

## Despair and Despondency

No one but a woman can tell the story of the suffering, the despair, and the despondency endured by women who carry a daily burden of ill-health and pain because of disorders and derangements of the delicate and important organs that are distinctly feminine. The tortures so bravely endured completely upset the nerves if long continued. Dr. Pierce's Favorite Prescription is a positive cure for weakness and disease of the feminine organism.

### IT MAKES WEAK WOMEN STRONG, SICK WOMEN WELL.

It allays inflammation, heals ulceration and soothes pain. It tones and builds up the nerves. It fits for widowhood and motherhood. Honest medicine dealers sell it, and have nothing to urge upon you as "just as good." It is non-secret, non-alcoholic and has a record of forty years of cures. Ask Your Neighbors. They probably know of some of its many cures. If you want a book that tells all about woman's diseases, and how to cure them at home, send 21 one-cent stamps to Dr. Pierce to pay cost of mailing only, and he will send you a free copy of his great thousand-page illustrated Common Sense Medical Adviser—revised, up-to-date edition, in paper cover, in handsome cloth-binding, 31 stamps. Address Dr. R. V. Pierce, Buffalo, N. Y.

# 35c Coffee at 25 Cents

We have 125 one-pound cans of

O'Donohue's 5th Avenue Mocha and Java Coffee

The retail value is 35 cents per pound. While this small lot lasts our customers may have it for 25 cents per pound. This is a high grade coffee, and you will never again have an opportunity to buy it at such a bargain.

## HARDISON COMPANY

## Attention, Farmers.

Our gins Nos. 1 and 2 have been thoroughly repaired and put in first class condition. New saws have been placed, and we offer first class work for \$1.25 per bale. All cotton will be ginned as quickly as possible, so that it can immediately be put on the market.

## WADESBORO OIL MILL.

### PROFESSOR GRUBER.

Charlotte Chronicle. The Statesville Landmark has come across a copy of a Pennsylvania paper and copies from it an article which gives us the pleasurable assurance that our old friend, Professor Gruber is still alive and fiddling. He is the father of the Gruber family, every member of which could play on some sort of an instrument—some of them on two or three at a time. The professor was a whole hand in himself. We have seen him blow a harp, play a fiddle, beat a drum and tap the triangle all at one and the same time, using mouth, fingers and toes in the performance. It seems that in his old age—he is now 72—he has learned a new stunt—the playing of the fiddle with one hand. The Pennsylvania paper, quoted by The Landmark, says: "This he does with the left hand, holding the instrument in mid-air, fiddling as he supports it, while the bow is held at the end by his teeth and rests lightly upon the strings. As if this were not enough the professor sings the air which he is playing at the same time." We are pleased to know that Professor Gruber is now carrying the dough around in his pockets. He is still in possession of his famous Greek fiddle, 394 years old, the offers for which have now got up to \$82,000 and refused.

### UNSIGHTLY ERUPTION ON FACE AND HEAD

Afflicted for Months—Burned and Itched—Used Cuticura and He was Cured in Three Weeks—Not Even a Scar Left.

"As a grateful mother, I feel it my duty to thank you for the cure of my little son who was afflicted for about eight months with scabies all over his head, back, neck and nearly all his face. We tried all kinds of remedies without any relief. We even employed a good physician and I am sure he tried his very best to cure my poor suffering little boy. But, alas! instead of getting better, he went for the worse. His head was literally covered with scales and ugly sores and his cries kept us awake throughout the long night. I had to keep his hands in gloves to prevent his scratching his head, as he was doubtless suffering from a burning and itching sensation, and was constantly trying to put his hands where it hurt. At last when we saw an advertisement of Cuticura and decided to try the virtues of the Cuticura Remedies. I bought one cake of Cuticura Soap, a box of Cuticura Ointment and a bottle of Cuticura Resolvent. I used them according to directions and I am happy to tell you the little sufferer was cured in less than three weeks. This was over a year ago and now his hair is covered with a fine growth of luxuriant hair. Strange to say, all those unsightly sores did not even leave a scar. Mrs. C. O. Gouyillon, Plaquemine, La., February 26, 1910.

