Canada Answers The Pulpwood Problem With A Log Jam

Photos show the log-jammed Lake La Tuque after the drive down the St Maurice River, in Quebec. Twelve million logs are handled in this one huge operation and is the greatest pulp log drive in Canada's history. It's Canada's answer to a world-wide paper demand. Logs make paper, and paper makes the wheels of industry turn. Alligator boats plow through the log-jammed lake; pulp logs are sent down a hundred foot chute and log jams are dynamited to keep the pulp moving to the sorting gap.

Menu Restrictions On Tues. And Thursday Are Receiving Little Response Here So Far

Local Officers Arrest Four Men

Few Local People Taking Seriously President's Request For Food Savings

As far as it could be learned yesterday by this newspaper, local people here are not taking the president's request for food savings very seriously. Meatless Tuesday and eggless and poultryless Thursday in order to save more food for feeding European countries.

Cafe owners here in Sparta have various reports as do Allegheny housewives who control the family diet. One owner of a local cafe stated that if other eating places would follow the president's request that he would be glad to do so. As yet no customers have refused to eat meat or eggs on the days designated.

One other owner stated that if he could be sure that by denying the American public that food would be given to those who needed it the most in Europe that he would be glad to not only observe meatless Tuesday and eggless and poultryless Thursday, but would close his cafe for one or two days a week. However, until he could be sure that food is being sent to the needy, he will continue to serve meat and eggs when customers request it.

Since housewives are to be the main controllers of the family diet, if good is to be accomplished it must be through them. One young Allegheny housewife said that although she and her husband had discussed the suggested food conservation program, that actually they had not put it into (Continued on page 4)

Possibility Of Hospital Will Be Considered

Special Committee To Report; All Citizens Are Invited To Attend

All Allegheny citizens are invited to attend the good health meeting to be held at the courthouse next Friday, October 24, at 4:00 o'clock, when the health needs of the county will be outlined as well as the possibilities of establishing a medical center or hospital.

The special committee named some time ago, including Representative C. W. Ervin, Dr. C. A. Thompson and Kemp Doughton, will make a report of their findings.

As has been pointed out before, with the help now offered by State and Federal government, this county has an opportunity to establish a medical center or to build a hospital, provided a proportionate amount of local funds can be raised. This is one of the few counties in this state that does not have a hospital or medical center and with such an institution more medical care would be available to the people.

Representative Ervin said that he hoped all interested citizens would make an effort to attend the meeting next Friday to discuss the needs and proposed plans. "Now is the time to act," he declared.
