## Bass Grow Fast In Early Fall

Bass grow fast only during summer and early fall—a 5-or-6-month season of abundant food. The major food is newly hatched fingerling bluegills in a bass-and-bluegill pond. A pondowner, therefore, must fertilize his fishpond all summer long to grow the most pounds and the biggest bass.

Fertile water grows green microscopic algae which feeds a heavy poundage of worms. The worms grow more bluegills. The bluegills would grow in summer too if they didn't spawn. They do spawn, however, and the tens of thousands of little bluegills eat so much food that their parents cannot grow during the June-October period. (Bluegills grow larger at another season of the year—February to June.)

Some pondowners stop their fertilization program to keep the bluegills from spawning so much. This is a bad mistake. Bass cannot grow unless they are well fed. A heavier poundage of bass will help prevent an overpopulation of bluegills—by eating more during the following fall, winter and spring. This important "thinning" of the bluegill population begins in October, following their spawning season. It ends in early summer when the bluegills spawn again. Failure to maintain pond fertility throughout the spring, summer, and fall results in low production of bass.

"The best ponds—the best fishing—require good summer fertility. Next year's bass crop depends on it," says SCS technicians.

## Buckhorn Planning For Big Supper

Buckhorn Community Development Association is busy with plans for a benefit supper to be sponsored on Friday night, August 30, at the Buckhorn school house.

Funds realized from the supper will finance erection of new boundary signs and other projects now underway in that township.

Jeter Jones, chairman of the association, conferred last Tuesday, Aug. 20, with members of the board of directors from the various smaller communities in the township.

The new boundary signs, which are intended to inform visits that they are in the township, were first shown at the monthly meeting of the community improvement association, which met on August 8 at Christian Light Community Center. The monthly gatherings, open to all ages, are alternately held in various small communities which are banded together to secure township-wide improvements.

Signs shown met approval of the group and five will be erected on leading roads crossing the township.

Patrons of the supper on August 30 also can look forward to real entertainment on the same afternoon. The Buckhorn little league baseball team will meet an opponent, yet to be announced. The team is sponsored by the Southside Warehouse, and managed by Robert Steed, assisted by Jimmy Prince. Buckhorn's community development association also has contributed over \$500 to help build a playing field at Duncan to promote worthwhile sports events for the rural community.
