And
BRIGHT**

FITS THE CRIME

WINNIPEG, Man. — (AP) — Henry Meiner, 32, pleaded guilty yesterday to burning his eight-year-old son's hand with a hot 50-cent piece because the boy stole money to buy matches and start fires.

HAVING WONDERFUL TIME
WEST CHESTER, Pa. — (AP) — A 22-year-old soldier was held today on charges of forging a \$4,000 check on his father's bank account, buying a \$3,500 house trailer and hitching it to his father's automobile to elope to Elkton, Md.

Mr. Michael Gentile of Cedar Hollow, Pa., on leave from Camp Polk, La., was taken into custody here with his bride. Police said the forged check withdrew virtually the entire life savings of his father.

WHEN IN ROME
MINNEAPOLIS — (AP) — John C. Grave was sorry today that he ever left Little Watertown, Minn.

Grave, 28, was fined a total of \$35 for illegally driving his car into a parking space ahead of another auto and slapping the other driver's wife in the argument that followed. "This would never have happened back home in Watertown," he said. "Back there I just walk to town."

THE ETERNAL FEMALE
PITTSBURGH — (AP) — Stella Olesinski, 25, used a time tested formula to get rid of a would-be bandit who tried to hold up her office here yesterday.

The gunman stepped into the office and demanded "all the money you got."
"But I can't. I'm too scared," Stella said.

Then she dropped to the floor and began screaming. The gunman ran out.

ARTFUL DODGER
DETROIT — (AP) — A latter-day Jimmy Valentine deftly twirled the dials of an office safe then walked out with the cashbox after explaining to a veteran employe that "I'm the general manager and what's it to you."

Jack Kaminska, 35, told police that "I just stood there scratching my head. Then I realized something was wrong. Sure enough, the safe was open and \$1,500 was missing."

Activities Planned

SEE TRAINING FILM
Dunn Lions Thursday night will see a technicolor film on the training of Naval air cadets.

President Waite Howard said this morning that Recruiter Ernest Fox has procured the film from the Navy office in Raleigh. The movie depicts the activities of a sailor from the time he qualifies as a Naval cadet on through the entire training program and until he qualifies as a jet pilot.

Lion Jesse Capps has charge of the program. Members of the club will also receive a report on the Aorse show held last weekend.

Dunn Firms Install Air Conditioning

Fluorescent Light Aids Dishwashing

RALEIGH. — Housewives may take a tip from a lighting engineer who says he enjoys helping his wife wash dishes since he installed a new fluorescent fixture over the kitchen sink. Now, with cool, white light to make the job easier, he says, "I thoroughly enjoy helping with the dishes."

Jim Foreman, lighting engineer for one of the North Carolina electric power companies, gave an illustrative demonstration on home lighting during the Brushy Mountain Fruit Growers' Field Day at Killbey's Gap in Wilkes County.

The demonstration was held for the benefit of fruit growers' wives who attended, according to Mrs. Agnes Watts, Alexander County home demonstration agent for the State College Extension Service.

TO HOLD BARBECUE
Dunn Post No. 59 of the American Legion will hold a barbecue supper Thursday night at 7 o'clock to further plans for the Legion's annual Four-County Fair.

Commander Paul G. White and Adjutant, Keith Finch, in making the announcement, said that it will be a free feed and urged all Legionnaires to attend.

Chairman J. O. West will report on plans which have been made and is also expected to make committee assignments.

PICNIC SCHEDULED
Dunn Rotarians will hold their annual picnic Friday night at 7 o'clock at Williams Lake in nearby Sampson County. President A.

Two Dunn business firms—meeting the challenge of the hottest summer in a decade or longer—have installed new air-conditioning systems.

McLamb Supply Company of Dunn has just completed installation of new Curtis air-conditioning units in the First Citizens Bank and Trust Company and in the Sanitary Barber Shop.

These two business firms are now among the coolest in town. Even at the lowest setting of the controls, these air-conditioning units provide a near-chilling temperature. They are powerful enough to bring the temperature down to 40 degrees. And that's plenty cool, even in this scorching weather.

McLamb Supply Company is exclusive dealer for Curtis air-conditioning systems in this section.

TWO KINDS OF LIGHTING
Mrs. Watts arranged the special program as a study designed to better home conditions through improved lighting. The informative demonstration was held in the home of Mrs. Clyde Lowe Aug. 9.

Foreman told his audience that any room in a home needs two kinds of lighting—specific light for the seeing task and general room lighting. He emphasized that scientific research has revealed the

BRITISH QUADS LEARN THE TRICK OF STANDING UP

LONDON'S QUADRUPLETS NEAR THEIR FIRST BIRTHDAY with a varying show of assurance, as the Cole babies, Frances, Edna, Marie and Patricia try to stand with aid of a strap between two perambulators. The quads will be one year old in September and their individual personalities are already developing. (International)

"Get Tough" Policy Follows Utah Prison Riot

POINT OF THE MOUNTAIN.
Utah.—(AP)—A new get tough policy was ordered today for Utah's "model" prison after 22 convicts rioted and held the acting warden and a guard as hostages for seven hours in the second major riot in three months.

