"BUT MY BACK DOESN'T HURT!"
 Have you ever asked yourself this question... "Why does it seem that I'm always aching?" Most of us try to eat the right things and get plenty of rest and proper exercise, but despite this, you still can have health problems. Most people don't realize that the very cause of their problems could be fixed directly to a misaligned vertebrae in their spine. The next thought most people have is... "A misaligned vertebrae in my spine? But my back doesn't hurt!" This is where most people don't understand what Chiropractic is all about. Regular Chiropractic visits don't just keep your back from hurting, they keep the vertebrae in your spine in proper position, allowing proper nerve energy to flow to every part of your body. Proper energy is what helps insure good health. Don't put off good health... Call Dr. Richard or Vicki Prosser at the Prosser Chiropractic Clinic to see if your health problems have a Chiropractic solution.
