How Does A Town
Get Industry;

## (The Johnson City (Tenn.) Press-Chronicle)

How does a town get new industry, anyway?
Is it by offering tempting tax concessions?
it by Undoubtediy-these things have played their part. But Anyway, many forward-looking industries are getting
aivay from the idea of holding themselves up to the high
est bidder, so to speak. They are not necessarily looking
for artificial. "inciucements. Charles R. Mason, plant
 Tual TenM, played down the old idea of "concessions"
and playedup the theme thet a town's community spirit, are of puijo 'mportance to mivistry a new Tennessee agency seeking to promote Tennesse

Contraiy to the often trles are attracted into a comminity because they are giv-
in some tremendous tax advantage or given a new plant
or some or something else handed them on a silver platter, I have
ef to run across one of those,. And wages are a declin-
mg factor in point of attriection. New industries moving South today, in my opinion, are not drawn because of low
wage rates. We in industry know that low manufacturing
costs are obtained through increased productivity and not through low wage rates, Our cimpany today pays among up there. I happen to be one of those who believe that this
so-called traditional North-South wage differential is de-
stined gradually to diminish until ultimately it will disap pear. And I think it wil be a good thing when it does, beour companion inqustries in the North airied its opera-
For nearly 40 years our company confined
thons to one plant in Orange, N. J. It had grown steadily daring that period until by 1945it occupied about 350,000
 having the space there, our company chose to gamble on
opropod location something I had never done be-
oris ind something which, tidientally, our competitors Tore ind something which, theidenially, our competitors