The suffering which Cuticura Soap and Cuticura Ointment have alleviated among skin-tortured, disfigured infants, children and adults is beyond description. In countless homes as the parent, sweetest and most economical treatment for eczema, and other itching, burning humors of the skin and scalp. A single set is often sufficient. Cuticura Remedies are sold throughout the civilized world. Putzer Drug & Chem. Corp., Sole Distributors, Boston. Mailed free, 35-cent Cuticura Book. "How to Care for and Treat the Skin and Scalp."

### GETTING SOMETHING FOR NOTHING.

Success Magazine. It is a strange phase of human nature, which does not quite appreciate or feel the proper gratitude for favors, says Orison Swett Marden in "Success Magazine." I have hardly ever known a boy whose way was paid through college, for example, by some one interested in him, to show the proper regard for his helper, or to quite respect the one who boosted him—who furnished crutches for him when he might have had to use his own legs. As a rule, the things that we are helped to are never fully appreciated. We experience a satisfaction when we have honestly earned a thing which we do not feel when it is given to us. There is something within which rebels at being helped, because help from others tends to kill self-respect. We do not think quite so much of ourselves after having accepted favors or a position which we have not earned, as we did before. The sense of justice in us is violated. We do not feel quite honest in accepting something for nothing. The man who tries to get along without satisfying his sense of justice is always placed at a disadvantage. He may try to be grateful for the unmerited help, for the assistance in getting that which he has not earned, for being given a position far above his merits, through a "pull"; but he never feels quite right about it. The man who has been lifted above others because he was a son or a relative, or because his father owned controlling interest in the concern, never quite respects himself when he goes around among the employees and sees those who have struggled for years and have worked over hours for the position he occupies, and who in fact have developed the strength to maintain the position after they get it. His sense of fairness is violated. He knows that it is not right to take the place which somebody else has honestly earned, and who according to merit should have it. He is conscious, too, that he is not equal to the demands of the position into which he has been boosted.

### CHAVEZ CROSSES ALPS.

Daring Aviator Falls Broken and Bleeding at the Goal. Domodossola, Italy, Sept. 23.—The great feat of crossing the snow-capped Alpine barrier between Switzerland and Italy in a heavier-than-air machine was accomplished today by George Chavez, the young Peruvian aviator. The plucky hero of the exploit, however, lies tonight in the Domodossola hospital badly hurt as the result of an accident that occurred just as he had completed the most arduous and nerve-racking portion of a task he had set out to accomplish—a flight from Brig in Switzerland, across the Alps to Milan, in Italy, in all a distance of about 75 miles. AVIATOR BADLY HURT. Both his legs are broken, his left thigh is fractured and his body is badly contused, but his physicians are of the opinion that these injuries will not prove fatal. The accident occurred as Chavez was endeavoring to make a landing here. The Alps had been crossed successfully and the aviator was descending with the power of his machine cut off. When about 30 feet above the ground a sudden gust of wind seemed to catch the monoplane, which turned over and fell. When the crowds that had been watching the descent ran up they found Chavez lying bleeding and unconscious beneath the twisted wreckage. Willing hands lifted the aviator from the ground and bore him to the hospital. Fifty miles away and over country that has none of the hazards of the Alps lay Milan, the goal Chavez was seeking in an effort to win the \$20,000 prize offered by the Italian Society.

### AN AUSPICIOUS START.

The weather at Brig was clear and bright when Chavez made his start. Leaving the ground with his motor running at full speed he rose in sweeping circles until he had reached an altitude sufficient for him to clear the Resti shoulder to the southeastward of Brig. This obstacle having been overcome, the Peruvian aviator headed his monoplane straight for the snow-capped crags of the Fletchhorn. Constantly ascending, Chavez reached the Simplon Pass, where at an altitude estimated at 7,200 feet he turned his machine south over the terrifying Simplon pass, with the Frauentor glacier at his left and the Krotz peak of the Hubschorn at his right. After crossing the divide, instead of taking a short cut over the Monchens pass, a huge edged glacier, Chavez turned the towering white mountain head of Monte Leone, which rises to a height of 16,646 feet, and passed down above the gondo gorge, a deep gulf between sheer walls, until he reached the open valley of Vedro and then descended easily toward Domodossola, which is 889 feet above sea level. It was here that the accident occurred.

