A significant educational tendency of the day, thinks the Chicago Post, is the increased interest in the study of history and politics at Johns Hopkins University.

"Montana claims by analysis that her sugar beets are the sweetest in the wide, vide world," observes the Washington Star, "and that enterprising young State proposes to go into the sugar industry and cellpse creation."

A wealthy Canadian is traveling about he country with a mission. That mistion is to save shoe leather to the world. He insists that if everybody would cover three inches more at every step the saving in boots and shoes in America alone would be \$27,000,000 per year.

At the recent convention of street-or men in St. Louis, Mo., it was shown by statistics, avers the New York World; that after filteen fares have been rung up on an ordinary horse car all the re-mainder of the money taken in for that trip is profit for the company.

The New York Mail and Express leges that one of the great railroad corporations paid \$300,000 last year for towing car floats around the harbor. The amount paid by the five great trunk lines would equal the interest on \$30,900,000 -enough to construct two or three bridges and tunnels.

Over \$61,000, the largest sum on record, was paid as duty on oleomargarine manufactured in Chicago during Capt. T. T. tags to supply the demand this season. The house of representatives passed the railroad commission bill. It is the bill with a few slight amendments, that passed the senate. It provides for three commissioners to be clected by the Gen-eral Assembly, and they are given the power to fix and regulate freight and passenger rates, to regulate telegraph and express companies, and to prevent all discriminations. According to the Philadelphia Record in 1888 there were 4,000,000, bushels of oysters received at Baltimore from the Chesapeake Bay beds, but this season the receipts to the same date have fallen below 2,000,000 bushels, while packinghouses throughout the State are closed, and from all parts of the bay comes the story of exhausted beds. The violation of the culling law, and the consequent miles destruction of the young oyster, is responsible for this condition of things. The law is a dead letter, and a great industry is being ruined. Nearly ten years

Text: "Traith without works is dead."-Jas. i., 30. The Roman Catholic Church has been charged with putting too much stress upon good works and not enough upon faith. I charge Frotestantism, with putting not enough stress upon good works as connected with saivation. Good works will never save a man, but if a man have not good works he has no real faith and no genuine religion. There are those who depend upon the fact that they are all right inside, while their conduct is wrong outside. Their religion for the most part is made up of talk-rigoroms talk, fluent talk, boastful talk, perpetual talk. They will entertain you by the hour in teiling you how good they are. They come up to such a higher life that we have no patience with ordinary Christians in the plain discharge of their duty. As near as I cent tall, this ocean craft is mostly sail and very little tonnage. Yonder is a river with steep and rocky banks, and it roars like a young Niagara as it rolls on over its rough bed. It does noth-ing but talk about itself all the way from its source in the mountain to the place where it empties into the sea. The banks are so steep the cattle cannot come down to drink. It does not run one fertilizing rill into the adjoining field. It has not one grist mill or factory on either side. It sulks in wet weather with chilling fogs. No one cares when that river is born among the rocks, and no one cares when it dies into the sea. But yonder is another river, and it mosses its banks with the warm tides, and it rocks with floral lullaby the water lillies asleep on its bosom. It invites herds of cattle, and flocks of sheep, and coveys of birds to come there and drink. It has three grist mills on one side and six ootton factories on the other. It is the weath of two hundred miles of luxuriant farms. The birds of heaven chanted when it was born in the mountains, and the ocean shipping will press in from the sea to hall it as it comes down to the Atlatic coast. The one river is a man who lives for others. The Atlantic coast. The one river is a man who lives for himself, the other river is a man who lives for themself, the other river is a man who lives for others. Do you know how the site of the ancient city of Jernsalem was chosen? There were two brothers who had adjoining farms. The one brother shad a large family, the other had no family. The brother with a large family said, "There is my brother with no family, he must be lonely, and I will try to chear him up, and I will take some of the sheaves from my field in the night time and set them over on his farm and say nothing about it." The other brother said, "My brother has a large family, and it is very dif-ficult for him to support them, and I will help him along, and I will take some of the sheaves from my own farm in the night time and set them over on his farm and say noth-ing about it." So the work of transference went on night after night, and night time also be brothers happened to meet while making this generous transference, and the prother they mere was so scared that it was chosen as the site of the city of Jerusa-lem. Germany will yet regret, predicts the Chicago Post, that it ever showed a discourteous spirit toward the American hog. This want of civility to our graceture. ful porker will hardly plunge the two nations into a bloody strife. But it may strain the diplomatic relations for a time, because the hog is a universal favorite in the land of the free and the home of the brave. The Swedish hog, the Norwegian hog and the Denmark hog all enjoy the freedom of the Kaiser Empire. The prohibitions against them have been raised and they can come and go according to their pleasure. The American hog alone has been singled out for this ungentlemanly treatment. But time evens all things, and the day will come when the now despised hog will make a triumphal entry in Berlin amidst the salutes of the German artillery and the huzzas of the German populuce.

Then the question as to who should have Jackson's cup arose. The Legislature appointed a commission to decide the matter. The commission could reach no conclusion. Every mem-ber of the regiment had fought well. No one had run away or showed the slightest cowardice, and it was impossible to award the trophy. Thereupon the Leg-islature decided that the cup should go to the last survivor of 809. There are only 20 left, and it is the especial am-bition of each to outlive the others so as

Appropriation For the World's Fair.

