

FIVE CENT COTTON AND NO TENANTS

THAT IS OUTLOOK SCHAUB SEES FROM UNCONTROLLED CROP AND COTTON PICKER.

The cotton picking machine invented by the Rust Brothers in Texas, or a machine like it, will eventually wipe out the tenant-laborer system in the South.

"I haven't been able to study this particular machine," he said. "But they say it will work. Anyway, it's inevitable that some day, such a machine will work."

"What's to become of these people? Well, I don't know. That's a problem that has been faced and met every time a new machine was ever invented, from the cotton gin on up."

He touched briefly on the processing tax in his speech, but amplified his idea on the subsequent interview.

"It would simply mean the production next year of 15,000,000 bales; and eventually the destruction of the entire AAA program. As I see it—of course, from the farmer's viewpoint—the processing tax is fair. No mills pay more tax than another."

"And answer me this: Did you ever hear if any one refusing to purchase goods because of the tax? On the contrary, the tax, by boosting the farmer's income, has made it possible for him to buy more."

"I can predict what would happen if the processing tax were removed, and production control were abandoned, for nine out of ten inquiries at my office now ask that they be allowed to plant more acreage."

"I believe controlled production, of some kind, is here to stay."

"Apparently, the fight against the tax originated and is being led by disgruntled New England manufacturers who are jealous of the southern wage differential."

Later he told the farm agent and the Cleveland County Commissioners that he highly approved the homestead plan, as to quality of land and location, but suggested that they try to create some kind of industry there.

But unless they are careful, he added, they may keep in their flock a number of birds which are not profitable, in view of the present price of feed.

The flocks should be watched closely, he continued, for the egg production of some birds will slump rapidly in May, and the low producers should be culled without delay.

Birds going out of production in May or June are seldom good prospects for carrying over until the next laying year.

When their laying falls off most birds show a loss of color in the comb, which becomes dry and shriveled. The vent no longer appears loose and moist, the abdomen becomes hard, and the birds lose their alert appearance.

Broody birds at this season are also poor prospects, Dearstyne added. One broody spell will follow another, with a result that egg production falls off.

Since the breeding season is over, he went on, there is no place in the flock for males. Without males, the flock will produce infertile eggs which are of greater value from a marketing standpoint.

Devitalized males, or males which do not produce offspring with heavy egg producing possibilities, are not worth carrying through the summer, and should be culled out.

MEMORIAL DAY AT CHRISTIAN CHAPEL CHURCH.

The annual memorial day will be held at Christian Chapel church, Saturday, May 11th, 1935, beginning at 11 A. M. all day service and dinner on the ground.

There will be a sermon at 1 P. M. by the pastor, and some good speakers will be on hand for the afternoon service.

Come and bring your friends and enjoy the day.

Stanly Starts Plan For Raising Mules

Stanly county farmers believe that the continued buying of horses and mules from other sections to satisfy local demands is a weak spot in North Carolina's agriculture.

"Thousands of dollars are going out of this county every year for a product that can and should be raised on our farms," says John W. Artz, Stanly county agent.

"This condition can be gradually remedied by every landowner replenishing his stock when necessary with a good brood mare purchased from local dealers, and breeding her to a stallion or Jack, both of which are available locally."

"A program of this kind, followed by the county agent, would work on a population of farms with work animals, supplying both local and outside demands. Not only would this save our farmers much money, but in cases it would give them opportunity to increase their cash incomes by selling animals."

"Over most of the state, with its abundance of corn and oats, lespedeza any good summer pasture, the conditions for raising horses and mules are most ideal. The opportunity of increasing the farm income from this source should not be neglected."

"The old folks in this county say that their fathers managed to raise their horses and mules without difficulty, but a colt trotting along by its mother is an exceedingly rare sight nowadays."

"Here in Stanly county, however, we hope to have our local colt production raised to a much higher level within the next few years."

Supply of Roughage Decreases Dairy Costs

An adequate supply of good roughage is recommended for decreasing the cost of feeding dairy cows and increasing their milk and cream production.

Cows fed liberally on roughage such as lespedeza, alfalfa, clover or soybean silage will give a good milk flow with only a limited amount of grain in their ration, says John Arey extension dairyman at State College.

To insure a sufficient supply of roughage for the summer and winter, dairymen should plan to produce enough hay and silage to give each animal all it needs, Arey adds.

About 1 1/2 ton of legume hay and three tons of silage should be provided for each average-size cow during the winter. If no silage is available the amount of legume hay should be increased to 2 1/2 tons, Arey says.

A combination of silage and hay is preferable to hay alone, he continues, since silage furnishes a succulent ration which is needed in winter. Also, a large quantity of silage can be produced on a small acreage. One acre of good corn or sorghum will supply enough silage to feed three cows for six months.

The trench silo is so inexpensive and valuable that no farmer owning as many as four mature cows can afford to be without one, Arey points out. With such a silo, the farmer can store away an abundant supply of silage for the winter with comparatively little expense.

Plans for constructing trench silos may be obtained without charge from county agents or the dairy extension office at State College.

Execution To Be By Gas In Future

LEGISLATURE ADOPTS THAT MEASURE THOUGH PRESENT CROWD WILL BE ELECTROCUTED.

