Bible Thought for To-Day

EVERLASTING LIGHT:—Thy sun shall no more go down; neither shall thy moon withdraw itself; for the Lord shall be thine everlasting light, and the days of thy mourning shall be ended.—Isaiah 60:20.

That Raleigh carrier had a crude idea of a practical joke and his position following the death of the young woman ought to lead him to think several times before acting.

More than fifty thousand dollars is being put into a new hospital at Shelby, the contract having just been let for the building. Shelby is a small town but is appreciative of the need of a hospital and goes at the job in proper manner.

Captain Frank Robbins, of Lexington, celebrated his eighty-ninth birthday quite recently and the Raleigh News and Observer says of him: "Brave soldier of the confederacy, honored public leader, Christian patriot." Captain Robbins for many years the leader of the Davidson bar and he has many friends who rejoice in his good health at the ripe age of 89.

THE COMMUNITY FAIR.

The community fair is decidedly a community asset. It is taking the place of the old county fair which is rapidly losing out all over the nation, and it is doing more than that, it is developing a community spirit, a brotherhood among people that will go a long way towards benefiting human relationships. Two community fairs held in Rowan last year proved all that could be expected of such undertakings. True it was a hard, dry year and the farm products did not show up to the very highest degree, but even with this serious handicap the fairs were well worth the effort and were amazingly pleasing. This year the season has been far better throughout the county, the experiments proved successful and a definite organization is undertaken, to the end that the whole county may be appealed to and organized in holding community fairs.

The organization is headed by Mr. J. S. McCorkle, a prosperous and successful farmer, who has had experience in community fairs, having been responsible for some of the early successes in the county. With him are associated a number of men and women who are leaders in their individual communities, and back of the whole movement and co-operating with the organization will be found Mr. Yeager and Miss Edwards, who are always working in the interest of the farm and the farm community.

The Evening Post is a believer in the community fair. It believes that they will do much good, in many ways, and it would be glad to see at least a dozen held thru-out Rowan this fall. It would like to see, and we believe that we shall see, Salisbury fully co-operating in making these fairs a big success. The people of Salisbury can and will find many ways by which they can help the whole big idea along.

"CENSORED."

Will Hays, official dry cleaner for the motion picture industry, says the producers are going to attack censorship by eliminating the necessity for it. This sounds sensible. Seeing will be believing. Observe that he admits the "necessity." The theatrical profession has been fighting censorship so long that the earliest records are lost. Modern boards of censors date from 1842 when the Long Parliament in England suppressed the theater entirely. Chief reason for this, according to the elder Disraeli, was that the members of

Parliament had smarted so much under the satirical whips of the dramatists. This censorship was political, as all forms of censorship tend to become unless they are curbed by the will of the people. Theatricals eventually had to be permitted again in England, because the politicians could not stand up under the brilliant sarcasm of songs and petitions circulated by stage writers. Most famous of these was the "Ramp Song." Here's part of it:

Now while you reign, our low petition craves That we, the King's true subjects and your slaves, May in our comic mirth and tragic rage Set up the theater and show the stage— This shop of truth and fancy, where we vow Not to act anything you disallow. We will not dare at your strange votes to jeer Or personate King Pym with his state-fier. Your tragedies more real are expressed; You murder men in earnest, we in jest.

Actors at that time had the legal status of vagabonds. But the battle between the stage and politicians kept up until the stage won. Censorship in 1842. The critics are stewing about it now, as they were nearly three centuries ago. People seem to have the same basic troubles and problems, in varying degree, in one generation as in the next. "Holier than thou" attitude in human nature is asbestos in the fires of time.

With and Without Comment.

Says the Charlotte Observer:

One of the men in the employ of the Southern admits there was "much logic" in the Observer's recent editorial on the seniority matter, and himself makes suggestion of a way out of the difficulty. He points to the fact that the Southern has made no "written agreement" with the new men, and therefore the Southern would have no reason to stand by them. In other words, President Fairfax Harrison, "whom we all consider one of the biggest men of our time," is advised to throw these men out the door because he has had "no written agreement" with them. Looks like a case of putting their regard for the president as an asset in influencing him to do a manifestly unjust act, whereas, on the contrary, Fairfax Harrison's word should be regarded as good as his written pledge by the men who have given him their loyal admiration. Again, the Southern shopmen should prove appreciative of the fact that the Southern "has not yet hired anything but common labor to go into its shops and do the emergency work under the roundhouse foreman and the officers of the company."

And they must have felt sorry for President Harrison when an engine pulling the Sunday morning train from Salisbury to Asheville made the trip with one entire plate boiler of sheet iron missing from the boiler, exposing the shattered coating of asbestos. The Observer, however, has had reason to believe that no set of men in the nation are more desirous of seeing the strike settled than the men who are working under Fairfax Harrison.

