Strong Healthy Women

If a woman is strong and healthy in a womanly way, motherhood means to her but little suffering. The trouble lies in the fact that the many women suffer from weakness and disease of the distinctly feminine organism and are unfitted for motherhood. This can be remedied.

Dr. Pierce's Favorite Prescription

"Pavorite Prescription" banishes the indispositions of the period of expectancy and makes baby's advent easy and almost painless. It quickens and vitalizes the feminine

organs, and insures a healthy and robust baby. Thousands of women have testified to its marvelous merits. It Makes Weak Women Strong. It Makes Sick Women Well. Honest druggists do not offer substitutes, and urge them upon you as "just Accept no secret nostrum in place of this non-secret remedy. It tains not a drop of alcohol and not a grain of habit-forming or injurious drugs. Is a pure glyocric extract of healing, native American roots.

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children-Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregeric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea-The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of Chart Hetcher. The Kind You Have Always Bought

In Use For Over 30 Years.

What Makes Fertilizer Cheap?

Exactly the same thing that makes shoes cheap, and clothes cheap-that is, the use of inferior material. If you get "stung" in the purchase of a suit of

clothes, you can buy another one. If you get "stung" with cheap and inferior fertilizer, you are permanently and incurably disabled for

the year. You lose your labor and the proper income on the land. If one fertilizer analyzes 8-3-3, it isn't necessarily exactly lide another 8-3-3. There may be a difference in the availibity or solubility, just as there are differ-

ences in the digestibility of food. Some manufacturers, who are striving for cheapness, may get their ammonia from scrap leather or hair. The land can not properly digest such material and hence this sort of fertilizer is cheap in name only. It is very expensive if it is the cause of your getting half a bale of cotton where you are entitled to a bale.

It does not pay to take such chances-not if it takes a year out of your life.

You take no chances when you buy the brands of

The Southern Cotton Oil Co.

LAST LEGAL HANGING IN A SCHOLARSHIP TO THE TEACH- are free to the students.

ER OF THE SCHOOL THAT WINS THE DE LAVAL SEPARATOR,

All persons who teach school ought to try to perfect themselves in those North State took place at Elizabeth- things that help make them competown at high noon today when Henry tent instructors. One of the essential it to any other teacher of Anson Spivey, colored, paid the death peu- things is to have children learn to do county, to be used this year, July law, Frank Shaw, near Abbottsburg, the easiest ways is to make pictures with a pencil. "Well, what good is The expenses at Boothbay are very that it was 105 feet high and that Spivey was tried and convicted at that," says some hard fisted fellow reasonable. Rooms can be had at the March term of court, 1909, and who has worked day in and day out one to two dollars a week, and parsentenced to be hanged on May 11th, to bring up the country to its present ties can do light housekeeping, getfollowing. He had been respited by state of prosperity. He asks the ting their own meals, or they can get the governor twice and had high question because he wants to know, hoard at four dollars and fifty cents a hopes of further respite if not re- and if an honest answer is given him | week. The cost of going to, and reprieve to life imprisonment. At his and he sees the good of it he say. trial he had the services of nine at- "Go ahead and try." For he wants Boothbay, all steamer route from the children to have every advantage. but he does not want money or time

This is the secret of all knowledge prisonment; so did Solicitor Sinc air, and success. First, to be told how and only two of the trial jury would to do things. Generations ago that teacher can have. This geographical telling had to be done by men whose business it was to recollect. Then eigh priest, the condemned man came sign writing on stone and then slept well during his last night on on bark and then on paper, and then the ocean, bays, rivers, etc., of the came the type and the printing press to record successful experiences of the man and woman who had learned.

In order to learn how to talk properly the grammar was written and printed.

Then the keeping of accounts brought out the arithmetic. Then the wanting to know what the other parts of the world looked

like brought out the georgraphy. Then the wanting to know how other people talked brought the Latin, French and German readers

So that is what our children have been and are being taught. First, seemed brave and walked to the gal- the grammer to teach him to say lows, but just as the black cap was "Those" instead of "Them" and not being adjusted he began to sink and tosay, "Where is John at." It is with quick presence of mind Sheriff all right to learn to talk properly, but and Wingate is going to be liberal to

That is all right, but the boy never Although Spivey had considerable has money saved up unless he is Third, the georgraphy to learn

a gambler, at which business he was how the world looks, but that an expert, his body was buried by does not make fifty bushels of the county authorities at the county corn grow where ten bushels have

Fourth, the Latin grammar, but The crowd dispersed in an orderly that does make sweet and nice butter that sells for thirty cents a pound, or chickens that are worth thirty cents apiece, and which are mighty good to

That is what our shools have given the children up to this time. But now the man who thinks says 'Let's teach the children something hat is useful as well as those things that are ornamental." That is what brought out the instruction in drawing with a pencil. In this the child's eye and hand are brought into use as well as his brain. He is taught how to draw houses, factories, cattle, vegetables, and flowers, and as he draws thesethings his mind expands and his desire is to have things develop. That is the secret. Next to making the thing is the making of the picture of the thing, whether it be home, fac tory, machine, vegetable or flower Therefore all teachers should know how to teach drawing with a lead

For this reason the Messenger and Intelligencer is going to give to the teacher of the school whose children win the De Laval separator a free scholarship to the best summer art school in the United States. The making of good butter, is the most important but next comes the draw-

This scholarship is worth twentyfive dollars. The school is at Boothbay Harbor, on the coast of Maine, one of the most beautiful spots in the world; a spot that will give inspiration to the person to try and to do. The teacher who goes to the art school comes in touch with the most talented teachers from all over the United States, who go there to learn more. The association with these teachers for six weeks or two months will be worth a great deal to the teacher who wants to learn.

