NEW AGRICULTURAL WORK.

AGRICULTURE, its essentials and non-essentials, including an examination of GUANO, and other manures; by H. N. FRAYNT, of New Jersey. This work, besides the general information it contains, will be found to be a valuable guide to the Farmer, Planter and Agriculturist. In pointing out the essentials and non-essentials to be furnished to their lands, the secretion of such fertilizers as the soil wants, and the avoiding of such as it does not want, is pointed out in plain terms, and will ensure a saving of time and money to all who follow its advice. At the South, where exhausted lands require something to restore fertility, which as yet does not appear to have been found, this treatise will be of the first importance: indeed the tiller of the soil in every section, cannot but be benefited by a perusal, as it lifts the veil of uncertainty, which has hitherto enveloped the science of Agriculture. Price, in Paper—25 cents. All orders to be addressed to T. L. MAGAGNOS, Publisher, 16 Beekman Street, N. York. For sale by all Booksellers. October 26, 1854. 24-3/4-1/2.