Says the Raleigh News & Observer: Why Hiram Johnson silent? The Ohio State Journal opines that as soon as he gets already prohibitory rates for California products increased 300 per cent this great heart will resume bleeding for the common people of the entire country. Business before pleasure.

A wise selection was made, thinks the Charlotte News, in placing R. M. Miller, Jr., at the head of the Davidson College campaign to raise the money. The News says: The authorities of Davidson College could have made no finer selection of a man to head its campaign for an endowment of \$600,000 than Mr. R. M. Miller of this city who, in addition to being a loyal alumnus of that institution, is an executive of proven capacity. Mr. Miller's interest in the permanent success of Davidson College coupled with his splendid powers as an organizer and as an executive argue hopefully for this great movement to make Davidson a greater institution.

And why should it not become one of the South's most notable institutions of higher learning? It is properly situated and it is a college maintained under the auspices of a denomination that is rich enough in the South to have any sort of a college it may elect.

Congressman Doughton thinks that the development of Muscle Shoals would mean cheaper fertilizer for farmers at reasonable rates. In a recent interview Mr. Doughton said this relative to the failure of congress to take action looking to this big development: If the congress would benefit the agricultural interest and the country generally it ought to hasten to accept Henry Ford's proposal to develop that greatest of all water powers in this country, but I am afraid that sectional prejudice will prevail, as it seems to have done so far, and thus deprive us of a national blessing.

Undoubtedly "sectional prejudice" as used by Mr. Doughton also includes partisan prejudice. When Mr. Ford, who would not spend a penny to promote his candidacy for the senate but who exposed the purchase of a seat in the senate by Newberry when Mr. Ford did that he won the unifying hatred of the men who depended upon Newberry's vote to give them control of the senate.

John Paul Lucas read a very able paper on water power and the hydroelectric power of the state at the recent meeting of the North Carolina Press Association which met at Shelby, and a few scattering paragraphs are herewith taken:

According to the United States Geological Survey, North Carolina has slightly less than 2% of the water power resources of the United States and not quite 3% of the waterpower resources east of the Mississippi river. According to this same authority, the maximum power resources of the State total \$75,000 horsepower. The North Carolina Geological Survey has made a recent estimate that, with storage, the waterpower resources of the State are possibly 1,000,000 horsepower.

Competent engineers at the recent Southern Appalachian Waterpower Conference at Asheville declared that if properly developed, with proper storage and figuring on a 12-hour day, the waterpower resources of North Carolina are not less than 2,000,000 horsepower. This estimate is corroborated by the North Carolina Geological Survey.

It must be remembered that the estimates of the United States Geological Survey were based upon data compiled many years ago and largely upon engineering practices and apparatus then in vogue. I was interested to note in an old report in a bulletin of the North Carolina Geological Survey an estimate of 2,300 horsepower as the power available at the Mountain Island site on the Catawba river. A report of the United States Geological Survey, a statement made that, with storage at this point, probably 7,000 horsepower could be developed. As a matter of fact, the hydroelectric plant which is under construction at that point at this time will develop \$5,000 horsepower. The energy to be developed there will be equivalent to between 500,000 and 600,000 tons of coal a year. The maximum capacity and usefulness of the waterpower resources of North Carolina is going to be determined by the vision of the men who develop them.

The waterpower of North Carolina is a great natural resource and, in the interest of the whole people, every site should be developed to its utmost capacity and in the most economical and efficient manner. When a waterpower site is half way developed, the margin of its possibilities above its actual production is to all intents and purposes destroyed.

North Carolina has the greatest opportunity that has ever been open to her if industrial leaders and investors can be induced to develop her waterpower resources as rapidly as there is a demand for electrical energy. No one man and no single group of men can be depended upon to develop all of the waterpowers of North Carolina or to develop the waterpowers of the State as rapidly and over as wide a territory as they should be developed if the tremendous and ever increasing demands for electricity are to be met, and if the industrial expansion of the State is not to be restricted and held back.

The development of waterpower has its hazards and its uncertainties and before capitalists and investors put their money into such an undertaking they must be convinced that their enterprise, which by law is regulated as to service and to rates is going to get a square deal at the hands of the public and the representatives of the public.

Let me give you a further idea of what hydro-electric development will mean in the progress and development of industrial North Carolina. It has proven out in practice that for each dollar invested in hydro-electric development from \$5 to \$3 is invested in the industries that use the power generated. And to be added to these figures is the incidental investment in housing, new stores, and other enterprises that go to help make up the new community.