### A Safe Game.

Youth's Companion. He may have meant to be polite, but there can be no question that he actually did a very rude thing. He was a Frenchman, riding in a street-car. Two women entered, and seeing no seats, stood. The gentleman, who sat near them, rose, removed his hat, and said, "I give my seat to the elder of these two ladies." Neither made a move to take the seat, but each glanced at the other in a haughty manner, as much as to say, "Sit down, madam!" "Is neither madam," said the Frenchman, bowing to one lady, "nor madame," bowing to the other, "the elder? Then I shall have to resume my seat."

### Millionaire's Sand Cure.

Cambridge, Mass., Sept. 21.—That the ultimate cure for indigestion has been discovered is the belief of William A. Graustein, millionaire head of a milk firm. Graustein had been a victim of indigestion for years. On the advice of a physician he procured some common building sand, sterilized it and took a spoonful of it three times a day. In six weeks, it is said a cure was effected. Dozens of his friends have tried the same treatment with what was declared to be favorable results. Now whenever Graustein feels run down or has any work in hand requiring "sharpened" faculties he reaches into his desk and takes a spoonful of his panacea from a well-labeled vial.

### Why Not Get Rid of Catarrh?

Here are some of the symptoms of catarrh; if you have any of them, get rid of them while there is yet time: Is your throat raw? Do you sneeze often? Is your breath foul? Are your eyes watery? Do you take cold easily? Is your nose stopped up? Do you have to spit often? Do crusts form in your nose? Are you losing your sense of smell? Do you blow your nose a great deal? Does your mouth taste bad morning? Do you have to clear your throat on rising, or have a discharge from the nose? Does mucus drop in back of throat? Have you ringing noises in the ears? HYOMEI (pronounce it High-ome) is guaranteed to cure catarrh, coughs, colds, sore throat, bronchitis, asthma and croup, or money back. Just breathe it in. Complete outfit, including hard rubber inhaler, \$1.00. Druggists everywhere and the Parsons Drug Co., sell HYOMEI. If you already own an inhaler, you can buy an extra bottle of HYOMEI for only 50 cents.

### CONSUMPTION

In the cure of consumption, concentrated, easily digested nourishment is necessary. For 35 years Scott's Emulsion has been the standard, world-wide treatment for consumption. All Druggists.

### NOSEBLEED.

Youth's Companion. Epistaxis, that is to say, nosebleed, is an accident which will sometimes occur in the best-regulated families, and happily in most cases, need occasion no alarm. In fact, it may often be hailed as an advantageous symptom, especially when it occurs in healthy, full blooded young people. There are also certain diseases, such as Bright's or cirrhosis of the liver, or typhoid fever, when an attack of nosebleed may do good rather than harm; when it is, in fact, simply a sign that Mother Nature is trying to relieve her child in one way because she is balked in another. In these cases the flow is beneficial, but the subject of the attack should be watched in order that there should not be undue profusion, leading to a weakening of the vital forces, or if too prolonged, to a genuine anemia. When an attack of nosebleed seems to be doing no harm, as in the case of a young, healthy boy or girl, it is best to let it alone, or at the most after a time to use some very simple remedy, such as the application of cold over the brow, by means of a cloth wrung out of quite cold water, or by snuffing a little cold water up the nostrils. There are certain old-fashioned remedies, such as putting the key of the front door down the back, which owe their origin to the same theory—the application of cold and shock. When cold water is snuffed up through the nostrils, the addition of some mild astringent—alum or tannin, for example—will make the treatment more quickly efficacious. Sometimes, when other slight remedies seem to fail, pressing on the nostrils will succeed in stopping the flow.

### FOR FALLING HAIR.

We promise you that, if your hair is falling out, and you have not let it go too far, you can repair the damage already done by using Rexall "93" Hair Tonic, with persistency and regularity, for a reasonable length of time. It is a scientific, cleansing, antiseptic, germicidal preparation, that destroys microbes, stimulates good circulation around the hair roots, promotes hair nourishment, removes dandruff and restores hair health. It is as pleasant to use as pure water, and it is delicately perfumed. It is a real toilet necessity.

