Local spot houses have made arrangements for special trains over the Illinois Central and the New York Central railroads to carry a part of this estion to New York. One of these specials, carrying 3,000 bales, left New Orleans this morning and another, also bearing a large shipment, went from here tonight. The railroads are inder contract to put the cotton in New York within 35 hours and the trains will be operated on fruit express schedies. The Southern Pacific steamers Comus and Antillee carried heavy shipments of cotton to New York hat week and the Comus wil carry a large cargo week. Houston, Memphis and other important markets also report heavy shipments.

With middling cotton selling at 15 1-16 a pound in New Orleans, 16 in Memphis and 15 3-4 in Houston the Southern shippers will make profits.

The contumes are historically correct, affording opportunity to see and understand something of the dress, the maners and customs of that time in England. This is a distinct literary and historical production from one of Dickens' novels.

Browsy Dick, Offices No. 78—A lively farce comedy, accentuated by new and clever tricks of photography. A farce which cannot fail to make you laugh. Hamlet, July 18.—Yesterday, was pay day and Tom Nowell and J. J. Powers, one time employes of the S. A. L. here, came to town to spend Bunday. They registered at the Stag Hotel, a bachelor boarding house, conducted by Herman Pohman, who also owns the litense to sell nearbear in the saloon owned by J. R. Henderson. Today a freight conductor, a fingman and a yard switchman woke in their rooms without money and sick, having no recollection of their night's work except the memory that they were sitting in a stud poker game in the Stag Hotel with Powers and Nowell and Bohman dealing.

The case of Engineer S. L. Brown is worse. Upon his non-appearance at home today, one of his friends applies at the Stag hotel and was denied entrance. W. H. Tant heard of it and accompanied by J. E. Irenharf and C. D. Bradshaw, all brother engineers of Brown, ferred an entrance at 11 o'clock today and carried the unconscious form of the engineer to the waiting automobile of Dr. H. F. Kingman, then the machine was driven to the Brown home and, after several hours of hard work, the sick man, was revived. The mater was reported to the police and Powers and Nowell are now in the city jail.

Bohman has not been apprehended. He is a slender man with light hair and orect walk; wore a dark suit and soft black hat pulled down far over his eyes.

THE HOOK WORM.

Lecture Before the Co muty Insti-

Dr. B. W. Page, of the State Board of Health, Raleigh N. C., delivered a lecture before the County Institute of teachers at the public school building to-day at noon on the Hookworm disease. The lecture proved most interesting, to not only the teachers, but to all others present. Dr. Page is thoroughly conversant with his subject. The Hookworm disease is becoming more prevalent all the while in this country and it is well that our people, and especially the teachers, who have the task of training the young, should pay strict attention to its problem.

Dr. A. C. Hoyt, of this pity, exhibited before the teachers three subjects suffering from the disease. The first subject, was a boy 15 years of age, whom he had treated and cured; another, a girl of 16 years of age he had under treatment.

another, a girl of 16 years of age he

another, a girl of 16 years of age ne had under treatment.

Dr. Page stated that among the first symptoms of Heokworm were the dryness of the hair in advanced cases, a soreness in the pit of the atomach, the pupils of the ere dilated, tongue coated showing a lack of blood. The dector stated that if w child was a back he would not contract Mr. Editor: I have just read that seastiful poem by T. R. T. In Saturday's issue of your paper, in favor of long terms and the same old county, The dector stated that if w child was properly shot he would not contract the disease unless inoculated through the mouth. Said that bare feet had a tendency to produce Hookworm. He stated that the average life of the Hookworm was 10 years. Let-tuce he claimed was one of the vege-tables that brought on this disease due to its growth near the earth, but if it were properly washed, before eating, a great deal of the danger would be eliminated. No meats should be eaten during the time a patient is taking medicine as it dissolves the drug. Said since the disease had been treated in Porto Rico, out of twelve hundred cases, no deaths had taken place. He said what will prevent typhoid fever will also accomplish the same purpose as to ine to its growth near the earth, but And now Teds back, and with Big accomplish the same purpose as to Hookworm. The lecture of Dr. Pare, was interesting and instructive and no doubt will result in much good throughout the county as the major portion of the public school teachers now attending the institute were present.
