ways get to the black community. Blacks often don't trust white practitioners. Trust is important. We want to motivate children at a very young age to look at health care as a profession," Brown said.

Sex Practice Is Not Taboo

fact that the genital area and the anus are the places of exit for body waste. There are, also, religious pronouncements against oral sex. This area of the body is, however, often cleaner than the mouth. You must decide for yourself, if you are able to tolerate the historical taboo against oral sex. There is no sound medical argument against it.

Government waste...a bad problem that just keeps getting worse. Every year we pay more in taxes and every year more of our hard earned money goes down the drain. Instead of paying for better schools for our kids, it pays for government perks. Instead of paying for safer, drug free streets, it pays for even more layers of government bureaucracy.

Now, the new federal budget raises some taxes retroactively, but delays most spending cuts until 1997. This is the final outrage. It's time for the American people to put their collective feet down and demand that the wasteful spending stop... before the government asks for one single dollar more in new taxes.

On September 22, the President introduced a plan requiring hundreds of billions of dollars in new spending and taxes to reform the health care system. Some of the new taxes he has proposed are on everything from employees, small businesses and employee benefits, to consumer products such as alcohol and tobacco.

If you and your neighbors call your representatives and tell them to cut spending before raising taxes, we can stop it. To find out how to contact your elected representatives, call toll free 1-800-576-9922 today.

Enough Is Enough.
