FRANCES HYMAN

Frances is the attractive brown eyed daughter of Mr. and Mrs. T. C. Hyman, Jr. She lives at 610 Berington Street, with two other sisters and brother. Frances is the oldest, turning six years old in February.

Frances is an efficient young lady, and helps Mrs. Marks "mother" all the other children. You can tell that she has accepted the responsibility of being the oldest at home, and loves her job. She checks up on our "scatterbrains" and reminds them to get their coats, or papers, or dolls before they start for home.

Frances loves to work puzzles, and is very good at it too. She often has to assist the other children at school in working the more difficult ones.

When school started Frances' mother gave us some tropical fish. Every day Frances brought something for the fish, and every day whatever she brought seemed doomed. One day it was fish food, which Mrs. Marks spilled, in its entirety, in the water. Bug eggs came next, fresh from Mrs. Hyman's clothes line, but they never reached the fish. Five times Frances brought the eggs, and five times she dropped them before they got in the aquarium—so we all gave up in disgust—even the fish. Four of them have "sunk down" into the depths of despair—and died.

Miss Cornelia McLaughlin will leave Wednesday to spend the Thanksgiving holiday in New York City with her sister, Miss Helen McLaughlin of Albany, N. Y., who will join her there for the week end.

In the past years Palmyra Lodge has made some wonderful contributions to the Oxford Orphanage and Masonic and Eastern Star Home and it is hoped that this year will be no exception.

This is the time of year when we give thanks to our God for finding ourselves in very fortunate circumstances, we should show out thankfulness by giving to the less fortunate.

It would be hard to give to a more worthy cause than to children without parents and the aged men and women of the Masonic and Eastern Star Home.

ing to an alarming state," Acheson said. "Tension in the world has already reached a dangerous point. There is actual fighting in Malaya, Indochina and Korea, and this is certainly not a good prospect for peace."

He said the Western disarmament plan would be in effect within a turning point in history—a point where the world can turn away from war toward the path of cooperation and peace.

Acheson emphasized that no actual disarmament conference could be held until the fighting had ended in Korea. But, he said, other problems need not be solved in advance. The solution of problems like Germany would follow more easily if world disarmament were accepted as a policy, he said.

The drawings on the left show one reason why the CA Tractor has unusually good traction. Wide-based 10-inch tires on a 10-inch rim have a broad base, using the full width of the tread to grip the earth. When properly inflated, each rib has approximately 17 percent more square inches of surface on the ground than with conventional rims.

Another reason is the hydraulic Traction Booster which gives the CA low-weight instead of deadweight. With mounted tools, as the load increases, the Traction Booster automatically increases weight on the rear wheels in proportion to the load.

The new CA has plowing power you've never seen before in a tractor this size. Let us prove it on your farm.