The art instructer in pencil drawing, Mr. A. G. Randall, is recognized the United States over as one of the most competent teachers in the country. He is employed during the school term as the director of manual art in the schools of Providence, R. . His business there is to see that the art teachers teach correctly.

Under him at Providence are several hundred teachers. This summer school at Boothbay Barbor is owned by Mr. Randall. He has as his assistants a number of the most noted teachers in American and foreign tands. He has instructors to teach painting in oil, modelling in clay, manual training, (that is the working in wood) and teachers who instruct in the artistic working in metals, and other persons who instruct in those things that fit the teachers to be more useful to the children. Prominent men give lect. ures every evening during the week on various subjects. These lectures

But to the pencil sketching, which is the best thing for our teachers to start in, Mr. Randall, the head of the institution, gives his personal atten-

This scholarship which we are giving is transferable. If the teacher whose school wins does not want to, or cannot go, he or she may transfer things with their hands, and one of 10th to August 30th, for the entire time or a part of it.

> turning via Norfolk and Boston, Norfolk, will be less than fifty dollars. The whole expense will be less [than one hundred dollars. And, outside of the instruction, it will be one of the most pleasant outings a lesson of seeing the great cities of Boston, Mass., Portland, Maine, Bath, the ship building town, and Eastern part of the United States, will be worth much to the teacher, lots more than the whole cost.

The father or friends of the teacher can well afford to sacrifice something to have him or her obtain this great outing and splendid educational adcantage.

cost was 300 talents-about \$6,000,000and it is not too much to say that a similar image might be constructed now in one-fourth of the time and at one-third of the original cost. Rhodes, by the way, must have had colossus on the brain, for Pliny relates that the

The Ordeal of Getting Past the Aged Ticket Taker. The first difference I always find between going to the play in London and in New York is that in New York the man who has paid for a seat is made said. "I like to see a man go quickly to feel that he is a patron of the house. through his work." while in London he is greeted by the staff of the theater not exactly as an intruder, but as a necessary evil. They appreciate that an audience is a neces sary evil, but sooner than have one they would almost prefer to close the

In London for that importantly strategic outpost of licket taker an old man of eighty is always employed. You think this is accident, but it is not. Old age naturally suggests falling eyesight, and when he keeps you wait | tween ourselves I could floor them all.' ing in the foyer while he examines | And again he said, "When I want to your ticket and assures himself that it is not a laundry bill or a motor bus recelpt you attribute the delay to his old eyes. But in detaining you be has a motive. Standing at his elbow, scowling darkly, there always is another man, apparently a plain clothes out from Scotland Yard, uncomfortably disgnised in evening dress. And while the aged ticket taker pretends to scrunitize your ticket the lookout man scans you. You cannot escape his eye He never sleeps. No American, no matter how reckless, can hope to pass that man with a concealed bomb or a revolver or wearing a white tie with a dinner coat.-Collier's.

Flies at Sea. The finding of flies and butterflie a long way out at sen is perhaps most readers a fact not very well known. A recent traveler in the tropics relates that when thirty miles \$2.00 out from land a plague of flies over-

took the vessel on which he was steaming. The cabin was so full of them that the beams were blackened. Com mon black houseflies they were for the most part, with, bowever, a good sprinkling of large green flies. Where they could have come from was a mystery, but they were a terrible nulsance, and, although those on board swept off hundreds in a net, their numbers were not sensibly diminished. Another singular circumstance was that, although no land was in sight, large dragon files repeatedly flew across the ship. and a large dark butterfly was observ ed to fit across in the direction of the nearest land, quite thirty miles away. without stopping to rest on the vessel

One of the Ancient Seven Wonders of the World

The ancients succeeded in making that alloy of copper which is known as bronze. Among the seven wonders of the world was the famous statue, wholly made of bronze, historically known as the Colossus of Rhodes. It represented Phoebus, the national delty of the Rhodians. It was begun by Chares, a pupil of Lysippus, the sculptor, and was completed by Laches 288 B. C. The popular belief is that it stood astride the harbor of Rhodes, ships could easily sall between its legs, Pliny said that few men could clasp its thumb. It was cast on metal plates,

process occupied twelve years. In the ing into its head, and in a great mirror suspended to its neck were reflected the coast of Syria and the ships sailing After it had stood for sixty-four years this colossus was overthrown by an earthquake, and its remains lay on the shore for 923 years-that is, until A. D. 672-when they were sold by the

port was adorned with 1,000 colossal statues of the sun.

10 NEGROES BURNED TO DEATH

Absolutely Puro

northwest of Roxboro, on the farm of W. E. Farley, ten negroes met a horrible death early last night, John Wagstaff, his wife and eight children being burned to ashes in their home. Not one was left to tell the gruesome tale and the only evidence of their death was the charred bones from which all flesh was burned.

No one knows just how it happened and it is a mystery how all could have been so completely trapped. The house was of log body with cook room adjoining. It is supposed that the fire originated in the cook room, pread to roof and the inmates were either suffocated or the top fell in and caught them before they could awake. The family was industrious and hard-working.
