Trichology Corner

Mr. Charles R.B.

QUESTION: Are Salon services higher than the regular Beauty or Barber Shop prices?

ANSWER: No. Regular cuts and press and curl hair services are the same. But Salon services such as custom design styling, reconstruction, precision hair cutting, custom coloring, hair analysis, counseling, hair piece service, hair replacement, skin care, folliculosis and other highly technical services by trained and registered stylists or trichologists are generally, to some degree used as needed to get complete and proper service. A stylist or trichologist will not be able to give an exact price until the work is personally analyzed in order to determine what needs to be done to get the desired results. As with most professionals, if you pay for their services, you must follow their instructions to get the best results.