A Raleigh correspondent writes: Col. Thos. Keogh, of the World's Fair com-mission, is here and is devoting himself to the work of securing a complete rep-rentation of North Carolina at the great exposition. The legislature is disposed to act liberally in the matter and to avail itself of what is undoubtedly North Carolina's greatest opportunity. It will asked to appropriate \$50,000. It asked to appropriate \$50,000. It is thought this sum is reasonable and prop-er. One of the plans is to have a North Carolina building at Chicago, in which the materials will be the beautiful build. ing stones and the choice woods of the State and in this to place every article which is enumerated in the census re-turns. North Carolina is the only State in all the Union which can do this.

manufactured in massachusets. It will not allow the merchant to say that wine came from Madeira when it came from California. Practical religion will walk along by the store shelves, and tear off all the tags that make misrepresentation. It will not allow the merchant to say that is pure coffee when dandelion root and chicory and other in-gredients go into it. It will not allow him to sand and ground glas. When practical religion gets its full swing in the world it will go down the streets, and it will come to that shoe store and rip off the fictitious soles of many a fine looking pair of shoes, and show that it is pastelloard andwiched between the sound leather. And this practical religion will go right into a grocery store, and it will pull out the plug of all the adulterated sirups, and it will dump into the ash barrel in front of the store the casis bark that is sold for cayenne paper, and it will shake out the Prussian blues from the tea leaves, and it will alt from the flour plaster of Paris and bone dust and songetone, and it will by chemical analysis separate the one quart of Ridge-word water from the flow honest drops of cow's milk, and it will throw out the Mve animalcules from the brown sugar. There has been so much adulteration of are that there is a healthy man or woman in "America. This, It will go to these hypocritical profe-sers of religion who got a "corner" in corn and wheat in Chicago and New York, send-ing prices upland up until they were beyond thereach of the poor, keeping these broad-stuffs in their own hands, or controlling them until, the prices going up and up and up, they were after a while ready to sell, and they sold out, making themselves millionaires in one or two years-trying to fix the mat-ter up with the Lord by building a church, or a university, or a hospital-deuding them

ality. Yes, there is a great opportunity for mis sionary work in what are called the success-ful classes of society. It is no rare thing now to see a fashionable woman intoxicated in the street, or the rail car, or the restau-rant. The number of fine ladies who drink the work is intrasting. The report is, She was taken suddenly ill at a german. Ah! no. She took too much champagne, and mixed liquors, and got druk. That was all. Yes, this practical religion will have to come in and fix up the marriage relation in America. There are members of churches whe how to the any system to on your

There are members of church who have too many wives and too many hus ands. Society needs to be expurgated an washed and fumigated and Christianized hands. Society needs to be expurgated and washed and fumigated and Christianized. We have missionary societies to reform film street, in New York, Bedford street, Phila-delphia, and Shoreditch, London, and the Brooklyn docks; but there is need of an or-ganization to reform much that's going on m Beacon street and Madison square and Rittenhouse square and West End and Brooklyn Heights and Brooklyn Hill. We want this practical religion not only to take hold of what are called the lower classes, but to take hold of, what are called the higher classes. The trouble is that people have an idea they can do all their religion ou Sunday with hymn book and prayer book and liturgy, and some of them sit in church rolling up their eyes as though they were ready for translation, when their Sabbath is bounded on all sides by an inconsistent life, and while you are expecting to come out from under their arms the wings of an angel, there come out from their forehead the horms of a beast.

come out from their forehead the horns of a beast. There has got to be a new departure in religion. I do not say a new religon. Oh, no; but the old brought to new appliances. In our time we have had the daguerceotype, and the ambrotype, and the photograph, but its the same old sun, and these arts are only new appliances of the old simlight. Bo this glorious Gospel is just what we want to photograph the image of God on one soul, daguerreotype it to another soul. Not a new Gospel, but the old Gospel put to new work. In our time we have had the telegraphic invention, and the telephonic how they are all the children of old elec-tricity, an element that the philosophers have a long while known much about. So this electric Gospel needs to flash its light on the eyes and ears and souls of men, and became a telephonic medium to dart in-vitation and warning to all nations; an elec-tric light to fluminate the eastern and wet-

Cut Off His Quene For a Bride.

A Lansing, Mich., special says: A marriage license was issued to day to Sam Lee, a Chinaman and proprietor of a laundry here, and Maggie Kochler, an laundry here, and Maggie Koenter, an Irish maiden, young and pretty. The marriage ceremony performed was with the full consent of the bride's parents and-friends, and the brother of the bride stood up with her. A large crowd stood about the bride's home, where the mar-riage look place, invited guests to the number of 150 being present. Impetus to Sugar Growing.

Impetus to Sugar Growing. The financial success of the sugar fac-tory at Franklin, La., has encouraged oth-er communities in that State to consider the expediency of organizing similar, en-cerptises. The New Orleans Times-Dem-ocrat says: "It has been clearly dem-nonstrated that the manufacture of sugar to Louisiana can be extended and can-ded on most successfully with these cou-tral factories; and it is to be hoped, herefore, that the State will secure all it needs for this industry."
