

Successful Baseball Season For the Braves Ends May 20

Chowan College concluded its successful 1953 season when it played the Campbell College "Camels" Wednesday night, May 20, at 8 o'clock, losing with a score of 7-0.

The Braves now have a record of nine victories and seven defeats. They have defeated PJC twice, EMI, William and Mary of Norfolk, Edenton Marines, Louisburg Junior College, Phieffer twice, and Newport News Apprentice School.

One of the highlights of the season was a home run by Aubrey Edwards in the game with William and Mary. Billy Lee also made a home run in the game with PJC. Federal Mizelle of Bertie County has the highest batting average of .510.

On May 8 Chowan College defeated PJC at Murfreesboro by a 10 to 1 score. The talented pitcher, Bobby Alligood, was credited for boosting the victory with his excellent pitching. Federal Mizelle and Henry Kitchings were the top scorers.

On May 13 the Braves defeated William and Mary at Murfreesboro by a score of 12 to 2.

On May 15 the Edenton Marines slightly edged a victory over Chowan by a 14-10 score. It may be noted that there are 1,500 Marines at the Edenton Base to the 100 boys at Chowan. For the relatively small enrollment the team from Chowan has won many victories over a number of schools many times its size.

SPEAKER.—The Rev. W. D. Morris, pastor of First Baptist Church, Scotland Neck, who preached the baccalaureate sermon at the college on May 24.

Printing Industry Assists Chowan In Getting Students

Chowan College is getting an assist from The Printing Industry of the Carolinas, Inc.

Chowan College, which took the lead among junior colleges in offering a course in graphic arts (printing), already has broken ground for a building in order to expand this course next fall.

And now comes the PICA sending out brochures to each high school in each county trying to overcome the lack of glamour the printing trade has held out to students and to overcome the acute shortage of desirable material for apprentices.

Here's a release from PICA to the newspapers of the two states:

Opportunities for a career in printing are being explained to young people by The Printing Industry of the Carolinas, Inc. This rapidly growing industry has need for hundreds of young people above the average, and with those aptitudes needed for rapid learning in this career.

In addition to newspapers, there are 28,989 printing establishments in this country. Only two other industries have more units in the United States. The combined payroll of the graphic arts industry amounts to over \$2,227,000,000.00 per year, ranking eighth in all industries. The average hourly rate paid to journeymen is the second highest paid to skilled employees in American industry. Embracing over 715,450 individuals, this industry ranks ninth in number of employees.

The graphic arts industry is larger than the automobile industry, the entire mining industry, farm equipment and meat packing. It is only slightly smaller than the entire textile industry of the United States. The printing industry is a big industry with great opportunities for young people. High school graduates and veterans will find this a field of ever increasing interest.

Two factors are influencing the present efforts to secure apprentices. First, the industry is growing rapidly and especially in the South; which results in a need for more workers. However, the average age in the printing industry is very high, and there is a constant need for replacing those who are retiring.

There is an old familiar saying that once a person gets printing

ink on his hands, he will never get it off. This is easily explained. Printing is such a fascinating business that once in it one never cares to change.

The U. S. Employment Service cooperated with The Printing Industry of the Carolinas to establish aptitude tests for printers. These are designed to ascertain whether or not a person has those natural aptitudes which are necessary to become a good printer. These tests are administered, at no cost to the applicant, in any U. S. Employment Service office. Those standing high in these tests know they can progress rapidly because they have aptitudes for printing, and these are especially wanted in the industry. A high school education materially assists the young person in attaining the highest positions.

An attractive booklet about the industry and complete information may be had by writing to The Printing Industry of the Carolinas, Route 1, Columbia, S. C.

Orchids To..

Hilliard Green for being elected the most valuable player in the Junior basketball conference.

The students on the honor roll.

The students graduating this year.

The baseball team for their good winning streak.

Hilliard Green for being elected president of the Student Government Association for next year.

Lonnie Harden for being elected president of the Phi Lambda Phi for next year.

Charlie Davis for bringing us such inspiring messages during Religious Emphasis Week.

The Glee Club for bringing us a concert.

Gloria Cox for being chosen president of the Y. W. A. for next year.
