Pretreat to Prevent Permanent Soil Marks

Pretreat certain parts of garments that accumulate extra soil, such as collars and cuffs. Use soft brush or finger tips to sponge soiled areas with a liquid all purpose detergent or a paste of detergent and water. Prepare this paste by mixing your regular laundry detergent with a small amount of water; or dampen the soiled spot and rub detergent into it.

Treat stains promptly — Remove stains before they have a chance to set. Ask for Home Economic Agent's Stain Removal Chart so you can keep your clothes "spotless".

Load washer correctly for the cleanest, brightest wash in town. Loosely fill a washer. Pounds are an inaccurate gauge to washer capacity. The volume of the washbasket is the best way to determine wash-load capacity. 1. Choose a load of different size articles so they will move about more freely. Example: sheets, pillowcases, aprons, blouses, and shorts. 2. For a top opening washer, fill loosely — don't pack. 3. When loading the combination, loosely fill the drum half full. 4. Nylon hose or delicately constructed items should be placed in a mesh bag. This prevents hooks and buckles from snagging garments.

Sort Laundry Carefully

1. Wash heavily soiled items alone.
2. Keep dark and light colors separate.
3. Wash white nylons alone. Nylon is a scavenger. It will attract color from other clothing.
Measure Accurately
Detergents are usually recommended for laundering, since they may be used successfully

in either hard or soft water. Detergents are of two classes: All Purpose Detergents are for laundering everything in the laundry basket except wool and bright colored articles sensitive to dye. "All Purpose" detergent appears in either high sudsing or low sudsing form.

High Sudsing Types form a generous amount of suds. Use them only in top opening washers.

Low Sudsing Types provide a lower level of suds and must be used in combinations, front opening washers, or may be used by those who prefer less suds in top opening washers.

Either will do an excellent cleaning job if a sufficient amount is used. Follow the manufacturers' directions; they are written for average conditions. If your water is hard, increase detergent to the maximum amount recommended. Increase detergent for heavily soiled loads. If results are dull or gray, increase detergent usage.

HOME FROM TRIP

Mr. and Mrs. Graydon Bryan have returned after several days in Columbia, Miss., visiting Mr. and Mrs. Thomas N. Park.

From Paris comes this typically American hairdo for teen-agers. The secret is expert cutting, with hair trimmed to carlobe length and setting. The model (left) uses large rollers from front to back on the top but does not set the bangs. One of two large rollers used on each side of the head slants toward the back. Hair is rolled under on the sides and short hair at the back and sides is turned counter-clockwise and held with clips. Use a body permanent lotion or a spray to add body and dries rapidly. When dry, underbrush a hair for a bun at the crown. Add a switch or hair accessory (right) for evening wear. Sides are underbrushed but smoothed on top for a rounded look. For daytime, brush top hair back to blend with sides and back.

GRACE FOR THANKSGIVING DAY

Dear Lord, we thank Thee for this day
That turns our hearts and prayers toward Thee,
Grateful for Thy loving care
Of this dear Land of Liberty . . .

For bounteous harvests that assure
Our daily bread; for love and home,
For health and hope. But most of all,
That we are free . . . to stay or roam,
To think and speak, to teach and pray
Each as he wills. Lord, help us find,
When feasting's over, ways to share
These precious gifts with all mankind!
