What was to be expected under such circumstances? The competion for buying cotton while it was to be had necessarily put up the price, and as the crop year advanced into 1910, with the supply lessening all the time, there was no recourse for mills except to begin reducing their output. More cotton could not be made until a new crop was made, the supply could not last at the normal rate of consumption in other years, and there must be curtailment, and even then the price would keep up under the pressure of buying competion for the mills. Furthermore, the price for finished goods would not keep pace and consumers could not buy on the customary scale any more than manufacturers could keep up

"The situation in the cotton market is the result of inevitable conditions. Traders have had to make their calculations accordingly, and long-sighted speculators have taken advantage of the situation. Those against whom this movement is made bought last fall for delivery in March, and they say that they received and paid for thousands of bales. They have bought for May and July delivery, and avow the intention of receiving and delivering according to their contracts, and no intention of cornering the market or monopolizing the supply. The Government can hard. ly prove an intention which they disavow, and unless it can prove actual monopoly or attempt at monopoly in what has already been done, it is hard to see how it can make out For Baby's Skin a case. It may disturb the market and derange calculations; it may atford some relief to those who have imprudently sold short and can only deliver at a loss; in other words, it may be a factor in the speculation, but that it can accomplish any benefit to the spinners or to the consuming public does not seem at all likely. Is the Department of Justice interposing in behalf of those who are trying to get legislation to break up the

Great is the responsibility of the men in high places, not only because of the trust committed to them, but also from the standpoint of example and influence. They owe to the public, as a matter of common justice, a conscientious performance of the duties of their position. This is an obligation which all duly recognize. They owe, too, on account of their performance-what all members of the great human brotherhood owe in some measure-special efforts for the promotion of public morality. (This is a feature which is not kept so well in view.) Hence, when prominent public officials betray their trust-by peculation, gross negligence, connivance at wrongdoing, etc., they are guilty of a two-fold breach-the one common justice, the other a crime against social morality; and of the two, the latter is often the worse, because it is more far-reaching in its
