## Impromptu Fishing Trip Produces Happy Results

An impromptu trip to the HOT HOLE in Belmont last Saturday produced four happy fishermen, in the persons of Curtis Wallace, Ben Jay Jackson, Percell Bridges Jr., and James Massey.

The trip, which they say they hadn't planned, produced nine fish in all. Two lunker cat

fish, one weighing nine and a quarter pounds and the other eight and a quarter pounds. The cat fish bit live shiners (shad) fished on the bottom just behind the flood gates of the Catawba River.

They also caught two carp, one four pounds and one 14 pounds, who also struck shin-

ners. Four smaller cat fish and a half-pound bream rounded out their catch.

Ben Jackson and Purcell "O. D." Bridges say they go fishing at least once a week but last Saturday Curtis Wallace and James Massey just happened to go along.

## Manpower

### Get \$1.2 Billion

Continued from page 1 amounts where the composition of prime sponsor areas changed between fiscal 1975 and 1976. Final allocations will be based on the actual Congressional appropriations for fiscal 1976.

Dr. Dunlop pointed out that the funds announced today are not primarily for public service employment, although prime sponsors may, and earmark some for this purpose. Regular public employment funds are appropriated under Title II and Title VI of CETA.

The 433 prime sponsors that have been accepted to operate fiscal 1976 programs are 30 more than in fiscal 1975. Approximately 14 percent of the 433 are cities, 41 percent are counties, 32 percent are consortia, and the remainder are balance-of-state programs, rural Concentrated Employment Programs (CEP), and territories.

Wattlebird (See Vol. 21) Has bell-like call and wings of a bird, but prefers to travel by foot. Hunts forest floors for meat, bounding left and right like a frog-pong ball.

Horseshoe Bat (See Vol. 9) Night flyer with webbed ears. Follows his horseshoe-shaped nose to food by using his ears. (Bulld by the echoes of his squeaks.)

Coral (See Vol. 5) Tiny, marine organisms with mouths, stomachs and tentacles. By multiplying, they form spectacular reefs, sometimes a thousand miles long.

Tree Frog (See Vol. 20) Springs from branch to branch like a trapeze artist. Suction-cup toes keep him from falling off. His voice is more clank than croak.

Koala (See Vol. 10) Loudest voice in Australia, heathiest odor. (He eats eucalyptus leaves, smelts his cough drops.) Also known as bangaroo, koolaroo and Yoddy Bear.
