Council Wants

MUST CLEAR BUDGET

City Attorney I. R. Williams made it clear that the \$1,000 allotted for recreation from non-tax city funds must go through the city's budget. He also stated that other funds given for recreation, and handled by the Commission must go through the city budget. The discussion came up after Roy Lowe, president of the Commission, announced this week that the Commission and Chamber would work to develop a joint program with an executive committee drawn from members of both groups.

While Council did not take a vote, all members of the group indicated that they did not want a commission and a committee. It was pointed out that the commission is the legal recreation group of the town and that all city-wide programs should be carried out by them. The Commission was appointed by the Council and owes its authority to the group.

During the discussion, Council passed a recommendation to the Commission that they continue to function as provided under the ordinance which created the body. The ordinance, adopted just before the March 2, election for a recreation tax, provides that all funds shall go through the city budget and that all members of the Commission shall be appointed by the Council.

Meanwhile, Norman J. Suttles, manager of the Chamber of Commerce, said today he doesn't want to see a disagreement over the recreation program. "All the Chamber of Commerce is interested in is seeing that a program is carried out," he added.

Councilmen last night did not blame the Chamber of Commerce for the combining of the Commission and Committee, but indicated that the Commission should

have gone ahead with the program held them prisoner for 29 hours, with available city funds and the expected they would be shot. Hot Suttles pointed out that the Chamber Committee was named at the request of the commission. He said there is no need for any discussion on the issue.

Sweet Aqua Dreams

So quiet you can sleep at full throttle! While not recommended practice, that is the claim made for the revolutionary "truly quiet" outboard motor shown here with Georgia Landeau in the sleeping beauty role.

The 5 1/2 horsepower unit resulting from years of Johnson research runs with a gentle purr that permits normal conversation and completely satisfactory portable radio reception at full throttle.

The new power plant utilizes intake mufflers and underwater exhaust systems which control considerable noise, but it's an entirely new principle, discovered in wartime research for the military, that really does the trick.

Through an ingenious suspension drive system, the motor is insulated from the boat, and vibrations that formerly were converted to unpleasant noise by the boat acting as a sounding board, are dissipated into thin (and quiet) air.