In North Carolina last year the value of goods produced in our industries per horsepower used was more than \$5,000. Again, every time one water horsepower is developed five and a half to eleven tons of coal per year are saved, depending upon whether the power is generated over a 12-hour period or over 24 hours a day. Every time 5 hydro-electric horsepower is developed the labor of one man is released for other uses.

Forgetting the past is all right but don't forget the future. If you didn't already know it, golfers address the ball; and when they get the wrong address it goes astray. In Boston, they cure lispings by whistling. Bet the dogs are running themselves to death.

Mars is leaving the earth at the rate of 40,000 miles an hour. One good look was enough.

GLENN E. PLUMB DIES OF HEART AFFECTION Washington, Aug. 2.—Glenn E. Plumb, counsel for the 16 larger railroad labor organizations and author of the celebrated "Plumb plan" of railroad operation and ownership, died last night. Death was due to an affection of the heart from which he had suffered for several months.

There are more than half again as many taxicabs in Havana, Cuba, as there are private cars.

And The News & Observer adds:

Tom Sims Says

Too many people who went to school can't prove it.

Flapper clothes don't always show the wearer's age.

A man's bills usually haunt him when the ghost walks.

It takes a lot of brass to start an amateur brass band.

Some people read movie subtitles with their cut-outs wide open.

The average man's idea of interior decoration is a square meal.

Despite Russian relief plans, there is no relief from Russia.

This may be an awful country, but in Madagascar, law compels everyone to work at least 180 days a year.

Doctors say more blondes than brunettes have hay fever. May be why they are dizzy blondes.

No wonder Germany is broke. She is trying to sell cotton stockings in this country.

These Wall Street men going back to the farm had better hide when hog-killing time comes.

There are 27,000,000 horses and mules left in this country, not counting chronic reformers.

These sideburns are hard on cheek-to-cheek dancing.

Staunton, Va., has more women voters than men. Maybe the men can't get way from home to vote.

A cat may have nine lives; but wildcats still seem to have ninety.

Most of the rich act poor and most of the poor act rich.

Wonder if you can suss around a girl in knickerbockers?

You can't get close to some people because then you would get next.

A CAREER. (By Bertin Braley.) Too long I've been dubbing away at the game Without any Serious Purpose in View. My putting's been doubtful, my driving's been lame, I slice and I hook and I don't follow through. But now I shall do as a golfer should do, And study the very best methods of play. I'll hire a professional's services too; I'm taking up golf in a Serious Way! My business has had far too much of a claim On time I have needed for golf, it is true; So I have quit working for wealth or for fame, And golf is the trade I shall henceforth pursue. I've bought fifty clubs that are perfectly new; They cost me a fortune, but golfers must pay. I'm thinking, at that, my supply is too few; I'm taking up golf in a Serious Way! I've hired me a trained to build up my frame; I read all the golf books, and there are a slow; From dawn until dark every day is the same; I practice in hope that some skill may accrue; The day my wife left me my game went askew, And most of my shots in the rough went astray, But though for a while I was terribly blue, I'm taking up golf in a Serious Way! ENVOY You say that the world's in a hullabaloo? With Great Events happening, day after day? I haven't the time to discuss it with you, I'm taking up golf in a Serious Way! SCARS. (By Dr. R. H. Bishop.) It is seldom you see people these days with ugly scars, because science has learned how to treat wounds so as to eliminate them. A scar is a new formation of connective tissue replacing normal structures lost by injury or disease. Sometimes a heaped-up scar formation follows slight burns, causing a constant drawing sensation. It is difficult to relieve, tending to recur even after the most skillful plastic surgery, though such surgery offers about the only chance of relief. In a scar there are no hair follicles or natural skin furrows. Hence scar tissue never looks quite natural. When a considerable raw surface is to be covered, skin grafting always should be employed. This is perhaps the simplest of surgical operations, the one essential being asepsis, that is, absolute cleanliness without antiseptic chemicals, which destroy new skin cells more readily than they destroy the bacteria themselves. The best application for a fresh wound or burn is sterile petrolatum, commonly called vaseline, to protect the raw surface against the sticking of dressings. Scars may be materially improved, so far as appearance is concerned, by the intelligent use of plastic surgery, which any competent surgeon understands. X-ray treatments improve the appearance of some scars.

