noted some improvement in an amendment to ease limitations on foreign trade. "Unfortunately, however, the new law weakens our ability to hold down prices and stabilize our eco-nomy." he said. "At a time when our detense production is still expanding and necessarily contributing to infla-tionary pressures, the Congress has weakened price controls has limited the effectiveness of wage controls has invited widespread abandon-ment of rent control, and virtually cancelled selective credit controls." This, the President said, forced the administration "to take a ser-ious gamble with inflation." "This law gives the American people only very limited protection against the dangers of inflation," he said.

But, he continued, "If Congress provides sufficient funds for proper administration of this weakened act, and if we have no sudden worsening of the international crisis, and no panic buying, we may be fortunate enough to get through the next 10 months without serious damage to our economy."
