GOULD, VANDERBILT AND U. S. GOVERNMENT.

Some one says this eternal war on capital is monotonous, is useless, is disgusting and calculated to do harm by arraying class against class.

This is true; capital and labor ought to harmonize for the best results. They must harmonize for proper results. However, we cannot afford to harmonize by giving capital its full sway—full length of its money power.

The warfare is not waged on capital, however, but the government which legislates as though the whole country and they, the legislators, with it belonged to monopolists.

Italy sees the matter different from the way an American sees it, not altogether because Italians are the interested party, but because our government and ideas of government are entirely foreign to any conception they have of such things.

is despicably mean, but how about the money power of Gould and Vanderbilt when it is sufficient to control the whole country provided the government will aid them just a little and prevent any one going around their net.

MINISTER BLAIR REJECTED.

The Chinese government refuses to accept Mr. Blair as minister to that country. Their reason for this is his having made some very bitter speeches against them on the question of Chinese immigration.

We are sorry for New Hampshire, and would have been for the U. S. Senate if it had not been their good fortune that he failed of re-election. He was said to be the greatest bore in Congress.

He is known best in connection with the Blair Educational bill. This measure it was thought at one time would pass and perhaps the Republicans were pledged to its support but Mr. Blair spoke it to death.

The Raleigh Chronicle says he was patriotic in his defense of the Blair bill but it is a kind of patriotism we do not appreciate much.
