Letter To The Editor:

TO THE EDITOR

I take issue with the words of Holt McPherson editor of the High Point Enterprise before the Kiwanians in Greensboro as reported in the Greensboro Daily News 8-14-64 wherein he condemned and criticized and complained against the evil of Letter-Writers charging them as "Hate Peddlers" and otherwise damaging. Let me remind him that we are in the USA and not Russia and that here editors or news media should have no monopoly or censorship of free independent speech while we remain a free society. Such remarks suggest thought control and that while many think we are in socialism, that communism is the ultimate goal. Many letter writers fear the danger of liberal editors and news media, that seeks to what they see as the last hope for free speech in the defense of liberty. Often the voice of letter writers is their only defense and protection against news management and thought control.

If the liberal editors and news media would grow up and get in step with the changing times and forget yesterday and use their power and influence in fair and reasonable and responsible manner, there would be much fewer letters. Many feel that they are being sold a bill of goods, and that Washington has the one and only recipe as the cure all of present day problems and the only solution. They often preach the false doctrine that the future lies in spending to riches and that age old handouts are necessary and essential for further progress and growth. We are passing from yes-

terday and living a new life and hope for a better future. The liberal editors and news media use so many words-relative terms-half truths-words out of context-the big lie approach-one sided opinions-on sided exposures and sectional views that they confuse and divide and cause many to wonder where we are and where we are headed. Letter writers feel that we are entitled to unbiased, good and reasonable and responsible press reporting, that will give fair, reliable and good leadership. In the present state of things it is not surprising that we have so many letter writers, who hope they can thus cause attention to be given to morality and law and order and check growing graft, greed, morals, crime, lawlessness, riots and even revolution.

Many feel that minority groups have captured the party and Washington and demand privileges that cannot be fulfilled and at unknown price for release. The real pressing present day issues are moral leadership, honest government, excessive spending and wise use of tax payers money, all of which are so necessary and essential for the preservation of liberty and freedom.

Many believe that Uncle Sam is now the Santa Claus of most of the world with little love and respect or prestige anywhere. They feel that there should be some end to the packages that Santa Claus can hand out, especially since his generosity is dependent upon the gifts of mankind and our ability to pay. Possibly we will not have to shoot Santa Claus because his packages may give out and he will just fade away. Further we should return to sanity and principle and truth and free enterprise and freedom while there is yet time.

WALTER LEE JOHNSON

MISSED THE BUS
GRIFFYDAM, England (UPI) — The local council which spent 60 pounds \$168 putting up a new concrete bus stop shelter, said today it will have to spend another 20 pounds (\$168) putting up a new one it was misplaced far away from any bus route.

"The puzzling thing," a council spokesman said, "is that while the shelter was being built no villager thought to tell us that we were putting it up in the wrong place."

Too Late To Classify

FOR SALE: Console piano in first class condition. Call Mrs. Lockewood Campbell, 892-2484, 8-26-6c

STORE MANAGER for retail hardware and farm supply store. Must have knowledge of book-keeping and experience in buying. Write giving age, education and experience to Box 70, c-o The Daily Record. All replies confidential. 8-26-5c
