## Haag & Smith's Patent WATER WHEEL.

THE undersigned having accepted the gency for the above named wheel, would call the attention, of the proprietors of Mills. Factories, &c. &c., to the many advantages they would derive from using it. It is well adapted to all purposes for which a water wheel is used. The small space it occupies, and the velocity of its motion, are attractive features. It requires but a small amount of gearing. Ice does not affect it. Works as well on horizontal as vertical shaft. Suitable to any locality. Not affected by back water. It is simple, cheap and durable. One of the wheels can be seen in operation at Foard, Tatum & Co's, Mill on South Yadkin

I have been in the Mill wright business for 25 years, and consider this by far the best whell I have ever yet met with. This wheel costs from \$15 to \$275, according to size. For further particulars address me at, Jerusalem, Davie Co., N. C.
