The citizens of Favetteville have transmitted, through their Magistrate of Police, to the sufferers by the late destructive fire at Cumberland, Md. a handsome donation of \$363 7.5; a circumstance highly credible to their liberality and benevolence; and the committee, in acknowledging its receipt, very justly remark, that "ander present circumstances, Fayetteville having experienced a similar disaster two years ago, their present contribution is worthy of all praise."

When the Court House bell rang to announce the verdict of the jury, Clough was found lying on the floor of his cell writhing in agony .-His situation is indeed dreadful; sleep, the sweet restorer of nature, brings no relief to his desolate spirit; and he evidently longs to escape from the ocean of agony upon which he is tossed, and lie down upon the shore of death. 30.

The South Carolina Rail Road is dissipating all doubts as to its practicability and utility. It is in rapid progress, and the stock rising. Fiftytwo shares were sold a few day ago in Charleston at \$102. The Augusta Courier of the 21st instant says-

"We learn with pleasure, that this exterprize is near its completion .-On Monday next, the Cars will run up to Blackeville, 96 miles; and the week after, the Mail and Passengers will be carried on the Hamburg end to the foot of the inclined plane, where the stages will receive them. The whole line will be completed early in August. The wood work is already done, and most of the iron received for the Rails-the rest daily expected. Those engaged in this undertaking have a clear title to public congratulation; for they have triumphed over "wind and tide." The Editor of this paper has travelled over several rail ways in his recent journeyings. - He passed with greater rapidity on the Charleston and Hamburg road than any other. From the Cape de Verds .- Accounts have been received from these afficted islands to the 4th of May. The famine still continues, particularly in those islands which have little or no foreign commerce, where numbers are perishing daily. It is now more than two years, since they have had any rain; and their own government (Portugal) has done nothing for their relief. They were very grateful for the supplies which had been sent from the United States, and many lives had been saved by them.

Rise in Real Estate .- The Peters burg Times of the 21st instant, states that, of a lot of ground on Sycamore street in that town, 120 feet front by 85 feet rear, (for which four years ago \$1000 dollars could not be obtained,) three lots of SO feet each (being only 90 feet in the whole) were sold on the 19th, at public auction, for \$3240. So much for the rail road! Will North Carolina, in the face of this and thousand other such facts, continue to doubt, and hesitate and slumber? Can she, when she looks at the means by which the prosperity of other states is so rapidly advancing, any longer neglect to adopt some system by which her own condition may be improved?

Narrow Escape of the President. -Few men have had more parrow escapes of their lives than President foot on the Battery, the bridge fell, over which he had just passed. Had it fell one minute before, it would have precipated him and his horse into the river. Then, on passing through the dense population up Broadway, a number of horses became frightened by the music, and were very near throwing him from his horse, and on leaving us, while standing on the upper deck of the steam boat, the wad of a field piece struck within an inch or two of his person. I have been acquainted with the Buffalo Springs for upwards of twenty years, during which time I have frequently made use of the Waters on myself, as well as recommended them to others, and with decided good effect. They operato as a gentle, but affectual aperient, and at the same time strengthen the system. I feel no hesitation in recommending them as happily calculated to

a gentle, but effectual sperient, and at the same time strengthen the system. I feel no hesitation in recommending them as happily calculated to remove the diseases incident to the summer and fall sessons. They have never been critically apalysed, but such trial as has been made shew that they contain Neutral Salts, Sulphur and Iron. I can but wish they were more generally resorted to, believing they would be found to answer a valuable purpose.

B. LEWIS.

Having been requested by Mr. Shelton, to give my opinion with regard to the qualities and effect of the Buffalo Waters, I state, that, in their operation, they are aperient and tonic, and at the asme time considerably directic; and, from my observation, in a number of instances, of their beneficial effects, I can recommend them as a valuable remedy in all cases of indigestion and irregularities of the stomach and intentines, in Chrosic diseases of the Liver and Kidneys, and all cases of general debility. I also believe them to be an excellent preventive against the actionsal diseases incident to this climate.
