WHY?**

"To Learn Why Moths Eat Clothes"

Sure We all need to learn more. Especially just why a moth likes to punch holes in our very best clothes.

My Mommy found out by experience that moths eat clothes especially where food, perspiration and other soiled spots occur.

Clothes hanging on racks or packed away with soiled spots, however small, are vulnerable to the destructive moth.

Go through your closets today and select the garments that need cleaning and bagging for summer storage.
