# **CONVINCING PROOF** Lydia E. Pinkham's Vegetable Compound

# What is the use of procrastinating in the face of such

evidence as the following letters represent? If you are a sick woman or know one who is, what sensible reason have you for not giving Lydia E. Pinkham's Vegetable Compound a trial? For 30 years we have been publishing such testimonial letters as these-thousands of them -they are genuine and honest, too, every one of them.

A week of hard travel found the party camped in the last fringe of cottonwood that fronted the glacial slopes, their number augmented now by a native from a Russian village with an unpronounceable name, who, at the price of an extortionate bribe, had agreed to pilot them through. They were numbed, blinded, choked by the rage of the blizzard; their faces grew stiff and their lungs froze. At times they fell and were skidded along ahead of the blasts. This forced them to crawl back again, for they dared not lose their course. Much has been written concerning

the red man's physical powers of endurance, but as a rule no Indian is the equal of his white brother, due as much perhaps to lack of mental force as to generations of insufficient clothing and inanition, so it was not surprising that as the long afternoon dragged to a close the Aleut guide began to weaken.

Darkness found them staggering on, supporting him wherever possible. At length he became unable to guide them farther, and Balt, who had once made the trip, took his place, while the oth-

# "Wood to Burn"

The Wadesboro Oil Mill operates a domestic fuel department. Perhaps this seems a curious branch of the oil business, but it is easily explained. It takes steam to run a mill, and it takes fuel to make steam. All during the summer, when farmers have an idle day or two, they bring loads of pine wood to the mill and go away with spending money. Long strings of this wood are now stretched over all available space at the mill.

## This Wood Is Dry.

Every day Mr. Rogers goes out and selects a nice, straight, clean lot of this wood and marks it for slaughier. This select lot of wood is sawed up into stove lengths by a wood saw, and split into nice fine sticks just right.

### This Is the Right Wood to Buy

All the ugly, crooked, sappy, dirty green sticks are shoved into the big furnaces to make steam for the oil mill. That furnace does not know the difference. Other wood dealers have to sell all kinds, good and bad. Discriminating Customers get the very finest wood every time.