### HYENS EATING ITSELF UP.

Washington, Sept. 22.—Persistent gnawing of its left hind leg and drinking its own blood, a spotted hyena of the brooding, not the laughing, variety is committing progressive suicide at the National Zoological Garden. The animal, a gift to the zoo from Adam Forepaugh in 1896, began the process of self-destruction several days ago, and before its keepers discovered the cause of the injuries it had chewed the flesh from the paw to the middle joint of the leg. It is now in a state of physical exhaustion, and keepers at the zoo fear it will be necessary to kill the animal. Dementia is believed to have attacked the hyena. Several years ago there was a similar case at the national zoo, a hyena chewing at its side until several ribs were exposed. It was shot.

### Don't Break Down.

Severe strains on the vital organs, like strains on machinery, cause breakdowns. You can't overtax stomach, liver, kidneys, bowels or nerves without serious danger to yourself. If you are weak or run down, or under strain of kind, take Electric Bitters, the matchless tonic medicine. Mrs. J. E. Van de Sande, of Kirkland, Ill., writes: "That I did not break down, while enduring a most severe strain, for three months, is due wholly to Electric Bitters." Use them and enjoy health and strength. Satisfaction positively guaranteed. 50c. at Parsons Drug Co.

### A VISIT TO BATTS' FARM.

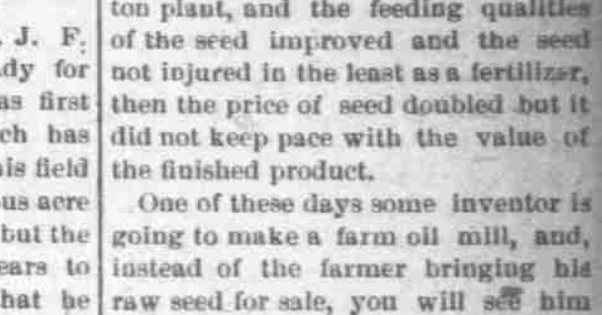

Mr. Batts Has a Twenty-Acre Field of Corn That Averages Four Ears to the Stalk—Will Produce 100 Bushels to the Acre. Raleigh Evening Times. Yesterday afternoon a party of Raleigh men who are deeply interested in the subject of corn and cotton growing in this state, went out to the farm of Mr. J. F. Batts, near Garner, to take a look at his great 20-acre corn field. The party, consisting of Governor Kitchin, Col. J. Bryan Grimes, Supt. J. Y. Joyner, Mr. J. J. Laughinghouse, Col. Fred A. Olds and J. V. Simms, of The Evening Times, left the Capital at 3:30 o'clock in a big touring car, going by way of Garner and out to the celebrated Batts farm. On arriving at the farm Mr. J. F. Batts and his father were ready for the party and an inspection was first made of the 20-acre field which has caused so much comment. This field is not so thick as the famous acre raised by Mr. Batts last year, but the field will average about four ears to the stalk. It is estimated that he will get an average yield of 100 bushels to the acre. The ears are very fine and many of the stalks run up to eight and nine ears and some were found with ten and eleven, and one stalk was seen having thirteen. Mr. Batts has other corn besides this field, but as this square of 20 acres was only medium soil he decided to see what good cultivation would do and the fine field of 20 acres is the result of this intensive cultivation. In a small field near by Mr. Batts is developing his seed corn. In this field the stalks are single in the hill and several feet apart, but the stalks run from seven to eleven ears to the stalk. This is the famous Batts Profic and Mr. Batts stated to the party that he retailed his seed corn last year for \$5.00 per bushel and could not fill one half his orders. Three of the stalks were selected and shelled for Mr. Batts by the party and a signed statement given him. Of course it is understood that this corn was not thoroughly dry, but still it shows an enormous yield per stalk. Mr. Batts is one of the new kind of farmers who believe in doing things in the right way. He believes in intensive cultivation and his success with a small farm shows what can be done. He not only has the world beat on corn, but he has fruit of every kind, chickens, cattle, hogs, horses, and everything that should be found on the farm, and he has the very best kind. He stated that he would kill a large number of hogs and would have several thousand pounds of meat. He recently brought a two-horse wagon load of hams and bacon to Raleigh for sale. After enjoying a feast of scuppernon grapes and fruits the party returned to Raleigh, every one being enthusiastic over the fine things seen, not only on Mr. Batts' farm, but every farmer