Only detail in this costume is weltting on the yoke which continues down the back. The dress is demarcated by a huge self stole. Teal Trains' reversible for, and camel coat of lightweight British wool (right) is worn with a two-piece elongated check worsted dress.

Sweeteners Detrimental To Health

WASHINGTON (UPI) — The Food and Drug Administration (FDA) is studying whether artificial sweeteners might be detrimental to health.

Deputy FDA Commissioner John L. Harvey said Tuesday the study was prompted by an increase in the use of sugar substitutes, particularly in carbonated beverages.

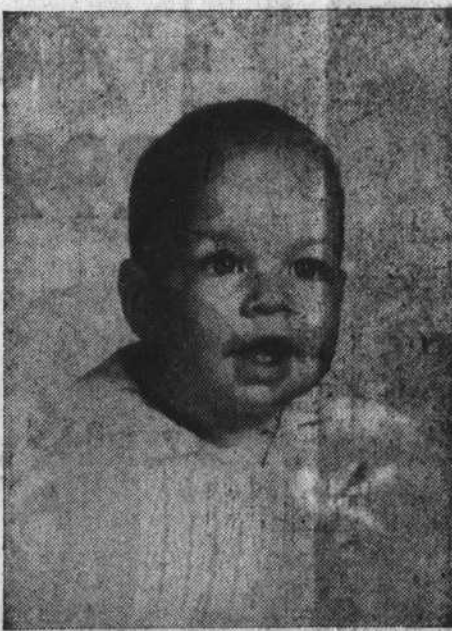

Chief sugar substitutes are saccharin and cyclamate. Due in large part to the popularity of low-calorie soft drinks, artificial sweetened foods and drinks are being widely consumed.

The FDA has considered in the past that moderate use of artificial sweeteners and artificial sweetened foods generally was safe.
