LET THE NEWS FOLIOW.

Parties leaving town should not fail to let The News follow them daily with the news of Washington fresh and crisp. It will prove a valuable companion, reading to you like a letter from home. Those at the seashore or mountains will find The News a most welcome and interesting visitor.

MUST BE SIGNED. All articles sent to The News for publication must be signed by the writer, otherwise they will not be sublished.

A DEFIANT TRUST.

The development of underweighing frauds in sugar imported by the Sugar Trust at New Orlenas, no less flagrant than the similar frauds in New York, furnishes added proof of the methodical stealing, but it should serve to divert attention from the tangle in the Federal courts. Af-ter having debauched the politics and debased the revenue service of the United States to an extent never previously approached and after having practically plead guilty by paying back millions of stolen money, the trust now insolently snaps its fingers in the face of justice by refusing to produce given specified books except with the condition of immunity for the officials consenting to their de-

livery.

If the trust may so defy the process of the courts and delay the hand of the government, does it not serve to engender in the common mind of common people a contempt for laws which catch in their net the ordinary thief and let extraordinary thieves es-cape?—Philadelphia Record.

MALARIA'S ENEMIES

In writing to the Progressive Farmer a correspondent in one of the coast counties says that the health of The correspondent is told by the doctors in his section that stock books has not been found. there is scarcely any malarial form it is understood that \$16,000 rather remarkable statement and will stock having been put in by poor cause surprise to upper-State people, widows and others who had complete cause surprise to upper-State people, as some of them look upon the coast countles as greater producers of ma- on hand is not worth over \$2,000. laria than anything else. But we can readily believe the statement of the Farmers' correspondent. He should have classed artesian wells the first dividends out of the m along with the other improvements, which have created such a change for the better in the healthfulnes of that part of the State. It has been said came about the appearance of the people has actually changed. Of one county the remark was made that the inhabitants had the appearance of a different class of people, so greatly had they improved in health since getting the malaria out of their systems by the means mentioned. facts show what great good knowledge of sanitary laws, if acted upon

THE CENSUS HOUR AT HAND.

From being a means purely of de termining how many representatives in Congress each State was entitled to, the national census has become a comprehensive inquiry into the num bers, social and physical conditions, occupations, racial origins, resources and progress of 'he people. Through it a paternal government at Washington takes every ten years an account of stock. It is for the interest of everybody that the accounting shall correct in every essential partic-

This is the year of the thirteenth census. Ard next Friday will witness the beginning of the count. Govern-ment agents starting on that day to call at the homes of the land will more than a score of questions sk. These are to be answered promptly, without suspicion or argument. It is an offense under the law to give false information. So is it an offense for the census-taker to add to

or take from the facts. After the agents turn in their reports Uncle Sam will have something to talk about for several years. add up all the figures and sort out all the facts will be a task taking time. We shall get official driblets of news And presently we shall know whether Commissioner Mer-riam was extravagant when in 1802 be placed the 1910 population of the country at 100,000,000 or whether Director Durand is too conservative

two by the sale of a patent belonging awarded as follows: Lillian Bess for to others, J. D. Cogswell, president, finding the prize egg received a botand H. L. Grant , secretary of the tle of perfume; Raleigh Topping a Seaside Drug Company, of Manteo, life and necktie for winning in the Dare county, have fied the State, and foot and sack races; Lotto Management of the prize of the sack races; Lotto Management of the prize of the sack races; Lotto Management of the prize of the sack races; Lotto Management of the prize of the sack races; Lotto Management of the prize of the sack races; Lotto Management of the prize of the sack races; Lotto Management of the prize of the sack races; Lotto Management of the prize o prehension and conviction. The Sea side Drug Company, manufacturing souvenir pin tray, for the eg drugglets, did a big business, and until the disappearance of the two men last week, and the closing of the house by the sheriff, it was not thought that they were swindlers. Ef-forts to leaste them have proven the forts to locate them have proven fu-

It is stated that the money Cogswell and Grant have taken in from stock subscribed by people in Dare and Currituck counties, added to the sums they obtained by fraudulent drafts and checks from Northern creditors of the company will aggregate about \$30,000. In addition they sold a valuable patent belonging to the company for \$10,000. They went to New York to complete that dea and have since disappeared. Cogs well telegraphed his wife to sell all they had and join him in New York, which she did. That was the last known of the whereabouts of the

The stockholders have been in cor money, and Mr. I. J. Edwards, of Eas Lake, vice-president of the company has notified Northern banks and cred itors of the disappearance of Cogs well and Grant. They have also no tified the American Bonding Com-pany, which was on Cogswell's bond as administrator of an estate in Dare county, it being thought that this es-tate has also suffered. The stock-holders will meet Friday and it is probable that they will offer a reward

pture of the fugitives.
Dryegswell moved to the lower Currituck county fourteer or fifteen years ago, engaged in the practice of medicine and married there. He built up a splendid reputation and lucrative practice. He claimed to have come to this State from New York. Grant went to Dare county a few years ago, claiming to e a physician, selling a catarrh spe-He said he was from Penn-

About two years ago Cogswell and Grant organized the Seaside Drug Company, Dr. Cogswell having moved to Manteo. Grant and he had several proprietary medicines that the company manufactured, and in addition it conducted a retail drug store. At the close of the first year the comthe people has been very good owing pany declared a dividend of twelve to better drainage and screening per cent, and the people were led to doors and windows against files and believe that the business was going to be a great success. The record of ere is scarcely any malarial form it is understood that \$16,000 of disease prevalent now. This is a stock has been paid in, some of the confidence in Dr. Cogswell. The stock

GOOD AND SERVICEABLE FEED RACK

Contrivance Which Will Preven Poultry from Wasting Feed.

