. Theodosia Burr (Mrs. Alston, wife of Governor Alston of North Carolina) set sail from Georgetown, N. C., to meet her father, Aaron Burr, in New York upon his arrival from Europe. The ship she sailed in was lost at sea, and nothing was ever known of the fate of this beautiful woman until recently, when the picture which now forms part of the history exhibit at the exposition was found in the possession of an old woman whose remarkable story proves without a doubt that Theodosia came to her death at the hands of pirates. The portrait was found in the shanty of a very old woman at Nags Head, N. C., who told the story of how a piratical crew lured ships on to the shallows by false lights, benefiting by the resulting wrecks, The painting found in her possession was given her by one of the pirates as his share of the booty taken from a ship that was without a doubt the one on which Theodosia Burr set sail never to be heard of again.

The collection of silver services presented by some of the most noted families of the state also adds greatly to the value of the collection. The exhibit in its entirety is one of the handsomest and best chosen which have been installed at the exposition and must be seen to be appreciated.

North Carolina Negro Exhibit.

North Carolina has contributed to the Jamestown exposition a most interesting negro exhibit, housed in the tive part and interest in making the Jamestown exposition a great success, for Negro building at the Tercentennial. Under the charge of the Rev. C. H. Williamson, commissioner general of the North Carolina negro exhibit, this On Aug. 15 North Carolina will have an display represents the work of every exhibition day, and I earnestly desire ev-ery North Carolinian possible to be there educational, industrial and religious institution in the state.

Most wonderful of all is the work done by the school for the colored deaf, dumb and blind, located at Raleigh. The needle and fancy work Jamestown exposition is of colonial and the woodcarving and other handiwork of the unfortunate students of architecture and was erected at a cost this institution have attracted the attention of the entire country. constructed upon a plot of ground 135 by

The colleges and schools represented 110 feet in size, situated on Willoughby Boulevard, east, and overlooks the in the negro exhibit of North Carolina broad waters of Hampton Roads. The are as follows: School For the Colored building was designed by Zimmerman Deaf, Dumb and Blind, Raleigh; Ashe-& Leister, architects, of Winston-Sa. ville graded school, Asheville; High lem, N. C., and was constructed by J. Point Normal school, High Point; State D. Elliott, contractor, of Hickory, N. C. Normal school, Elizabeth City; Roanoke The building is three stories high and institute, Elizabeth City; Whitted contains fourteen commodious apart- graded school, Durham; St. Augustine's ments, a hallway on each floor and a school, Raleigh; A. and M. college, Greensboro: Joseph K. Bride school. Enfield; Henderson Normal institute and Shaw university, Raleigh.

To the right on entering the main Among the most interesting exhibits hall is the Vanderbilt room, so called for in the general display of North Caro the reason that the beautiful and ex- lina negro development is a collection pensive mission furniture it contains of negro publications. The exhibit of was presented by Mrs. George Vander. African curlos is also most interesting

Exposition Rates Reasonable.

District Passenger Agent J. H. Wood of the Southern Railway company at Asheville has returned from a several days' trip to the Jamestown exposition and declares that he was favorably impressed with the excellence of the exposition. He said that there was no reason for complaint; that the transportation facilities were entirely adequate: that hotel facilities were ample and that rates were reasonable. The exposition itself, Mr. Wood said, was interesting and instructive and sightseers could very pleasantly and profitably spend several days in and around Norfalk and the exposition grounds,-Citizen, Asheville, N. C.

A COMPLETE EXHIBIT:

Splendid Showing of North Carolina at Jamestown Exposition.

FORESTRY, FISH AND GAME.

Odd Specimens on View In These Sections - White Possum and Albino Raccoon-Agricultural Pyramid With Its Novel Peanut Umbrella.

The North Carolina exhibit in the States' Exbihit Palace at the James-Schenck of Greensboro, Miss Mary town exposition is second to none in Hinton of Raleigh and J. A. Linback)the building. It is compact and exhaustive and thoroughly exploits the resources of the state, natural and over 6,000 square feet of floor space in the northwest corner of the building, just to the left of the main entrance, this exhibit is in the form of the capital letter "L," with a square within it. This square contains about 3,000 square feet of floor space and displays the exhibits of agriculture, forestry, fish and game. That space contained in the "L" accommodates the exhibits of like character in the building. The collective assemblage cost \$15,000, twice as much being spent in the

square as in the side booths. The state colors-blue, red and white -are prominently displayed in the decorations, and yet the prevailing scheme is cream and gold. Around the several sections of the exhibit is a railing of polished brass. The posts supporting this rail are finished in cream and gold. On the top of each is a flagstaff with a golden ball. The entrances-and there are some eight or ten of them-are flanked with tall cream white columns with Ionic capitals, surmounted by gilded eagles with wings outspread.

Draped in festoons between the columns in the central booth are cords of gilded and colored peanuts in unique and artistic decorations, aided by nu-

appearance the decorated building in the central exhibit catches your attention almost Immediately. On the sides and roof of this little house is shown in quaint designs and displays nearly every principal agricultural product of North Carolina. The roof is made of cornshucks, the sides of wheat, tobacco, grasses, cornstalks, cotton and clipped grain. Among the most attractive designs on the house are the monogram of the state and the seal of the department of agriculture.

The most artistic display in the booth and one that will not fail to call forth admiration is an agricultural pyramid, built in four sections and exhibiting in tubes and jars all the grain products of the state. Covering this, drooping from the top, is a hanging umbrella of artificially colored peanuts, blending perfectly with the brown and yellow grain and with the red background with which the very picturesque pyra-

In the exhibit of agriculture there are unusually fine samples of all North Carolina grains and grasses in the sheaf or bundles. While the whole state of North Carolina is represented by the fine exhibits of the department of agriculture, a great many of the finest were sent from the plantation of W. H. Robins, near Raleigh, Mr. Robins himself arranging them in the

Though a by no means ancient science, forestry finds many of its ardent students in North Carolina, and the exhibits in this department are surpassed by none of like nature at the exposition.

Among the exhibits of the department of fish and game are several of the most strange and unique at the entire exposition. The visitor will see a possum with creamy white hair and beautiful pink eyes and an albino squirrel as white as cotton.

In the same case with these freaks he will see a yellow raccoon so nearly approaching albinoism as to be almost a true representative of the type. These three specimens are from the North Carolina state museum, where for the last several years they, have attracted great attention and interest. They were all killed in the state, the possum having been caught near Raleigh, the raccoon near Wilmington and the squirrel in Craven county.

Then there are a number of game and fur bearing animals, together with a large assortment of skins,

There is a case full of wild duckstwenty-three varieties, two of each, as a rule-and six or eight wild geese. They were collected by H. H. Brimley, curator of the North Carolina museum, many specimens having been prepared especially for exhibit at the exposition. With the ducks is shown a hybrid duck, a cross between a mallard and black duck. This was shot some time ago in North Carolina and is one of the few specimens of hy-

brid ducks in existence. The fishing interests of the state are represented by a number of large colored reproductions of the most important fish of North Carolina waters and a full assortment of crabs, clams, eysters, turtles, shrimps, etc.

Jamestown's Accessibility. Within a twenty-four hour radius of the exposition there live some 40,000,-000 people, or nearly half the population of the entire United States. Eight or ten railroads and as many steamship lines center in Norfolk and Newport News, making it possible to bring all of these people to the exposition during the period of the celebration. and all who enter the gates of the Colonial City by the Sea will find entertainment in the highest sense of the
