There are two ways to take a hill IN HIGH!

The first way: choose an easy hill! The second way: fill your tank with Shell 400 "Extra Dry" and take any hill.

Shell 400 "Extra Dry" is all dry power-producing gasoline that entirely vaporizes at 400° F. into the explosive gas your spark plugs turn into power. There are no heavy drops of kerosene in Shell 400 "Extra Dry" that your carburetor cannot vaporize, that leak down cylinder walls and reduce lubrication, that reduce mileage and power. When you fill your tank with Shell 400 "Extra Dry" you fill your tank with power and you can take the hills in high!

Stop at the sign of the Shell. There's a Shell Yellow and Red service station near you marked by the striking Shell sign. A trained, courteous representative will supply your motor needs with exact understanding of what SHELL GASOLINE and SHELL MOTOR OIL your motor requires to give you the greatest economy and utmost satisfaction.

Shell Fuel Oils — Shell Fuel Oils exactly meet the requirements of every oil burner on the market and all Shell Fuel Oils are always of a dependably uniform grade. The new Shell Fuel Oil Chart, prepared by Shell Fuel Oil Engineers, tells you the grade of oil to use for your oil burner. Send for it today.
