The News is glad to pubish letters, not too long, on matters of general interest. But such communications must be accompanied by the real name of the writer, even when they are to be published under a nom de plume.

Entered as second-class matter at the post office at Sparta, North Carolina, under the Act of March 3, 1879.

"If the choice were left to me whether to have a free press or a free government, I would choose a free press."-Thomas Jeffer-

## "Growing" A 1946 Model Car

With present day shortages being what they are, a lot of ordinary sweet-tempered folks are beginning to get just a little out of patience while waiting for their "new car" orders to be filled.

Well, this is in no way an attempt to point out a short-cut in the matter of hurrying delivery, but it might help to pass away the time a little and keep one's patience down below the boiling point to speculate on just how much we in this community are contributing toward getting the new cars off the assembly line.

Automobile officials state that it takes about \$35,000,000 worth of farm and forest products to build the cars that will be turned out by manufacturers in 1946, and much of that produce comes from right around here.

We are told, for example, that 15,000, 000 pounds of wool will be needed by the auto builders for their 1946 production. Hides will have to be stripped from 256,-000 cattle to meet the need. A little matter of 18,590 pounds of beeswax will be going into the production of this year's models.

But that is only a part. More than 550,000 bales of cotton will be needed. Thousands of acres planted in corn will be growing yellow ears for the latest model autos. And hundreds of thousands of cords of plupwood will have to be cut and converted into various kinds of paper so that Mr. and Mrs. America can go motoring. It may not help in point of days saved to know that we are helping to grow the cars that will be coming off the assembly lines this year, but it is certainly comforting to know that the crops we raise and the peeled top quality pulpwood we deliver to nearby mills are perhaps bringing a little closer that day when we too can ride in the latest model car we've all been waiting for.

those who sacrificed all but life itself, are the benefactors of a law which provides them with \$20 per month-68 cents per day. Public law 144 provides the disabled veteran with less money than International Law provides for German and Japanese prisoners of war. The 67 cents a day received by the vet-

erans is little more than cigarette money and fails to provide them with enough to obtain the few pleasures of life they are still capable of enjoying. They are not only a victim of war but of a flagrant case of neglect and false economy on the part of those responsible for their well-being and care.

To rectify this disgraceful condition, The American Legion has called upon Congress for immediate passage of its sponsored bill, H. R. 535, which would provide that a veteran's compensation, pension or retirement pay shall not be reduced during his hospitalization or domocilary care. The Legion bill seeks to provide the veteran that to which he is entitled and attempts to remove the stigma of discrimination.

Thousands of disabled American veterans are only receiving the disgraceful payment of \$20 per month; yet these are the men who sacrificed the most. They are the blind, the amputees and the paralyzed. These are the men who carried the flag of the forty-eight States through four and a half years of war to return disabled and to receive for their rewardsixty-eight pieces of copper-less than a penny and a half per day for each State they protected.

## -000-**Must We Beg The Peace?**

The United States furnished arms, ammunition, money and the strongest fighting forces on the land, seas and air, to win the World War. Among the nations saved from defeat was Soviet Russia. That country was admitted to membership in the United Nations; that nation has not conformed to the program of other United Nations and it has been a disturbing "rebel" ever since Germany and its sympathizers were laid low.

The Communist government is a chip off old Czarist Russia, and true to tradition it is trying to steal territories and power away from weaker nations.

Evidently Secretary of State James F. Byrnes is the outstanding man in the Four Power Conference of Foreign Ministers, and he seems never to tire in his efforts to bring the Soviet leaders in line. Byrnes is firm in demanding and enforcing allegiance to the United Nations. If Russia

## **Celebrates Tenth** Birthday On Sat.

Mr. and Mrs. B. G. Atwood entertained at dinner, Saturday night in honor of their son, Emmett, on his tenth birthday.

Games and string music were enjoyed after the dinner hour. Those wining prizes were Mrs. Sadie Billings and Miss Myrtle Evans.

present.

River Canvon.

The editorial on he stands put into practice. which this award was made was Born and reared in Cedar Springs, Virginia, he attended Elk Creek high school and graduated from Emory and Henry College in 1921. Prof. Roe served as principal of Greendale high school in Washington county, Elk Creek high school and two other schools before coming to Sparta. Married in 1928 to Miss Julia West, of Kinston, the popular schoolmaster has two sons, George and Rudy. It is understood that Mr. Roe will devote his full time to the management of the Western Auto Associate Store, which he owns here.

