TTENTION of purchasers is respectfully called to a A new and gigantic invention in Pianofortes new fully perfected, and before the public, known as HALL's CELESTIAL TRIPLE-STRINGED PIANO. The peculiarity of the CELESTIAL PIANO consists in its capacity for octa-

vo playing with the single finger, an attainment hither-to unknown to the Pianoforte. The most ordinary performer is enabled by the aid of this improvement to produce effects in octavo playing that would confound a Talberg or a Listz. One of its chief excellences is its capacity to be used as an ordinary Piano of the sweetest quality of tone, and is instant. from and after the present session of Congress, the Conly changed by the use of a common pedal to a combination so thrilling and majestic, as to captivate and charm the heart. These instruments are superior in power to two ordinary 7 octavo Pianos, while for sweetness, purity, breadth, and richness of tone, they challenge the

competition of the world.

This is the united testimony of Professors and Amateurs who have tested the Celestial Piano. Ordinary Pianes of all sizes, new and second hand for sale at re-

THE GLOBE: The Official Paper of Congress, and Newspaper for the People.

Lord Brougham, in his "Historical sketches of Statesmen who flourished in the time of George the Third," gives will publish this prospectus. some remarkable examples, showing the great less sustain-ed by Eugland in the history of its statesmen, and of its mendations, to obtain subscribers. JOHN C. RIVES. national progress, through the imperfect state of parliamentary reporting in former times. He opens his life of Lord Chatham thus:

"There is hardly any man in modern times, with the exception, perhaps, of Lord Somers, who fills so large a space in our history, and of whom we know so little, as Lord Chathen; add yet he is the person to whom every one would at our point, if desired to make the most succoasted states and a most brilliand or that this courtry ever product. At Land Somers, indeed, we can scarce. They be said to be a receiving dead. That he was a person, of unlarge course and setting factor of great capacity and learning, a regard of a full blody, but a contions and safe counsely rise assist fixed temergeness, all are ready to practical as I make a sed over their proceedings, the serviews which he was the tembled to render in of gring the constitution one though the most trying times, and says ing us from arbitrary power without paying the price of our liberties in action and bloodshed nay, conducting the whole proceedings the revolution with all the del beration, and almost a the forms, of antordinary legal prorociting. have sortened did a rome with a mild yet imperishable glars, which is the district of our dark ignorance respecting all the core dat is and details of his life, gives the tigare smalle granted the most rious and deat. It is now here, and notified with a special regression. As a state-general regression to the state of the reached as; while of his written compositions but a few letters have hitherto been given to the world.

"The imperfect state of parliamentary reporting is the reat cause of this blank." What Somers and Chatham have lost in fame by the oblivion of all the masterly efforts of their minds, which, of the nation has also losi for want of the vigor and verity,

the clearness, the freshness, and beauty with which its events and their causes might have been preserved in the luminous eloquence of its oratrrs. The great mon who conducted our revolutionary struggle n the great Continental Congress have left no history behind them of the views and events which had their birth in their debates, except in the meager formula of a journal. The fervid feeling of the hour, the impelling r cum tances, the argument, the eager controversey, which set the subject in every variety of light, passed away with the breath that gave them utterance; and men who were not surpass-ed, in the opinion of Lord Chatham, by "the master statesmen of the world," have bequeathed to posterity nothing of the eloquence which guided our national councils but "the shadow of a name." Recent publications show how raphic history becomes when the actors in it speak for themselves, and events as they emerge stamp themselves on its page. Congress has now taken care that this sort of genuine history shall fall from the press, full and perfect, day by day; and thus every public man will make his own history, and blend it imperishably with that of his country The Congressional Globe and Appendix is so voluminous that it can only be read by our busy countrymen partially during its progress. Some are interested in one measure, some in another. Different sections look for the most part to the action of their several representatives—the concerns

of one frequently possessing no interest for the rest-and amidst the mass it is difficult for each section, or individual, to get at the special matter most interesting to them. To obviate this, and enable all to get a glance, a general view of the entire proceedings of Congress, and to fix their attention on what suits their particular views, I will publish in future, in addition to the Daily Globe and the Congressional Globe and Appendix, a Tuesday's Congressional Globe, containing a brief of each day's debate on every important subject discussed during the preceding week, arranging the nan es of the speakers pro and con., and presenting the points discussed and leading arguments on each side, somewhat in the mode in which foreusic briefs are prepared. This paper I will send gratuitously to every subscriber to the Congressional Globe and Appendix; and to those who may consider their summary sufficient without them, the subscription price for this weekly will be two dollars per an-

The brief synopsis of debates will fill but a small part of the contents of this weekly sheet. It will contain every important item of foreign and domestic news which can be gleamed from the daily prints during the week, together with that which may be brought by telegraph at the moment of going to press. It will contain, besides, the interesting miscellany which is given in the Daily Globe, and the Washington gossip of the letter-writers, extracted from the different newspapers which employ them, whenever they shall be esteemed of such import as to interest the readers of the Globe, and bear such probability on their face as to warrant their insertion.

As this weekly paper will be sent to all the 'subscribers for the Congressional Globe and Appendix, it will certainly have a more general circulation than any other newspaper in the United States, and will, therefore, invite advertisebbls. The Congressional Globe and Appendix will also be printed on a double royal sheet, in book form, royal quarto size, each number containing sixteen pages. The Congressional Globe will be made up of the proceedings of Congress, and the running debates as taken down by the reporters. A complete index will be made soon after Congress adjourns, and sent to all sub-scribers for the work. Should any numbers fail to reach subscribers, they will be sent to them without charge, whenever they advise me what numbers they have not received. Subscribers should be careful to file all the numbers received, as the complete work will be found to be very valuable to them, and the expense of farnishing missing numbers very expensive to me.

For the last ten years, I suffered from a derangement of the Liver and Stomach, and was reduced to such an extremity that I gave up my Ship, never expecting DR.