"We'll show these hoodlums we are running this prison," said King-ly Clawson, acting chairman of the state board of corrections, after a conference with Gov. J. Bracken Lee.

"You're damned right," Lee snapped. "They'll be lucky if they ever get out of those cells."

DISCIPLINE RECOMMENDED
Lee recommended that all of the convicts involved in the riot be locked in their cells for at least 30 days. He also recommended a strict new disciplinary code.

Clawson agreed and said the board probably would add a few more of our own" to Lee's recommendations.

The new tougher policy Lee advocated would call for punishing all 500 inmates at the new prison that cost \$12,000,000, if a single convict steps out of line.

"FAVORITISM" BLAMED
Both riots were said to be started

LANTERN LOADED
BUFFALO, N. Y. (AP) Carrying a lantern cost Samuel Johnson \$50 in court. Police found three books of policy slips in the lantern.

by dissatisfaction among the convicts because of "favoritism" displayed by prison officials.

Acting Warden Wes Haslen and Guard Edward A. Schmidt were not harmed during the seven hours they were held hostage, although their lives were threatened several times.

A threat of starvation finally forced the inmates to release the two men.

All except three of the 25 inmates of the maximum security cell-block took control of their wing of the penitentiary by grabbing Has-

lam and Schmidt at knife-point.

HOSTAGES RELEASED
They defied more than 200 officers who surrounded the prison, reluctant to use force lest the hostages be harmed, but finally released their captives.

In the previous riot on May 20, more than 400 convicts took over virtually all of the so-called "dream" prison for five hours, held seven guards as hostages and destroyed hundreds of dollars worth of prison property.

The May rioters demanded dismissal of several prison officials

Local Farmers Will Aid In Defense Production Effort

The chief aim of farm families cooperating in the local program of the Farmers Home Administration this fiscal year will be to bring their farms to maximum efficiency and help produce the food, feed and fiber needed for national defense, County Supervisor Howard M. Watkins said today.

A total of 28 family farmers in Harnett County are currently using the agency's supervised credit to buy, enlarge, develop, or operate farms, or to improve inadequate housing. As a result these families are now better able to raise products in short supply.

The small farm is the greatest potential source of domestic agricultural labor, yet it is producing far below capability because land is not being effectively used and capital reserves or suitable credit is lacking. The Sparkman Committee of the United States Senate has pointed out that a million farm families over the nation are only a third as productive as families on well-developed and well-organized family farms such as the Farmers Home Administration creates. Some of these farmers are here in this locality.

TASK OF SUPERVISION
The job of the county supervisor or in each Farmers Home Administration office is to help borrower families arrange cropping systems that would make the best use of the land and, as far as possible, to work out programs to keep families fully employed on their farms.

In carrying out FHA goals of assisting in national agricultural production, only sound FHA loans will be made. They will be for the tools

who were released within a few days as demanded.

of production—such as land and building improvements, livestock, tractors, fertilizers, and other necessities.

All loans, whether for farm operating expenses or real estate improvement, will be made to establish permanent farming systems that are balanced, sound, and efficient, and that will make full use of land and family labor.

Preserves Topic Of New Circular

RALEIGH. — Housewives who want authoritative instructions on making jams, jellies and preserves now have them at their fingertips in a revised circular just published by the State College Extension Service.

The revised publication was written by Rose Ellwood Bryan, extension economist in food conservation and marketing. It gives step-by-step directions for making all three of the popular sweets, as well as instructions for preparing fruit juices and flavoring syrup.

Miss Bryan tells how to select fruit for jelly, how to test the pectin and gives tips on how to make firm, clean and brilliant jelly. Jelly recipes include those for grape, strawberry, blackberry, quince and others.

Marmalades included in the publication are orange, grapefruit and other citrus fruit types. The author has furnished a variety of recipes for preserves, among them fig, preserved watermelon rind, peach, pear and cherry.

99,999 DOTS ?

Of course there are not really 99,999 dots in the shaded area of the map above (which represents the area served by Carolina Power & Light Company). But there ARE almost 99,999 electric ranges in service in that area—and new ones are being installed daily.

One of these days before long the 100,000th electric range will be connected to the lines of this Company. The home in which that range will be installed could be your home.

ASK YOUR ELECTRIC DEALER WHY IT WOULD SERVE YOUR ADVANTAGE TO BE THE 100,000TH PURCHASER. SEE HIM TODAY!
