Uncle Sam Says

Millions of my nieces and nephews are increasing their take-home pay by the simple, automatic Payroll Savings Plan. Let's take one example. Suppose you tell your employer that you want to take \$2.50 of your weekly pay in Bonds. In three weeks the accumulation of \$15.75 will buy one \$25 Savings Bond. Merely by holding these bonds to maturity in 10 years you are raising your take-home income \$2.50 every week. It is obvious that the so-called deduction for Savings Bonds is not a deduction but a way for you to store up and increase your earnings for your future use.
