From CUTTER BAR to GRAIN TANK You Save More Soybeans

...with the JOHN DEERE No. 12A COMBINE

From the first round, down through the years, the John Deere No. 12-A Full-Width, Straight-Through Combine saves more soybeans in any crop or field condition.

Cutting 1-1/2 inches from the ground, the cutter bar really gets low-growing beans . . . saves down and tangled crops. The big-capacity, rasp-bar cylinder, spike-tooth separating cylinder, full-width, call-type straw sack . . . efficient adjustable cleaning chaffer and sieve, and powerful cleaning fan all mean bigger crop saving—higher grade beans in the grain tank.

Though light weight for soft or hilly fields, the No. 12-A is sturdily built. High-grade bearings, smooth V-belt drives, and slip clutch protection assure you extra years of efficient, thrifty service. Come in soon for complete details.
