AMERICAN TALK

Let every American patriot swat the spy. Report every suspicious act and disloyal utterance to the police or to the nearest United States District Attorney, or Federal officer, Re- 1* port also those who violate the well . established laws and rules made for the controling of the resources of the nation and the winning of this war.

The nation's one big job is to make war against the Huns, make war with force and determination. As President Wilson says, "force to the utmost, force without stint or limit." Every man and every woman and every little child should and must fight against the enemies of America, Wmust win or go down, and every one at home must help with every ounce of strength and every resource and every dollar they have.

Ladies working at the surgical dresings work rooms on Thursday made more than a thousand pieces of one mult stem greatly needed in the med-'cul department. These few ladies worked long and earnestly on this eav to bring their average up to the expectation. By reason of small intarest, few workers, they fell behind on the March allotnient and are workmy now to catch up. The wounded are coming in to the hospitals in France by the thousands, many of trass wounded are our boys-American boys. How can American women refuse to heed this call? When the need is so great, when the demands are so urgent, when the women are asked to furnish so much-not for themselves, or some folks at home-Lat for the wounded and dying from the battlefield-why is it, how can American women remain away and refuse to help? Just a little handful are working, you can almost count them on the fingers of two hands.

The Red Cross has begged, the ladies have consumed much energy and lots of newspaper space urging action, begging help, and there is small response, only the steady, ever at it of the little band of loyal, faithful ones, few new faces. The great majority walk by on the other side of the street and offer no aid to these Will Be Held With the First Con- Chairman Plunkett of the Convention boys from the battle line.

Yes, the one big task of this nation is to win this war. Candidly, we have not made the headway that we

Captain Heudtaux, on the left, has | Boche machines, but those which downed officially twenty-one German fell within the German lines were not airplanes, and is the second French counted. Lieutenant Beuois has "ace." He has really put down sixty seventeen enemy airplanes to his

credit.