in that section of the county seems to have caught the spirit and the road is lined on both sides with fields of fine cotton and corn. The cotton in that section is very fine and some of the farmers who own one hundred acres or more in cotton say they will easily get a bale to the acre. Wake county farmers are leading the world in the production of cotton and corn and a trip out to one of these fine farms is an education. The farmers of Wake are now coming to a realization of what they can do and what an opportunity is at their door, but there is one thing that holds them back, and that question is one of good roads. The roads in Wake are just 50 years behind the county and the next thing for the farmers to settle is one of having Macadam roads into every section and corner of the county. With this Wake would soon be the garden spot of the world. The following copy of the statement given Mr. Batts shows what the party found and how they appreciate what Mr. Batts, the "Corn King" is doing for Wake: "Garner, N. C., Sept. 21, 1910. "R. F. D. No. 1 "On this day we personally shelled the corn from three stalks, with the following results, the stalks being taken from a field of 20 acres on the farm of J. F. Batts: "One stalk, 7 ears, weight 2 1/2 lbs., shelled corn. "One stalk, 9 ears, weight 2 1/2 lbs., shelled corn. "One stalk, 4 ears, weight 2 lbs., shelled corn. "We also personally viewed the 20-acre field from which this corn was taken and found it very even in height and in ear-formation, averaging about 4 ears to the stalk. (Signed) "W. W. KITCHIN. "J. BRYAN GRIMES. "J. Y. JOYNER. "J. V. SIMMS. "J. J. LAUGHINGHOUSE. "FRED A. OLDS."

### COTTON SEED.

Monroe Enquirer. The price of cotton seed is too low, has always been too low. It is true that cotton seed are selling for more pound for pound than corn, is bringing, and compared with prices years ago the price of cotton seed is away up, but that does not mean that the price of this wonderful product is high enough. When cotton seed were selling for eight and ten cents a bushel they were worth more than for the purpose they were used for—fertilizing the land. When it was discovered that lard, which is superior to pure hog lard, that "pure olive oil," superior to any product of the olive tree, could be extracted from the seed of the cotton plant, and the feeding qualities of the seed improved and the seed not injured in the least as a fertilizer, then the price of seed doubled but it did not keep pace with the value of the finished product. One of these days some inventor is going to make a farm oil mill, and, instead of the farmer bringing his raw seed for sale, you will see him coming in with barrels of oil, and he will keep every pound of meal and hulls on his farm, except the meal he sells to make bread, for the day is coming when we will all eat cotton seed bread. You will not eat it—don't like the cotton-seed taste of that bread, did you say? Yes, all of us were saying just a few years ago that we would never use cotton seed oil for cooking purposes, that the cotton-seed smell and taste was unbearable, but they have eliminated that taste and that smell from the cotton seed cooking oil and the cotton seed lard and we eat cotton seed oil cookery and call it good. They are just "monkeying" with cotton seed now. We laugh when we think of how our daddies dumped cotton seed in heaps in the fields winter time, and consider the price of eight cents a bushel for cotton seed ridiculous, but in a few years from now, when you who read these lines and he who writes them are pointed out as the oldest inhabitants, we will talk about the time when cotton seed brought the low price of fifty cents a bushel. Not long from now the cotton farmer can get a good big price to allow some one to haul, his seed away, bring back every pound of hulls and meal these seed make—will be paid a good big price, we say, for the privilege of extracting the oil from the seed. A few years ago the western grain grower had a dream of "dollar wheat." The Southern cotton farmer is sitting up and looking for the day of "dollar cotton seed." It is coming.

### DE LAVAL CREAM SEPARATORS