Pile Sufferers Don't become despondent—try Dr. Leonard's HEM-ROID—no greasy salves—no cutting—a harmless remedy that is guaranteed to quickly banish all misery or costs nothing. People's Drug store. NOTICE TO CONTRACTORS. The Mayor and Board of Aldermen of the City of Salisbury, N. C., will receive sealed proposals at the City Hall until 12 o'clock noon August 14th, 1922, for furnishing all labor and materials and paving certain Streets in the City of Salisbury, N. C., in paving Districts 18 to 27 inclusive, as described in the specifications hereunto attached. The quantities given are approximate only assumed for the purpose of comparing bids. These quantities may be increased or diminished within reasonable limits at the option of the City. All asphalt or bitumes from whatever source shall comply with the requirements of the American Society of Municipal Improvements, and said requirements shall be a part of these specifications. Bids must be addressed to W. B. Strachan, Mayor, Salisbury, N. C., endorsed "proposal for Paving," and must be received not later than the hour stated above, and no bid can be withdrawn after that hour. Prices must be written both in words and figures. Each bid must be accompanied by a certified check for \$2,000.00 as a guarantee that within ten days after notice of award the successful bidder will enter into the contract proposed. The check to be made payable to W. B. Strachan, Mayor. The amount of the certified check will be returned as soon as the bidder is awarded. The check of the successful bidder will be retained as a bond for 25 percent of the amount of the contract has been executed and filed. When contractors bid on several kinds of pavement only one check will be required. The right is reserved to reject any or all bids. APPROXIMATE QUANTITIES: 15840 sq. yds. Bituminous sheet Asphalt or Toppak Pavement on 4" concrete base, or Concrete Paving 7" thick. 15185 Lin. Ft. Granite Curb 5"x18" 865 Lin. Ft. Granite Curb 5"x18" Circular. 2980 sq. yds. Concrete Gutter 2 ft. wide, 6" thick. 12100 Lin. Ft. Combined Concrete Curb and Gutter, 1-2-3 mix. 18" Storm water Inlets, Brick complete. Cast Iron Grate and curb, plate. 7500 cu. yds. excavation. Specifications and blank form of proposals may be obtained from F. W. Webb, City Engineer, Salisbury, N. C. W. B. STRACHAN, Mayor. G. M. LYERLY, City Clerk. F. W. WEBB, City Engineer.

NOTICE OF SERVICE OF PUBLICATION North Carolina, Rowan County, F. A. Miller, Petitioner. Against Maggie Oakley and her husband, C. E. Oakley, Bessie Gant and her husband, Walter Gant, Willie Cain, Carr Cain, Walter Cain, Lizzie Britt and her husband, Eleazer Britt, Defendants. Carr Cain and Walter Cain, two of the above named defendants, were taken notice that an action entitled as above has been commenced in the Superior Court of Rowan County, North Carolina, and that a division in which they own an interest; and the said defendants will further take notice that they are required to appear at the office of the Clerk of the Superior Court of Rowan County, North Carolina, on the 19 day of August, 1922, and answer the complaint and petition, a copy of which has been deposited in the office of the Clerk of the Superior Court of Rowan County, and let them take notice that if they fail to answer said complaint, at that time, the plaintiff will apply to the court for the relief demanded in said complaint or petition. This 18th day of July, 1922. J. F. McCUBBINS, Clerk Superior Court, Rowan County, N. C. onsw for 4wks.

NOTICE OF REDEMPTION To Holders of Victory Notes and Others Concerned: Notice is hereby given as follows: 1. Detailed information as to the redemption of 4% per cent Victory Notes. 2. All 4% per cent Victory Notes, otherwise known as United States of America Gold Notes of 1922-1923, which bear the distinguishing letters A, R, C, D, E or F, prefixed to the serial number, and which were designated for redemption by the Secretary of the Treasury, are called for redemption on December 15, 1922, pursuant to the provision for redemption contained in the notes and in Treasury Department circular No. 185, dated April 21, 1922, under which the notes were originally issued. Interest on all the 4% per cent Victory Notes thus called for and redemption will cease on said redemption date December 15, 1922. 3. Detailed information as to the presentation and surrender of 4% per cent Victory Notes for redemption under this call is given in Treasury Department circular No. 239, dated July 25, 1922, copies of which may be obtained from the Treasury Department, Division of Loans and Currency, Washington, D. C., or any Federal Reserve Bank. A. W. MELLON, Secretary of the Treasury.

SOUTHERN Railway System Announces Greatly Reduced Week-End Fares Salisbury to Badin, N. C. \$1.50 Round Trip \$1.50 Tickets on sale for all trains Saturdays and Sundays, limited good to return before midnight Monday following date of sale. Excellent opportunity take in the bathing beach at the Lake at Badin. For further information, tickets, etc., call on or write: Mr. T. J. Anderson, Ticket Agents, Salisbury, N. C. R. H. Graham, Division Passenger Agent, Charlotte, N. C.

ATTENTION Wage Earners! Consider the advantage of "Money in the Bank" ready for any need which may arise, and you'll at once begin depositing every spare dollar you can at Our Saving Department.
