Howards Using Bulk System

Farmer adoption of the bulk system for rearing tobacco may be a slow process in some places but not on the farm of Graham Howard of Angier.

Howard and son, Frank, this year have cured most of the tobacco from their 55 acres in 10 bulk barns, according to Vance Hamilton, Harnett County assistant agricultural extension agent.

They use six primers and four workers at the barns with the bulk system.

A lightning bolt shattered a large mirror in her bedroom.

Letter To The Editor

TO THE EDITOR

The Atlantic City Affair shows what can happen in a Free Society. Also it has the LBJ Brand and possibly pictures the man and draws a comparison and teaches a lesson.

At the great Coronation the master politician with an iron hand waved his magic wand and after an invitation to all, supplied with a multitude of promises and hand-outs, gave the order to be on the move to Utopia under the name of the Great Society or Welfare State.

Said Great Society proclaimed under 3 or 4 P's, however dressed up seems but the re-enactment of increased age old warmed over Al- phabetic Programs and little more than the sale of the same bill of goods under a new Formula. Before you decide that you never had it so good take a look at your old Savings Account Book and old Insurance Policies bought and paid for at 50 cent and dollar day prices and now to be paid with 50 cents rubber dollars earned at 10 and 20 dollar day prices, and you get the picture that you have about 5 to 10 cents on the return for hard earned dollars. The enemy is Inflation, of the aged that continues to grow and prosper with official approval. The Hand Writing is On The Wall. Instead of cheers and applause there should be public indictment. Materialism in the form of cheap dollars, high wages and high prices, and high living and big spending against the future and big deficit government seems the order of the day and the only way of prosperity and greater Gross National Product.

People who yet have the hope for tomorrow are divided, confused and disturbed and have become restless to the end that there is abroad over the land a spirit of protest that approaches hurricane force. People generally are tired of having about all their everyday activities subject to and under the direction of Washington and its many bureaus and agencies. No wonder that many thoughtful people see little hope and chance for tomorrow and the future "backlash" and "frontlash" sometimes we might call the "protest-lash" that silently covers the country, more deadly and not subject to the measure of any Poll because people refuse to talk out.

What scares so many Democrats and the problem of Unity: It is the man himself, the way he grew to power, the way he acts and talks in generalities, the wholeness, his love of exposure, the will and enjoyment of power, the desire to direct and control and his belief in himself and the feeling that the only hope and chance for the future lies in his own formula the Great Society that leads to Socialism and embraces Communism and approaches the Welfare State. We who read History remember that Power Corrupts and has been the downfall of many Civilizations and Nations. Many also remember the Kaiser and Hitler and the rulers of Russia and China and the troubles they caused and are causing.

Also we are reminded of the great Civil Rights Bill, which except as directed against the South, is little more than re-enacting of age old unenforced laws with the many exceptions and exceptions so it is about another "Noble Experiment" that does little to help Negroes Who Have Long Been Fenced In. It is not surprising that the race has waken up to the fact that they have been sold just a bill of goods under false color and this may account for the many revolts against officials and their leaders.
