

WASHINGTON — The Senate Public Works Subcommittee on the Appropriations Committee has been conducting hearings on water projects. Senator Jordan and I have submitted requests for appropriations for North Carolina water projects for \$2,992,300. Recommended projects include five flood control and navigation projects, three combined beach erosion and hurricane projects, four comprehensive river basin studies, four hurricane studies requiring some additional funds, and one small flood control project which is within the purview of Section 205 of the Flood Control Act of 1962.

Navigational and flood control requests centered on funds to initiate plans for construction of the New Hope Dam on the Haw River, projects for jetties at Masonboro and Beaufort Inlets, and the Rollison Channel, and a re-evaluation study for a project at Wilmington. Combined beach erosion and hurricane projects were recommended for Carolina, Wrightsville, and Fort Macon - Atlantic Beach areas. Basic river basin studies were recommended for the Neuse, Cape Fear, Tar, Pamlico, and Yadkin-Fee Dee Rivers. The small flood control project requested was for the Swift Creek project in Pitt and Craven Counties.

These projects are fundamental to the protection and development of North Carolina's water resources. They would contribute mater-

ially to the welfare of our State. North Carolina has large amounts of rainfall, but investigations show that our growing industrialization and population needs require larger supplies of readily accessible water. Moreover our river and harbor are becoming increasingly important adjuncts of our economy. For these reasons, I have supported appropriations for North Carolina water projects.

AMERICAN LIBERTY — The American system of government resting as it always does upon the will of the governed is confronted today with many grave challenges at home and abroad. Recent events which have filled the news media give reason for all Americans to reflect on some advice Daniel Webster gave to us in a plea for constitutional liberty more than one hundred years ago. He plead with the nation as follows:

"Other misfortunes may be borne, or their effects overcome. If disastrous war should sweep our commerce from the ocean, another generation may renew it; if it exhaust our treasury, future industry may replenish it; if it desolate and lay waste our fields, still, under a new cultivation, they will grow green again, and ripen to future harvests.

"It were but a trifle even if the walls of yonder Capitol were to crumble, if its lofty pillars should fall, and its gorgeous decorations be all covered by the dust of the

valley. All these might be rebuilt. But who shall reconstruct the fabric of demolished Government? Who shall rear again the well-proportioned columns of constitutional liberty? Who shall frame together the skillful architecture which unites national sovereignty with State rights, individual security, and public prosperity? No, if these columns fall, they will be raised not again. Like the Coliseum and the Parthenon, they will be destined to a mournful, a melancholy immortality. Bitterer tears, however, will flow over them, than were ever shed over the monuments of Roman or Grecian art; for they will be the remnants of a more glorious edifice than Greece or Rome ever saw, the edifice of constitutional America liberty."

About 51 per cent of the U.S. cotton is mechanically harvested. Consumer expenditures for food increased 2.5 per cent in 1962.

Farmer, spend more than \$530 million annually for seed.

North Carolina residents in the N. C. State student enrollment for the 1962 Fall Semester numbered 5,416; residents of other states 900; and residents of foreign countries, 124.
