

BY MRS. LOULA MUSE.

Loving-Maddy.

The marriage of Miss Lula Omohundro Loving and Frank Maddy, of Chapel Hill, was solemnized at the home of the bride's parents on Saturday evening, June 30th, at eight o'clock. The living room was artistically decorated with handsome cut flowers and potted plants. Rev. Frank Hare of the Baptist church, pastor of the bride, pronounced the impressive vows.

The wedding music was beautifully rendered by Miss Margaret Tyson, of Asheboro. The bride wore a becoming ensemble of navy blue sheer crepe with hat and accessories to match. Mrs. Maddy is the youngest daughter of Mr. and Mrs. J. R. Loving, of Route 1, and is young woman of rare accomplishments. She was educated at Boone, and did special work at the University of North Carolina. For seven years she was a valued member of the Pinehurst school faculty. Immediately after the ceremony Mr. and Mrs. Maddy left for Chapel Hill, where they will reside. Mr. Maddy being special policeman for the University campus.

Wedding guests were Misses Lula and Lily May Rogers, Mary Emma Thomas, Beulah Thomas, Mrs. Fanny Shields, Misses Margaret and Fanny Tyson, of Asheboro, Mr. and Mrs. Flint Loving, Mr. and Mrs. Ben Guldred, Mrs. Frank Hare, of Jonesboro, Mr. Hilliard, Miss Burch, Ben Maddy and Miss Nell Maddy, brother and sister of groom, and several others from Chapel Hill.

Funeral of George Priest.

Funeral services were held at Lakeview Friday afternoon for George Priest, aged 68, who died at his home several miles from Raeford, on Thursday, following a long illness. The service was conducted by his pastor, assisted by Rev. M. D. McNeill, of Cameron, and was attended by a large number of friends and relatives. He is survived by three sons and a daughter; two brothers, Duncan Priest, of Lakeview; William Priest of S. C.; two sisters, Miss Sarah Priest, of Lakeview, and Mrs. H. D. Cameron, of Southern Pines.

The Woman's Auxiliary of the Presbyterian church met Friday afternoon at the home of the president, Mrs. J. E. Snow. The three circles were well represented, and the meeting was practically a business one, many phases of the work being discussed, and plans formulated for more efficient service. The meeting closed with prayer by Mrs. Hemphill.

Miss Minerva Thompson, who was visiting Misses Thurlis and Lillian Cole last week, was taken quite ill and was carried to the Lee County Hospital for treatment; report from the hospital says her condition remains unchanged.

Mr. and Mrs. Martin McFadyen and little daughter, Ruth Elizabeth, of Fayetteville, spent the week end with relatives.

Misses Jackie Muse and Lillian Cole spent Thursday in Raleigh. A party of young people, chaperoned by Miss Mary Hendricks, enjoyed an outing at Juniper Lake Monday evening.

Mrs. Paul Joyner and children, of Fayetteville, spent the week end with Mr. and Mrs. W. M. Wooten.

Miss Beulah Thomas, of Route 1, entertained at a lovely miscellaneous shower Thursday evening, complimenting Miss Lula Loving, whose marriage occurred on Saturday. Handsome decorations, emphasizing the bridal motif, were seen throughout the house. Many useful and beautiful gifts were showered upon the bride, and dainty refreshments were served.

Miss Nannie Gilchrist, Mrs. Stewart and Miss Ruth Stewart, of Troy, spent the week end with Miss Rachael Gilchrist, of Route 1.

Mr. and Mrs. L. L. McLean, after visiting relatives for a month, returned to their home in Fort Lauderdale, Fla., last Monday.

Mrs. Sallie Smith, Mrs. Ashley and Miss Sallie May Lancaster, of Vanceboro, mother, sister and niece of Mrs. J. D. McLean, spent the week end with Mr. and Mrs. J. D. McLean.

Mrs. Mary Ezzell, of Tampa, Fla., is visiting her sister, Mrs. R. C. Thomas.

Mrs. W. M. Wooten, Mrs. J. D. McLean, Mrs. Jewell Hemphill and Kenneth Wooten spent Friday in Fayetteville with Mrs. Paul Joyner.

Rev. and Mrs. Frank Hare, of Jonesboro, were guests Sunday night and Monday of Mr. and Mrs. B. C. Thomas.

Prof. and Mrs. R. F. Lowry are at the University, where Prof. Lowry is taking a special course. Mrs. Lowry spends much time in the library.