## -000-**Our Disabled Veterans**

In the massive volumes of laws that comprise the records of the Congressional Liberty and which govern the American people is Public Law 144, better termed "Public Disgrace 1946." Few voters know the meaning of this law nor the effect upon those to whom it pretains. Those subject to PL 144 are veterans of the armed forces. Only by the grace of God this law applies not to your son, husband or brother, but to the veterans you seldom, or never, seethe disabled American veterans, those who are destined to spend months, years or the remainder of their lives confined to a hospital bed or ward.

The pertinent wordage of PL 144 is written in fewer words than the number of the law itself. The benefits derived by the disabled veterans are even fewer than the number of words themselves. The test of this law simply states: "Where any disabled veteran having neither wife, child nor dependent parent is being furnished hospital treatment by the United States or any political subdivision thereof, any pension or retirement pay shall not exceed \$20 a month. If the veteran's disability is non-service connected he shall receive not more than \$8 a month."

While Congress spends billions for war relief and loans the taxpayer's money in astronomical figures to foreign governments, the disabled American veterans,

upsets the apple-cart the Communists will have proved their unfitness and their failure to understand twentieth century civilization.

without Russia? The United States cannot buy the peace, sacrifice all the principles and policies that have been subscribed to by nearly 50 nations.

There are a lot of patriotic people who have concluded that Stalin and Molotov should be given a series of swift kicks in the pants. After that, the United Nations would go ahead in their efforts to complete plans to insure the World against future wars. -000-

# **Up In Smoke**

France has her eternal flame which tourists may visit, but that is nothing compared to America's perpetual bonfire that roars along to the tune of a half billion dollars' worth of property annually.

In April alone the American bonfire consumed \$52,000,000 worth of homes, farms, hotels, restaurants, dance halls, and heaven alone knows what else. It is getting hotter all the time. Currently it is burning at a rate that has never been equalled since the National Board of Fire Underwriters began compiling losses sixteen years ago.

One of the most effective ways to ease the housing shortage would be to use a little more care where fire is concerned. There are very few unavoidable fires. Cigarettes and matches are the great destroyers. Greater caution in the use of these two items alone would work miracles.

Next to preventing destruction, the most important consideration is the rising cost of the fuel that keeps the American bonfire blazing. Property values are rising rapidly — so rapidly that contractors hesitate to commit themselves on building costs. This means that fire insurance policies can become outdated.

Now Mr. Singletary had just seen Sue's picture in the paper announcing her engagement and approaching marriage. Thinking he would be polite, he remarked, Why can't the United Nations go along "And when is the big event coming off."

was held here last Wednesday

and as she walked into her office

she met Mr. Singletary, soil con-

servationist for Alleghany coun-

Sue was so engrossed in plans for the H. D. meeting that she naturally thought he meant that (not one time thinking that he could be talking about her wedding), so she answered with a sigh of relief, "Tomorrow and I'll be glad when it's over." Mr. Singletary, thinking that this might be a normal reply,

asked, "And how many people will be there." "Oh, about 500," Sue answered matter-of-factly. And when he asked when it would take place, she answered, "in the church," all of which sounded perfectly log-

ical. By this time Mr. Singletary was begining to feel at a loss, because for a bride that was being married the next day, and for one having such a big wedding, Sue was certainly not displaying much of the usual pre-nuptial excitement. In fact she didn't seem excited at all, just anxious for it to be over.

"I have everything ready but the pencils, and I'll take them down this afternoon," Sue said, and that was the last straw . . what in the world would the bride be doing carrying pencils to the church on the afternoon before her wedding .

When he asked why, the mistake was discovered and they both had a good laugh . . . but the bride-to-be admitted that she felt a little foolish, not thinking of her own wedding all the time they were talking.

The C. R. Roe's house is finally moved. We were beginning to doubt if it would ever reach its destination and Mrs. Roe said she was getting so tired of being seasick that she didn't know what to

It seems that the house was moved only about 18 inches at the time and each time it moved, it gave the house a rolling motion, like a boat on the water.

HORSE SHOW TO **BE HELD SATURDAY** 

(Continued from Page 1) be on sale at the gate at one o'clock for the afternoon show, it

was pointed out. The following Lion Committees were appointed for the supervision of the show:

Gate, Kern Wagoner, T. L. Grayson, Hugh Perry and Munsey T. Crouse.

Grand Stand, N. D. Fox, C. R. Roe. R. J. Randolph, Paul Joines, Paul Quinn and Bert Edwards. Drink Stand, Hicks Hash, Wade McMillan and Clarence Cox.

Entries, D. F. Sturdivant, Leff Joines, J. B. Reed, Ralph Cheek, and Tom Greene. Parking, Bill Sprinkle and Boy

Scouts. Information, Roy Ellison and Albert Richardson.

Stable, Dick Doughton and Arthur Gambill.

Patrol, Glenn Richardson and Other Lions.

Numbers, H. E. Singletary.
