IMPORTANT TO

MANY years experience in stock feeding has convinced farmers that all grain ought to be ground before feeding, but the difficulty of getting a cheap and efficient machine that would answer the purpose, has prevented manv persons from commencing.

The subscriber in recommending Leavitt's Portable Improved

Corn and Cob Mill.

For grinding fine meal for family ufe, stock, and shelling corn, and other purposes, does so in a full belief that it will answer the purpose for which it is intended. It has now been in use several years in the State of Virginia-over 700 are now in use in Virginia and North Carolina, Thousands are now in use in the Southwest and North, Hundreds will, on application, testify to their usefulness on a farm.

All we ask is to give them a fair trial. They are warranted to grind ine corn and cob meal; corn meal, from which two-thirds can be sifted for bread; hominy, coarse or fine; grinding of wheat, barley, rye, &c. and is a good corn sheller. Quantity varying eccording to power applied.

Having purchased from the Agent of the inventor the exclusive right of selling and using these mills in the county of old Edgecombe, we take pleasure in recommending them to the farmers in the above county; and from a desire to have them in general use, we will sell In fact, every thing usually found in them at Forty-five Dollars as we receive them, or will put them up by adding the espense of labor.