Mr. and Mrs. R. C. Thomas, Mrs. Mary Ezzell, of Tampa, and Ira Thomas spent Sunday in Durham. Mrs. Ezzell remained for a week's visit.

Mrs. Janie Muse, Misses Mamie, Minnie and Jackie Muse, Mrs. Jewell Hemphill and John C. Muse, of Sanford, were tea guests Sunday evening of Mr. and Mrs. H. C. Gibson, of Rockingham. Mrs. Muse remained for a week's visit.

The dewberry season is over, only a few crates will be shipped this week, probably going by express. After the noise and bustle of the many automob-

bles, trucks etc., the streets seem deserted and quietness prevails. The growers, however, will be busy for the next two weeks "cutting back" and fertilizing their vines.

FERTILIZERS PAY, BUT MAY BE ABUSED

Properly used, commercial fertilizers pay good dividends in North Carolina but there are some abuses which should be corrected. The North Carolina Experiment Station is possibly a leader in research investigations with the use of fertilizers on different soil and with different crops, some interesting facts have been developed in the past several years. For each dollar invested in fertilizer for cotton, the net profit was increased by amounts ranging from \$2.04 to \$4.41, said C. B. Williams, head of the agronomy department at N. C. State College, and these are not phenomenal showings.

Tobacco has shown even greater returns. At Rd. 5ville branch station farm, 700 pounds of 4-8-6 mixture, costing \$12.66 increased the yield 424 pounds and the profits by \$183.67.

The best growers, he said, spend \$6 to \$10 an acre for fertilizer on cotton, \$12 to \$18 on tobacco, and \$20 to \$40 on truck crops. The increased profit from the land far outweighs the cost of fertilization.

The main question is not whether fertilizer will pay, but what types of fertilizer are needed. The soil should be studied and the climate and the variety of seed considered in determining what fertilization is best. Care should also be taken to apply the fertilizer in the proper manner to secure the best results.

Williams said that a big mistake many farmers have made is depending upon commercial fertilizers altogether to keep their soil in good condition. Soil productivity can be maintained best when a system of crop rotation is used, with plenty of legumes being plowed back into the soil from time to time.

He also said that poor results are obtained when fertilizer is put on land not prepared to receive it and not protected from erosion.

TOBACCO PROGRAM AIDS ALL BUSINESS

The plight of tobacco growers at the time the AAA adjustment program went into effect is shown by the average family income of only \$250 a year as compared with \$720 a year in 1925.

This reduced income had its vitiating influence on business conditions in the tobacco belts. For example, in 1932, there were some 600 tobacco warehousemen and 12,000 employees engaged in selling tobacco. Their total 1932 income was \$5,000,000—half the income of 1925.

Approximately 90,000 wage earners in tobacco factories received \$61,000,000 in 1932, or \$675 per person. In 1929, the 116,000 workers got \$94,000,000, or \$815 per person.

Late in 1933 the income of the tobacco grower had risen to an average of \$650 per family, and the income of tobacco warehousemen climbed back to \$9,000,000. More men were working in tobacco plants and at higher scales of pay.

Tobacco growers are not only helping themselves by making the tobacco program successful but are aiding employment, increasing their best market for farm commodities, and helping restore the cycle of prosperity said E. Y. Floyd, tobacco specialist at State College, who has charge of the tobacco adjustment program in North Carolina.

He pointed out that the earnings from the large tobacco companies rose from \$135,000,000 in 1929 to \$146,000,000 in 1932. In addition to paying a 2 per cent dividend on capital invested, the companies paid a dozen or so administrative officials \$2,500,000 for personal services—or as much as received by 10,000 farm families for their labor and the use of their farms.

GOOD INCOME SECURED FROM SALE OF PULP WOOD

An annual income of \$1,500,000 comes to North Carolina timber owners, wood cutters, wood haulers, and marketing agents from the marketing of pulp wood.

During the past five years, an average of 255,772 cords of the pulp wood were harvested yearly at a value ranging from \$4 to \$8 a cord f.o.b., cars at the shipping point. The average price was \$6.00 a cord.

During the 5-year period of which a survey was made by R. W. Graeber, extension forester at State College, the pulp was consumed by eight

The three mills from their part in the tobacco adjustment campaign.

NOTICE OF SALE OF LAND.

