**Trichology
Corner**

Mr. Charles, R.B.

QUESTION: I use a grease in my hair that causes my scalp to itch and burn. What is wrong with it?

ANSWER: Probably nothing. Many people have strange allergies to many simple products or simple ingredients in the products. Some people have allergies to tomatoes, nuts, rice, nutmeg, Bergamont and many items too numerous to name. Get your trichologist or stylist to recommend or change that grease to one that has other ingredients and does the same job. But also watch out for heat and stress. It will give some people the same reaction.
