## Declares It's No Longer A

WASHINGTON (UPI) - Presient Johnson today recommended close-meshed federal, state and ocal attack on what he called the malignant enemy" of increasing crime throughout the nation.

In a special message to Congress he urged legislative action, includng a new law to ban all firearms shipments across state lines. The only exceptions to the mail order ban would be importers, manufacturers and dealers licensed by the Treasury Department.

Johnson stressed that the starting point of any war on crime rested with the individual citizen who must help law enforcement officials rather than merely criticizing.

The President conceded there vere disturbing statistics involving crime among juveniles but point. ed out that only a small proportion of American youth was in. volved and that most youngsters lead law-abiding, creative lives.

In a lengthy message to the House and Senate, the Chief Executive said there was no suggestion of federal interference through a national police force in the primary police responsibilities of state and local governments.

But Johnson said "crime is no longer merely a local problem." ness" which is costing the coun- sively to the decision that could try tens of billions of dollars an- decide whether he is executed, (Continued on Page Six)