The doom of the twenty-five old electric chair at the Central Prison was sealed Wednesday, May 1st, when the Senate voted unanimously to substitute lethal gas as the method of carrying out the death penalty imposed in capital cases.

Not a single dissenting voice was lifted not a vote cast against the measure, which already had passed the House.

The senate, however, did amend the bill, introduced by Representative Charles A. Peterson, Mitchell county physician and popular member of the Republican delegation in the House.

To make sure that the men now under sentence of death, those convicted between now and July 1st and those convicted after that date, would be subject to the old penalty of death by electricity.

Concurrence by the House, which passed the bill without opposition, will mean that after June 30 of this year the form of sentence of death will be changed to substitute the words "die by the administration of lethal gas," for the words, "die by electrocution."

Many a Friend Recommends BLACK-DRAUGHT

People who have taken Black-Draught naturally are enthusiastic about it because of the refreshing relief it has brought them. No wonder they urge others to try it.

Mrs. Joe G. Roberts, of Portersville, Ala., writes: "A friend recommended Black-Draught to me a long time ago, and it has proved its worth to me. Black-Draught is good for constipation. I find that taking Black-Draught prevents the bilious headaches which I used to have. A purely vegetable medicine for relief of CONSTIPATION, BILIOUSNESS

More Executions Used In Three States

The new method, claimed by its sponsors to be more humane than electrocution, originated in the far West, and North Carolina is the first state east of the Mississippi to turn to it.

Three Western States, Nevada, where it originated in Arizona and Colorado, use gas.

Cyanide gas, believed by scientists to be the world's most deadly gas, is used in administering the death penalty. The prisoner is strapped in a chair in death cell, cyanide eggs are dropped into a sulphuric acid solution in a jar suspended above him, the heavy gas falls and one deep inhalation is sufficient to cause death.

The gas is odorless and so swift in its action, that there can be no suffering, scientists say.

NOTICE TO THE DEPOSITORS AND CREDITORS OF THE PEOPLES BANK OF SANFORD, SANFORD, NORTH CAROLINA.

Notice is hereby given that a petition by the Commissioner of Banks of the State of North Carolina, has been filed in the Superior Court of Lee County, North Carolina, praying for an order authorizing and directing the sale, at public auction, of all the remaining assets of The Peoples Bank of Sanford under the terms and conditions of a plan heretofore proposed and approved by a meeting of the depositors of said bank, held in the Town Hall in the Town of Sanford on August 17th, 1934, which plan in substance is as follows:

That each and every item, comprising the assets of The Peoples Bank of Sanford be offered for sale, separately, at public auction to the highest bidder, after due advertisement, and that upon such sale that such item be delivered immediately to the purchaser, at the discretion of the Commissioner of Banks, without further orders or directions of the court; and that all such items which are offered for sale and do not bring a price which the Commissioner deems proper to confirm, shall be offered for sale

in bulk immediately or at some later date.

That each depositor or any group of depositors or other creditors, shall have the right to use a sum equal to 10 per cent of his, her or deposit claim or claims, as a payment on the purchase price of any item or items of property purchased at such sale.

That after the payment of all bills payable and the cost and expenses of the liquidation of the bank and of this sale, that any funds remaining shall be distributed:

First, to the depositors and creditors not availing themselves of the opportunity to purchase at said sale, pro-rata, to the extent of 10 per cent of their claims, and

Second, all remaining funds, if any, shall then be paid pro-rata among all claims of the depositors and creditors.

The depositors and creditors are further notified that in accordance with an order made on the 16th day of April, 1935, by his Honor, Judge Walter L. Small, any depositors or creditors objecting to this method of terminating the liquidation of The Peoples Bank of Sanford are required to appear on or before the 25th day of May, 1935, and file their objections, if any they have, in writing, why the order prayed for should not be granted.

This 25th day of April, 1935. W. G. WATSON, Clerk Superior Court, Lee County, North Carolina.

J. C. Pittman, Attorney, for Petitioner.

NOTICE OF FORECLOSURE SALE OF LAND.

North Carolina, Lee County. IN THE SUPERIOR COURT THE FEDERAL LAND BANK OF COLUMBIA, Plaintiff, vs. Edgar P. Thomas and wife, Lenna Thomas, Defendants.

Pursuant to a judgment entered in the above entitled civil action on the 22nd day of April, 1935, in the Superior Court of said county by the Clerk,

Raymond News Service

Former Ambassador James W. Gerard today praised the Farm Credit Administration for suggesting recently that crop loan borrowers buy American-made supplies.

The noted diplomat, whose interest in America has been the very driving force of his private and public life said: "This will mean increased activity in American industries so vital to the welfare and prosperity of the American people, particularly producers of nitrate of soda and sulphate of ammonia. Such activity in turn will increase the home market for farm products. Many farmers, whether or not they are Crop Loan borrowers, will see this and accordingly act in their own and the country's interest by purchasing American goods."

Crop Loans Starting!

THE signing of the Deficiency Bill, making the \$50,000,000 for Crop and Seed Production Loans available, was good news for farmers who are now buying seed, fertilizers, and other supplies. The bill will be a boost for American industry, since the Farm Credit Administration suggests that borrowers buy American-made supplies.

Agricultural leaders have long felt that farmers should support American industry by using fertilizers made in the United States, such as American nitrate of soda, sulphate of ammonia and potash.