Poultry from Wasting Feed.

A serviceable feeding rack, shown in the illustration, is designed to prevent waste of feed given to poultry and to keep water from being soiled, says Orange Judd Farmer. It consists of, a crate and a base tray of any desired size. The tray has two cross pieces beneath to prevent warping and a rim of two-inch stuff. The crate is made of lath, say one foot long, nailed to a top consisting

FEEDING RACK IN POSITION. FEEDING RACK IN POSITION, of a board one inch thick and a base frame of wood one and one-half by one-half or three-fourths. The cover may or may not have the hinged trap door, as shown in the drawing. Water or feed, or both, may be set under the crate without fear of loss or pollution.

Why Green Bone Makes Eggs. Why Green Bone Makes Eggs.

It is not enough that a given food contain a certain per cent. of lime or a certain per cent. of lime in a certain per cent. of phosphates; it must also be decided whether these different chemicals can be assimilated by the hen. Dalton, who is indisputable authority, says: "It is well known that inorganic substances, although they afford the necessary material for vegetation, are not sufficient for the nourishment of animals, which depend for their support upon elements already combined in the organic form, by the bined in the organic form, by the action of the sun's rays and plant

That market bones produce won That market bones produce wederful results when fed to poultry is indisputable. The lean meat and gristle form the white of the egs and about 16 per cent of the yolk. The marrow and other fat on the bones supply the remainder of the wolk.

bones supply the remainder of the yolk.

The lime phosphates in the bone yield all the necessary lime, salts for the shell and the necessary phosphates for the interior of the egg. When it is considered that all the above substances are found in green bone in a specially digestible condition, far more so than any food supplied by dry ment, corn or wheat, it is surprising that such glowing reports are so often heard about this new food for poultry?

With modern machinery obtainable on easy terms, poultry ment and food more liberally of green ext bone, especially to guilets and

cut bone, especially to nullets and cockerels during the cold winter

Of Interest to Women

Jaracy Girl One of Unete So Youngest Scientists - Known se port in Europe and America-Works on "Masquito Life" Attracting World-Wide Attention.

Miss Evelyn Mitchell, one of the youngest women scientists in the United States, who is now doing important work for the government at Smithsonian Institution, is preparing to write a book on gnats. Mise Mitchell has already attracted the attention of the scientific world both in America and Europe by a notable work on mosquitoses entitled, "Mosewite and is concluding her collection of gnats for the purpose of embodying in book form her study of them.

embodying in book form her study of them.

Miss Mitchell, who is under thirty and one of the brightest wonden now doing expert work for the sayerment, is the daughter of Marcus Mitchell, postmaster of East Orange, N. J., and is a graduate of Cornell university. She looks less like a scientist than could be imagined by any one who has always pictured experts of this kind as old and decidedly peculiar in cress and in personality. Miss Mitchell is full of life and enlyow sports that every college girl does She never talks "bug," but in her work at the National museum here she sits side by side with men who have spent years of a long life in scientific research.

She is doing the same work as them.

he is doing the same work as three gray-haired scientists and, as said, is attracting wide attention.

Mica Evelyn Mitchell.

Nies Evelyn Mitchell.

Bhe was the first woman to be given a slace on the faculty of George Washington university, when she was made instructor in scology. She is a macher of the Biological Society of Washington, the American Association for the Advancement Science the Entoniclogical Society of American the Entoniclogical Society of American the Entoniclogical Society of American When she came to Washington Missishell took and still holds the place at the National moseum made wacan by the death of Dr. McConnell, whe for years made the Arawings of shell for Dr? William R. Dall of the Smith senian Institution.

Candlesticks for the table may be aliver, cut glass, Beliemian glass or brass. Here, again, the simple designs are the fagre graceful. There are some very beaultful shapes in the Behemian and out glass. Chesenses, still very good in chape, co

entes, still very good in sumps, the glass.

Shades made of cut glass or allver over linings of different colors are very pretty and also very practical, since the color can be changed seesely. The slik shades made limitation rose betals come in all colors, and are not expensive. Those with the bead frings are very pretty, but are apt to bend the candle with their are apt to bend the candle with their weight. Hand-painted sinden are sometimes extremely attractive, but crequently not in good tasts. The Euro-pire shapes are at present highest in favor, but certainly are not as grace-ful as the more flaring shapes. Has-per's Bazar.

Let Children Sleep Alone.

A child should never sleep wish its parapts. The practice is bad at average, having not one redeeming feature. Moreover, the child should not sleep with other children, if it is at all possible for him to sleep alone. When children sleep together there are often chances of, their being slightly injured in a number of ways They are often apt to kick each other out of bed and in many cases the child falling on the floor may break a shoulder or injure the arms, legs or head. Then thay often kick sach other in their sleep, giving and receiving numerous bruises. Let Children Sleep Alone

Cance May Traverse South America

from Ocean to Ocean.

An official of the Geological Survey at Washington, in describing the gold fields of Western Colombia, has incidentally pointed out a route by which, in the wet season, a man night go is a cance from the Atlantic to the Pacific across the northwestern part of South America.

The proposed route follows the river Atrato to the divide, which lies is a series of swamps, and then, by way of one or two smaller streams, reaches the river Sar Juan, which empties into the Pacific.
