**Helen Green
Receives Social
Welfare Degree**

Miss Helen Edwina Green, having completed degree requirements in the field of Social Welfare, was one of 70 young women to receive the baccalaureate degree from Bennett College, a liberal arts college for women in Greensboro, N.C.

She is the daughter of Mr. Joseph E. Green Sr. of 3100 Clearview Dr., Charlotte.

Pregnancy Rates

Pregnancy rates of teens in Charlotte-Mecklenburg increased in 1983 for the second year in a row. The 2,269 pregnancies recorded in 1983 mark a 12 percent increase when compared with 1981.

Each day six Mecklenburg teens become pregnant. Three will have abortions; three will go on to give birth. Although pregnancies to young teens (those 14 and under) have increased dramatically, older teens are particularly "at risk." In Mecklenburg County in 1983 nearly one out of 10 15-17 year olds and one in six 18-19 year olds became pregnant alone.

Teenage pregnancy involves significant social as well as personal costs. Babies born to adolescents have higher rates of birth defects and are more likely to be born prematurely. As they grow, they are estimated to be 100 times more likely to suffer from child abuse. The community bears the significant financial costs of teen pregnancy. The Mecklenburg Council on Adolescent Pregnancy estimates that teen births in one year, in this community, will cost nearly \$17 million over the next 20 years.

If this trend continues, many of these babies will grow to become teenage parents themselves, their mothers will become grandmothers in their early thirties and they will become great grandmothers who are not yet fifty.