Under and by virtue of the power of sale contained in that certain deed of trust executed by Nathan Cullins and wife Edolene P. Cullins, to Union Trust Company, of Maryland and Insured Mortgage Bond Corporation of North Carolina, Trustees, (The Union Trust Company of Maryland having resigned as Trustee), dated December 1, 1926, and recorded in Book No. 124, at page No. 418, in the office of the Register of Deeds for Lee County, North Carolina, default having been made in the payment of the indebtedness thereby secured and demand having been made for sale, the undersigned Trustee will sell at public auction to the highest bidder for cash, at the Court House in Lee County, North Carolina, at 2 o'clock P. M., on the 1st day of August, 1934, the following described property, located in the City of Sanford, North Carolina:

Beginning at a stake in the north line of Weatherspoon street at a point 84.1 feet north 73 deg. east from the northwest intersection of Weatherspoon street with Greenboro Avenue, and running thence, north 17 3/4 west 172 feet to a stake; thence north 73 deg. east 90 feet to a stake corner of lot No. 3 in Block "F", as shown on map of Weatherspoon addition to the town of Sanford; thence as lot 3 south 15 1/2 east 172 feet to a stake in the north line of said Weatherspoon street; thence as the north line of said Weatherspoon street south 73 deg. west 84.1 feet to the beginning, designated as lot No. 2 in Block "F", according to the map of the Weatherspoon Addition to the Town of Sanford, registered in the office of the Register of Deeds for Moore County, North Carolina, in Book No. 22, at page No. 599, and being the lot whereon N. Cullins now resides.

This the 29th day of June, 1934.

INSURED MORTGAGE BOND CORPORATION OF NORTH CAROLINA, SUBSTITUTED TRUSTEE.

D. C. McCracken, Attorney, High Point N. C.

WEATHER CONDITIONS FAVOR BOLL WEEVIL

North Carolina cotton growers are being warned by C. H. Brannon, extension entomologist at State College, to prepare for fighting boll weevils extensively this summer.

If the wet weather continues, he said, weevil infestations will be heavy in July and August. In states further South the damage is expected to be even greater than in North Carolina.

For this reason, Brannon urges the growers to poison the weevils when they appear so as to raise their full cotton allotments and be in position to take advantage of the anticipated price increases later in the year.

There is need for a close watch on the crop all through the season. A crop apparently free from weevils at first may be completely ruined later on if there is enough wet weather to favor their growth. One pair of weevils can produce 12,500,000 descendants in a single season.

When the square begins to form, weekly examinations should be made of the squares on the plant so that a close check can be kept on what the weevils are doing. Do not wait until the squares have fallen to the ground.

At the first sign of appreciable infestation—when 10 per cent of the squares are infested—dusting should be started and repeated as often as necessary. Full instructions may be obtained free from the State College office of publications in the circular, "Dusting for Boll Weevil Control."

TIMELY FARM QUESTIONS ANSWERED AT STATE COLLEGE

Question: My pullets show an eye irritation with a whitish matter in them. They are all thin and some are dying. What is the cause and how can it be controlled?

Answer: Your description indicates a deficiency or lack of vitamin A in the ration. Check the ration, being sure that yellow corn or yellow corn meal is being fed. If the birds are confined, put them on range and, if there is not sufficient succulent green feed, add five per cent alfalfa leaf meal to the ration. It would also be well to add one percent of fortified cod liver oil to the ration every second day until the trouble disappears. This should be done whether or not the ration contains cod liver oil.

Question: Will drenching control stomach worms in lambs?

Answer: Experiments conducted at this Experiment Station show that drenching is absolutely necessary where the lambs have grazed on permanent pasture. This applies to all lambs now on hand, and the drenching should be continued until the first of November. The most practical method of control, however, is to change pastures as often as possible and drench only when conditions show this to be necessary. This method of control has given excellent results.

Question: What crops should be planted now for a home garden in Eastern North Carolina?

Answer: Snap beans and field peas are two garden crops that should be planted between July 1st and 15th. Cabbage seed for the fall crop should also be seeded in and out door beds. The length of rows, amount to seed, and a succession of crops for future planting are given in extension circular No. 198, which will be sent free upon request to the Agricultural Editor, State College, Raleigh.

A cotton crop that's 2 weeks late and prospects for the smallest yield in years is reported from Harnett county.

Farmers of Polk county who are digging trench silos this summer, have planted ribbon cane to be used as ensilage.
